## HOW TO CITE RULES AND RSMO

### RULES

The rules are codified in the *Code of State Regulations* in this system–

<b>Title</b>	<b>CSR</b>	<b>Division</b>	<b>Chapter</b>	<b>Rule</b>
3 Department	<i>Code of State Regulations</i>	10- Agency division	4 General area regulated	115 Specific area regulated

and should be cited in this manner: 3 CSR 10-4.115.

Each department of state government is assigned a title. Each agency or division in the department is assigned a division number. The agency then groups its rules into general subject matter areas called chapters and specific areas called rules. Within a rule, the first breakdown is called a section and is designated as (1). Subsection is (A) with further breakdown into paragraphs 1., subparagraphs A., parts (I), subparts (a), items I. and subitems a.

The rule is properly cited by using the full citation; for example, 3 CSR 10-4.115, NOT Rule 10-4.115.

Citations of RSMo are to the *Missouri Revised Statutes* as of the date indicated.

The text of proposed rules and changes will appear under this heading. A notice of proposed rulemaking is required to contain an explanation of any new rule or any change in an existing rule and the reasons therefor. This explanation is set out in the PURPOSE section of each rule. A citation of the legal authority to make rules is also required, and appears following the text of the rule, after the word "Authority."

Entirely new rules are printed without any special symbology under the heading of proposed rule. If an existing rule is to be amended or rescinded, it will have a heading of proposed amendment or proposed rescission. Rules that are proposed to be amended will have new matter printed in boldface type and matter to be deleted placed in brackets.

An important function of the *Missouri Register* is to solicit and encourage public participation in the rulemaking process. The law provides that for every proposed rule, amendment, or rescission there must be a notice that anyone may comment on the proposed action. This comment may take different forms.

If an agency is required by statute to hold a public hearing before making any new rules, then a Notice of Public Hearing will appear following the text of the rule. Hearing dates must be at least thirty (30) days after publication of the notice in the *Missouri Register*. If no hearing is planned or required, the agency must give a Notice to Submit Comments. This allows anyone to file statements in support of or in opposition to the proposed action with the agency within a specified time, no less than thirty (30) days after publication of the notice in the *Missouri Register*.

An agency may hold a public hearing on a rule even though not required by law to hold one. If an agency allows comments to be received following the hearing date, the close-of-comments date will be used as the beginning day in the ninety- (90-) day count necessary for the filing of the order of rulemaking.

If an agency decides to hold a public hearing after planning not to, it must withdraw the earlier notice, file a new notice of proposed rulemaking, and schedule a hearing for a date not less than thirty (30) days from the date of publication of the new notice.

Proposed Amendment Text Reminder:

**Boldface text indicates new matter.**

The seller must present an original EIA test chart; no photocopies or facsimiles will be accepted. Verification of each animal to the EIA test chart shall be the responsibility of the livestock market/sale veterinarian. If in the opinion of the livestock market/sale veterinarian the information shown on the EIA test chart does not match the animal presented or the test chart has been altered, the livestock market/sale veterinarian shall confiscate the form, mark the document "invalid," and the animal(s) will be tested at the seller's expense prior to the sale.

**TITLE 2 – DEPARTMENT OF AGRICULTURE**  
**Division 30 – Animal Health**  
**Chapter 6 – Livestock Markets**

**PROPOSED AMENDMENT**

**2 CSR 30-6.030 Bonding (Surety) Requirements for Livestock Market/Sale Licensees.** The division is amending subsections (2)(D) and (G) and (4)(A).

*PURPOSE: This amendment further protects producers by shortening the time frame in which a market can operate without a current license or bond.*

(2) All surety bonds and certificates of deposit shall name the state veterinarian as trustee or beneficiary. Letters of credit shall name the state veterinarian and the issuing financial institution as co-trustees. For livestock markets or sales whose corporate headquarters are located in another state, it is not required that the state veterinarian act as beneficiary or trustee, although proof of adequate bonding must be submitted with the application for a license. These bonds shall be in favor of Missouri with the director as trustee for the benefit of all persons selling livestock to the livestock market/sale and their legal representatives, attorneys, or assigns, and shall be dependent upon the following:

