MISSOURI STATE BOARD OF HEALTH BUREAU OF VITAL STATISTICS CERTIFICATE OF DEATH 1. PLACE OF DEATH

(a) Residence. No. (Usual place of abode)	Ward. (If nonresident give city or town and State)
Length of residence in city or town where death occurred yrs. mos PERSONAL AND STATISTICAL PARTICULARS	da. How long in U.S., if of foreign hirth? yrs. mos.
3. SEX 4. COLOR OR RACE 5. SINGLE, MARRIED, WIDOWED OR DIVORCED (corite the word)	16. DATE OF DEATH (MONTH, DAY AND YEAR) 3 19
5a. If Married, Widowed, or Divosed HUSBAND OF Con WIFE or Charles Bowman	that I last saw h.L. slive on 19 19 19 19 19 19 19 19 19 19 19 19 19
6. DATE OF BIRTH (MONTH, DAY AND YEAR) UNICULIA	THE CAUSE OF DEATH® WAS AS FOLLOWS:
7. AGE YEARS MONTHS DAYS II LESS than 1 day,	Chrone Heart Disease
(a) Trade, profession, or particular kind of work. (b) General nature of industry, business, or establishment in which employed (or employer). (c) Name of employer	CONTRIBUTORY CONTRIBUTORY (SECONDARY) (direction) Trans. (direction) Trans.
9. BIRTHPLACE (CITY OR TOWN) (STATE OR COUNTRY)	IF NOT AT PLACE OF DEATHS. Can't Lay.
(SIAIR GR COCKIRI)	DID AN OPERATION PRECEDE DEATHI DATE OF.
10. NAME OF FATHER Part Know	WAS THERE AN AUTOPSY?
10. NAME OF FATHER Dank Know 11. BIRTHPLACE OF FATHER (CITY OR TOWN) (STATE OR COUNTRY) ON ON ON ON ON ON ON ON ON O	WAS THERE AN AUTOPSYT. U.D. WHAT TEST CONFIRMED DIAGNOSIST. J. Scienlaut (Signed)
10. NAME OF FATHER DONN KNOWN 11. BIRTHPLACE OF FATHER (CITY OR TOWN) (STATE OR COUNTRY) 12. MAIDEN NAME OF MOTHER ON CONTROL ON	WAS THERE AN AUTOPSY? WHAT TEST CONFIRMED DIAGNOSIST. (Signed) (Signed) State the Dibbar Causing Death, or in deaths from Violentz Causes, 8 (1) Means and Nature of Injury, and (2) whether Accordental, Suiconal,
10. NAME OF FATHER DONN KNOW 11. BIRTHPLACE OF FATHER (CITY OR TOWN) (STATE OR COUNTRY) 12. MAIDEN NAME OF MOTHER PONT KNOW	WAS THERE AN AUTOPSY?

Revised United States Standard Certificate of Death

[Approved by U. S. Census and American Public Health Association.]

Statement of Occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer or Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer -- Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers who receive a definite salary), may be entered as Housewife, Housework or At home, and children, not gainfully employed, as At school or At home. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as Servant, Cook, Housemaid, etc. If the occupation has been changed or given up on account of the disease causing death, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Farmer (retired, 6 yrs.) For persons who have no occupation whatever, write None.

Statement of cause of Death.—Name, first, the disease causing death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report

"Tyr hoid pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant nooplasms); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify AS ACCIDENTAL, SUICIDAL, OF HOMICIDAL, OF AS probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of headhomicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g., sepsis, tetanus) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Note.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipolas, meningitis, miscarriage, necrosis, peritonitis, philobitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.
