### III. WORKSHEET

In this fiscal note, we are calculating the cost for compliance with 25 new and amended underground storage tank (UST) rules: 10 CSR 26-2.010 through 10 CSR 26-2.052. EPA determined that the cost to comply with all corresponding federal regulations, which are included in these new and amended state rules, is \$715 per facility annually. As of October 31, 2016, Missouri has 3,420 UST facilities with at least one tank. As that number is steadily, but slowly, declining, we believe using this number of facilities as the annual number of facilities as an estimate for the future number of facilities is valid, and perhaps even overestimates the cost.

Please note, these costs are all ones that were calculated, estimated and provided by EPA in the *Assessment of The Potential Costs, Benefits, And Other Impacts of the Final Revisions to EPA's Underground Storage Tank Regulations*. Any additional costs above and beyond those required by these new EPA rules are reflected in a separate line calculation within this fiscal note. EPA's calculated costs address owner/operator costs to comply with the new requirements. That does not mean that EPA's calculations address every cost potentially immediately associated with the new requirements. For example, EPA's calculations address the cost of "testing" the new spill basin, because that is a new requirement. These calculations do not address the cost to break concrete and replace the spill basin, since regulations already require broken spill basins to be repaired or replaced. As such, no matter how the damage or failing spill basin was discovered, the cost to replace it is already part of the current requirements. The new requirement simply adds another place where non-compliance with the existing rule (spill basin must prevent spills to the environment) might be found and this type of work (e.g. spill basin replacement) would be required. But the work itself is not a new requirement. Furthermore, almost all, if not all, facilities already require regular contractor visits to comply with existing regulations. The cost for these new tests and other requirements may assume that the contractor is already on-site conducting other, previously required tests and/or is already on-site conducting the many new tests or inspections required by this package of rule amendments and additions.

State-specific versions of many of the rules provide options lacking in the federal version of the rules. Complying with Missouri's adoption of the federal rules may often cost less than the corresponding federal requirements. Failure to implement the state versions would lead to higher costs for many sites and many owner/operators (but that "higher" cost is the value provided in the federal calculation used herein.) In the rare instances where Missouri's amendments are more stringent than the federal rule or have costs beyond the original federal requirements, those costs are provided in this amended fiscal note.

The additional costs to the state for implementation were calculated based upon the Missouri Department of Natural Resource's expected additional costs. The Missouri Petroleum Storage Tank Insurance Fund (PSTIF) was asked to provide their expected costs as well. For the department's costs, the department assumed that the new federal requirements would add approximately three (3) extra hours per week of documentation review. The new equipment test and inspections should require only simple documentation. Some of the tests or inspections are only required every three (3) years, but some are required annually. The department reviews this documentation in conjunction with the triennial UST facility inspections. As the department already requests the facility's compliance documentation, these test reports will simply be extra documentation to review as part of the current records review process. With this part of an

existing process, and with the reports for these new requirements expected to be relatively simple and short, the department anticipates no more than an additional three (3) hours per month to review this documentation. These new federal requirements do not change the actual inspection in the field. Furthermore, the one facility that would require additional inspections and time is the airport hydrant fuel distribution system that will no longer be deferred in Missouri. The facility, though, has stated their intention to close the USTs prior to the first inspection being warranted. As such, the department did not include inspections of this facility in this cost estimate.

The cost for three (3) hours per month of additional work, for the purposes of this fiscal note, is based on using an Environmental Specialist IV to conduct the review. Please note, many reviews are conducted by Environmental Specialists I, II or IIIs, and as such, using the Environmental Specialist IV costs should provide the highest estimated cost. The cost is based on an annual salary of \$49,116, with 2080 hours per year. This annual cost equates to approximately \$23.61 per hour. To calculate the full cost, though, the department must also include the cost of the fringe (average 47%) and indirect (average 29.76%) costs of the employee to the state, which comes to \$45.04 per hour. As such, the cost for three (3) additional hours per month is \$135.12, which is \$1621.44 annually.

PSTIF indicated that implementing all of the new federal regulations would require updates to their software program, the UST Operator Training program and edits and printing of updated, new forms. PSTIF provided an expected one time cost for these changes at approximately \$102,000: ~\$75,000 for our underwriting software, \$20,000 to modify the UST Operator Training courses, and \$6-8,000 to reprint applications and accompanying informational materials. In addition, PSTIF staff review compliances records as well. The new federal rules include a number of new testing, inspection and monitoring requirements, with associated new recordkeeping requirements. The department estimated that the additional record review for department staff would be an additional 3 hours per month, but the department only reviews records every three (3) years, not annually like PSTIF, and only for approximately 22% of the in-use facilities. As such, we assumed that their increase would equivalent to three times as many reviews (they review every site annually- we review approximately 1/3 of the sites each year) and then adjusted that to increase the value to 78% of all sites, which gives us a monthly increase of 21.27 hours. According to the current contract for the underwriting services PSTIF uses, the hourly special project technical personnel services cost is \$72.50. As this was the only hourly cost related to this matter, we are using that as the basis for the final calculation. An additional 21.27 hours x \$72.50 equals \$1,542.08/monthly or \$18,504.90/annually.