(D) The required bond shall be kept in force at all times while conducting business as a licensed livestock market or sale. **No livestock market/sale shall operate without a bond in force.** Failure to keep that bond in force is cause for revocation of the license and the **livestock** market/sale is subject to the penalties provided in this chapter. No **livestock** market/sale shall cancel an approved bond without the prior written approval of the state veterinarian and the state veterinarian's approval of a substitute bond;

(G) Whenever the state veterinarian receives notice from a surety that it intends to cancel the bond of a livestock market or sale, the state veterinarian shall automatically suspend the **livestock** market/sale license if a new bond is not submitted to the state veterinarian within *[forty-five (45)]* **thirty (30)** days of receipt of the notice of intent to cancel. If a new bond is not received within *[eighty (80)]* **thirty (30)** days of receipt of the notice of intent to cancel, the state veterinarian shall revoke the **livestock** market/sale license. The state veterinarian may cause an inspection of the livestock market/sale at the end of the *[eighty (80)-]* **thirty- (30-)** day period. That inspection may include an attempt to identify all possible livestock sellers and related claimants of the **livestock** market/sale by advertising for the same in local news media; and

(4) Amount of bond or surety will vary based upon the following criteria:

(A) Each **livestock** market/sale licensed under Chapter 277, RSMo, that does not meet USDA Packers and Stockyards Administration criteria either in volume or type of livestock sold must carry a minimum ten thousand dollar (\$10,000)

surety bond or like security; and

**TITLE 8 – DEPARTMENT OF LABOR AND INDUSTRIAL RELATIONS**  
**Division 50 – Division of Workers' Compensation**  
**Chapter 2 – Procedure**

**PROPOSED RULE**

**8 CSR 50-2.070 Rules Governing Line of Duty compensation**

*PURPOSE: This rule sets forth requirements for filing and pursuing claims against the Line of Duty Compensation Fund, section 287.243, RSMo.*

(1) Compliance with Rule. Any party pursuing a claim against the Line of Duty Compensation Fund shall comply with this rule.

(2) Terms Defined.

(A) Terms defined in section 287.243, RSMo, shall have the same meaning when used in this rule.

(B) The following terms, when used in this rule, shall mean –

1. Award – A final administrative determination made by the division on a claim against the Line of Duty Compensation Fund, or a final decision made by an administrative law judge following an evidentiary hearing, or a final decision by the Labor and Industrial Relations Commission or by the appellate court;

2. Central Office – The division's administrative office in Jefferson City, Missouri;

3. Claim – A claim for compensation for Line of Duty Compensation Benefits completed by a claimant(s) after the death of decedent, seeking an award from the Line of Duty Compensation Fund, or portion of an award, in accordance with section 287.243, RSMo;

4. Claimant – A person filing or joining a claim against the Line of Duty Compensation Fund, alleging to be a survivor of the decedent eligible for compensation pursuant to section 287.243, RSMo, or a person identified in a claim as a survivor of the decedent;

5. Decedent – The public safety officer whose death precipitated a claim for compensation for Line of Duty compensation benefits;

6. Division – The division of workers' compensation;

7. Evidentiary Hearing—A hearing conducted pursuant to the provisions of this regulation and sections 287.450 and 287.460, RSMo, and the regulations promulgated thereunder;

8. Survivor—A person who may be eligible for compensation pursuant to section 287.243, RSMo, but who has not filed or joined a claim.

(3) Filing of Claims and Supporting Documentation.

(A) An application for an award from the Line of Duty Compensation Fund must be commenced by the filing of a claim in the form prescribed by the division and either mailed to the division's central office or submitted electronically in a format approved by the division.

(B) A claim may be filed by an individual claimant or multiple claimants, or on behalf of one (1) or more claimants by a Missouri-licensed attorney. A claim may also be filed on behalf of a claimant by his or her legal guardian or conservator or by a person acting as attorney-in-fact for the claimant pursuant to a valid durable power of attorney.

(C) If no claim is filed within two (2) years from the date of death of a public safety officer, then no compensation shall be awarded to any survivor of the decedent.

