20. UNDERTAKER: Mrs C. L. Forster 918 Brooklyn Ave. — ADDRESS

N. B.—Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important.

909 park.

Revised United States Standard Certificate of Death

[Approved by U. S. Census and American Public Health Association.]

Statement of Occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient; e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc.. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework* or *At home*, and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*) For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bron pneumonia* ("Pneumonia," unqualified, is indefin *Tuberculosis of lungs, meninges, peritoneum,* *Carcinoma, Sarcoma*, etc., of .....(n origin; "Cancer" is less definite; avoid use of "Tu for malignant neoplasms); *Measles; Whooping co Chronic valvular heart disease; Chronic interst nephritis*, etc. The contributory (secondary o tercurrent) affection need not be stated unless portant. Example: *Measles* (disease causing dea *29 ds.; Bronchopneumonia* (secondary), *10* Never report mere symptoms or terminal conditi such as "Asthenia," "Anemia" (merely sympt atic), "Atrophy," "Collapse," "Coma," "Con sions," "Debility" ("Congenital," "Senile," o "Dropsy," "Exhaustion," "Heart failure," "H orrhage," "Inanition," "Marasmus," "Old a "Shock," "Uremia," "Weakness," etc., whe definite disease can be ascertained as the ca Always qualify all diseases resulting from c birth or miscarriage, as "PUERPERAL *septicem* "PUERPERAL *peritonitis*," etc. State cause which surgical operation was undertaken. VIOLENT DEATHS state MEANS OF INJURY and qu as ACCIDENTAL, SUICIDAL, OR HOMICIDAL, o *probably* such, if impossible to determine defini Examples: *Accidental drowning; struck by way train—accident; Revolver wound of he homicide; Poisoned by carbolic acid—probably sui* The nature of the injury, as fracture of skull, consequences (e. g., *sepsis, tetanus*) may be st under the head of "Contributory." (Recommen tions on statement of cause of death approve Committee on Nomenclature of the Amer Medical Association.)

NOTE.—Individual offices may add to above list of un able terms and refuse to accept certificates containing t Thus the form in use in New York City states: "Certifi will be returned for additional information which give a the following diseases, without explanation, as the sole of death: Abortion, cellulitis, childbirth, convulsions, h rhage, gangrene, gastritis, erysipelas, meningitis, miscar necrosis, peritonitis, phlebitis, pyemia, septicemia, teta But general adoption of the minimum list suggested will vast improvement, and its scope can be extended at a date.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.
