Revised United States Standard Certificate of Death

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman,* etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner,* (*b*) *Cotton mill;* (*a*) *Salesman,* (*b*) *Grocery;* (*a*) *Foreman,* (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine,* etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework,* or *At home,* and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid,* etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonaeum,* etc., *Carcinoma, Sar-*

com [illegible] of [illegible] (name origin; "Cancer" is less [illegible] ave[illegible] use of "Tumor" for malignant [illegible] *; Whooping cough; Chronic valvu-* [illegible] *ronic interstitial nephritis,* etc. The [illegible] ary or intercurrent) affection need not be [illegible] important. Example: *Measles* (dis-ease [illegible] *, 29 ds.; Bronchopneumonia* (sec-on[illegible] ver report mere symptoms or ter-[illegible] such as "Asthenia," "Anaemia" [illegible] c), "Atrophy," "Collapse," "Coma," [illegible] ility" ("Congenital," "Senile," etc.), [illegible] tion," "Heart failure," "Haemor-[illegible] "Marasmus," "Old age," "Shock," "U[illegible] ness," etc., when a definite disease can be [illegible] as the cause. Always qualify all diseases [illegible] from childbirth or miscarriage, as "PUER[illegible] *aemia,*" "PUERPERAL *peritonitis,*" etc. State [illegible] hich surgi al operation was under-taken. [illegible] DEATHS state MEANS OF INJURY and qualify [illegible] TAL, SUICIDAL, or HOMICIDAL, or as *probably* [illegible] impossible to determine definitely. Examples: [illegible] *ntal drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)