(D) In addition to the claim form, the following information must be provided to the division at the time the claim is filed:

1. All existing accident or casualty reports related to the incident alleged to have caused the decedent's death that were filed with or by the decedent's employer;

2. The decedent's certificate of death;

3. All existing police reports related to the incident alleged to have caused the decedent's death;

4. A toxicology report, if existing;

5. An autopsy report, if one was performed;

6. Relevant medical records;

7. A written statement setting forth a full factual account explaining events leading up to the decedent's death and explaining how the decedent was "killed in the line of duty" as defined in section 287.243.2(8), RSMo;

8. Documentation showing the relationship of all claimants to the decedent, such as a marriage certificate, birth certificate, adoption decree, or other proof of the claimant's relationship to the decedent;

9. If the claim contends that the decedent's death was caused by an "illness," then the claimant(s) shall also provide an affidavit from a Missouri-licensed physician stating the opinion, to a reasonable degree of medical certainty, that—

A. The illness caused the decedent's death within three hundred (300) weeks from the date the illness was contracted; and

B. The illness was related to the decedent's performance of his or her duties as a public safety officer. Such affidavit shall state the basis for the physician's opinion and identify all evidence relied on by the physician in making the opinion;

10. An affidavit in which the claimant(s) provide the name, date of birth, last known address, and last known telephone number of all known survivors; and

11. If the claim is being filed on behalf of a claimant or claimants by any other person, the claimant(s) shall submit documentation (such as a court order appointing the representative as the legal guardian of the claimant(s) or an entry of appearance by an attorney) showing the representative's legal authority to file the claim on behalf of the claimant(s), unless the representative is the biological parent of a claimant under the age of eighteen (18).

(E) A claim shall not be considered filed with the division until the division designates the claim as "accepted" and assigns a case number to the claim. The division will accept

a claim that, in the division's sole determination, contains all or substantially all of the information required by 8 CSR 50-2.070(3)(D).

(F) All evidence, correspondence and communications concerning any pending claim shall be directed to the division's central office and shall bear the case identification number assigned by the division.

(4) Administrative Review of claims; Request for Evidentiary Hearing; Failure of Timely Request for Evidentiary Hearing.

(A) After a claim is filed, the division shall review the claim and the documentation provided by the claimant(s). The division may require the claimant(s) to produce additional documentation or answer written questions under oath. If a physician's affidavit was provided as part of the claim, the division may retain another Missouri-licensed physician as an expert to review the claim. The division may deny a claim if the additional information requested is not received within thirty (30) days, unless the division determines there is good cause for the failure to timely respond.

(B) Only one (1) claim shall be allowed per decedent. If more than one claimant attempts to file a claim relating to the same decedent, the claims shall be consolidated by the division into a single claim for consideration.

(C) All persons identified on the claim as survivors shall be added to the claim as claimants. The division may require any claimant to provide proof of his or her relationship to the decedent (such as a marriage certificate, birth certificate, adoption decree, or other evidence) or of his or her eligibility to receive a portion of the award. If a claimant fails to timely provide such evidence, then the division may determine that he or she does not qualify for compensation. If the division determines that there are or may be additional survivors that have not been added to the claim, the division may delay its determination on the claim.

(D) If the claimant(s) fail to timely take all necessary steps to support the claim as may be required by the division, including, but not limited to, the filing of any documents required under 8 CSR 50-2.070(3)(D) or requested pursuant to 8 CSR 50-2.070(4)(A), the division may deny the claim.

(E) After review, the division shall issue its administrative determination awarding or denying compensation and stating how the compensation, if awarded, is to be apportioned pursuant to section 287.243.4, RSMo.

(F) If the division finds that the services of an attorney were necessary in connection with a claim, the division may, as part of its determination, set a reasonable fee to be paid from the compensation otherwise due in accordance with section 287.260, RSMo.

(G) The division shall send a copy of its administrative determination to all claimants (or their attorneys, if applicable). The administrative determination shall contain a notice advising the claimant(s) of their right to request an evidentiary hearing within twenty (20) days and a copy of the Application for Evidentiary Hearing form created by the division.

(H) The division's administrative determination shall become the final award in the case if no Application for Evidentiary Hearing is received that is postmarked no later than twenty (20) days after the date the administrative determination was issued.