This fiscal assessment did not include additional costs for filing, records retention, receipt of the mail, or other costs for processing this additional documentation, because it is assumed that it will be submitted with other documentation already required during the records review process, which is already a currently implemented process.

#### IV. ASSUMPTIONS

1. As of October 31, 2016, the number of UST facilities with at least one tank not yet permanently closed is 3,420 facilities. The department assumes that this number will continue to decrease slowly, as it has done for many years. For the “annual” cost calculation, though, we assumed a steady number of facilities, which should be a conservative estimate.
2. The number of facilities provided includes sites that have all tanks out-of-use. As of October 31, 2016, 250 facilities out of the 3,420 facilities referenced have all of the tanks out-of-use. Most of these new requirements apply only to tanks that are in-use. Theoretically, any of the out-of-use facilities could re-open. Many do not, but for the purposes of these calculations, we included all of these facilities. As such, again, this number of facilities is a conservative number.
3. The number of publically owned and privately owned facilities was reviewed, based on data available November 2016. Publically owned facilities include sites owned by the federal government, state government, and county or city governments. The calculated percentage of sites owned by government owners was approximately 8%. As this is simply a percentage, and we are aware of no reason that the number of these owners should dramatically change, we assumed a constant ownership of facilities to be approximately 92% private entities.
4. EPA is required to provide a fiscal assessment for any rule amendments or additions, at least as stringent as the state requirement for fiscal assessments. This fiscal note assumes EPA’s fiscal assessment and cost estimates are reasonable.
5. EPA also calculated potential savings in their final assessment. These savings, for both public and private entities, include the reduced number of leaks, earlier detection resulting in smaller leaks, which should result in lower release investigation and response activity-related costs. The EPA included other potential savings in their assessment as well. For the purposes of this fiscal note, those savings are only mentioned here, but are not included in the calculated cost above.
6. The state agency implementation costs used the assumption that the Environmental Specialist IV costs would be the highest, and therefore the most conservative number for the fiscal note. As such, this fiscal note does not attempt to include any routine cost of living raises, as the annual personnel cost is using the highest salary already; the cost of living calculation increase is offset by the reduction the department could have calculated using a lower-salaried position. These costs also assume that any facility providing the newly required documentation would have already regularly been providing compliance documentation upon request.

SUMMARY OF COMMENTS: Missouri Medicaid Audit and Compliance (MMAC), a unit within the Department of Social Services (DSS), received five (5) comments on the proposed amendment.

COMMENTS #1 and #2: Missouri Alliance for HOME CARE and Missouri Health Care Association expressed concern with the change to subsection (5)(B) whereby sanctions involving the collection, recoupment, or withholding of MO HealthNet payments become effective ten (10) days from the date of mailing or delivery, whichever occurs first. Both commenters were concerned with the department's mail room and perceived delays therein. Missouri Alliance for HOME CARE was further troubled by what it felt was an inconsistency within the department due to the Family Support Division (FSD) considering increasing its notice periods due to delays in the FSD's benefit recipients receiving correspondence from FSD. Both commenters were particularly concerned with notices being mailed on Friday.

RESPONSE: With regard to the issue of sending notices on a Friday, we do not, and will not begin to, mail notices of sanctions on Fridays. No changes have been made to the rule as a result of these comments.

COMMENTS #3 and #4: Missouri Alliance for HOME CARE and Missouri Health Care Association were troubled by the removal from subsection (5)(B) of the necessity for the date of delivery of a notice to be determined by a signed receipt of delivery. Both entities expressed concern that this change would require a provider to retain the envelope in which the notice was received.

RESPONSE: MMAC would note that this change does not mean that MMAC will discontinue use of certified mail and the corresponding signed receipts of delivery. To clarify, MMAC is simply adding an option for delivery by first class mail to deal with situations where a provider refuses to accept delivery of certified mail. With respect to providers concerned about retaining envelopes in which notice is delivered, MMAC would point out that envelopes are not bulky and could easily be scanned into a computer if the provider deemed it too cumbersome. No changes have been made to the rule as a result of these comments.

COMMENT #5: In reviewing this proposed amendment, the department noted that an additional citation for its statutory authority to promulgate the amendment could have been included in the "AUTHORITY" section following the regulation.

RESPONSE AND EXPLANATION OF CHANGE: The department has modified the "AUTHORITY" section of the amendment.

COMMENT #1: Judy Stone, with the Board for Certification of Nutrition Specialists, commented that a more general description of providers who may provide Diabetes Education should be included by changing the words “a Certified Diabetes Educator” to “a professional who provides diabetes education services, consistent with their education and training.”

RESPONSE: No changes have been made as a result of this comment. MCHCP will continue to require Diabetes Education to be delivered by a Certified Diabetes Educator based on the ten (10) guiding principles of the National Standards for Diabetes Self-Management Education (NSDSME). These standards were established to ensure quality diabetes self-management education that is evidence-based.