(I) Upon timely filing of an Application for Evidentiary Hearing, the division shall assign the case to an administrative law judge for evidentiary hearing.

(J) If a claimant timely files an Application for Evidentiary Hearing, the division shall notify all claimants of the date, time, and location of the hearing.

(K) An Application for Evidentiary Hearing filed by any claimant shall stay the issuance of any award related to the decedent.

(L) A request for evidentiary hearing may be withdrawn with prejudice, at any time after the filing of the request and prior to the conclusion of the hearing, provided that such withdrawal is signed by or consented to in writing by all claimants. The claimant(s) may not withdraw the request for evidentiary hearing without prejudice. Upon withdrawal of the request for evidentiary hearing, the division's administrative determination shall become the final award in the case.

(5) Evidentiary Hearing; When and Where Held; How Conducted; Award; Review.

(A) All evidentiary hearing requests related to a single decedent shall be consolidated and heard together. A claimant is not required to participate in the evidentiary hearing requested by another claimant, but shall be bound by the determination made by the administrative law judge.

(B) Unless specifically provided for otherwise in section 287.243, RSMo, or this rule, the procedures for such hearing shall be as set forth in sections 287.450 to 287.460, RSMo, and the regulations promulgated thereunder, except that no answer shall be filed.

(C) The evidentiary hearing shall be a simple informal proceeding. The rules of evidence in civil cases in the state of Missouri shall apply, except that the administrative law judge may take official notice of the contents of the division's file. A record shall be made of all evidentiary hearings. All exhibits offered into evidence shall be marked for identification with the case identification number assigned by the division. All exhibits admitted into evidence shall become part of the record and shall be retained in the division's file. Any exhibits offered into evidence, but not admitted into evidence by the administrative law judge may be retained in the division's file for purposes of review by the Labor and Industrial Relations Commission and/or the appropriate appellate court.

(D) The administrative law judge shall issue a decision within thirty (30) days of the hearing. The administrative law judge may not remand to the division, but may affirm, reverse, or modify the division's determination or may modify the apportionment of the award in accordance with section 287.243, RSMo. If reversing or modifying the division's determination, the administrative law judge's decision shall determine the claimant(s)'s eligibility for compensation and shall include a determination as to the apportionment of the award to all claimants, regardless of whether such claimant(s) requested or participated in evidentiary review.

(E) If the administrative law judge finds that the services of an attorney were necessary in connection with the claim, the administrative law judge may, as part of its decision, set a reasonable fee to be paid from the compensation otherwise due in accordance with section 287.260, RSMo.

(F) The division shall send a copy of the administrative law judge's decision to the claimant(s) (or their attorneys if applicable), together with a notice advising the parties of their rights to have the decision reviewed by the Labor and Industrial Relations Commission and informing the parties of the time for filing such an application for review.

(G) An application for review must be filed with the Labor and Industrial Relations Commission, on a form to be provided for such purpose by the commission, within twenty (20) days following the date of the decision. The administrative law judge's decision shall become a final award if no application for review is filed within twenty (20) days of the date of the decision.

(6) Procedure for Payment of Awards.

(A) Payment of all final, unappealable awards shall be made payable to the claimant(s) in the apportionment as specified in the award, accounting for any attorney liens determined pursuant to 8 CSR 50-2.070(4)(F) or 8 CSR 50-2.070(5)(E). It shall be the responsibility of each claimant to provide current contact information to the division throughout the proceeding.

(7) Record Retention and Information Requests.

(A) A request to inspect, or receive copies of, any documents in the possession of the division as a result of a claim shall be made in writing to the division's central office.

(B) All claims, supporting documents, exhibits offered, administrative determinations, final awards, and all other file materials shall be retained by the division in accordance with the division's published record retention policy for Line of Duty Compensation Fund claims.

**TITLE 9 – DEPARTMENT OF MENTAL HEALTH  
Division 30 – Certification Standards  
Chapter 4 – Mental Health Programs**

**PROPOSED RESCISSION**

**9 CSR 30-4.195 Access Crisis Intervention (ACI) Programs.**  
*The rule set forth standards and regulations for ACI Programs.*

*PURPOSE: This rule is being rescinded because it reflects an earlier structure of Missouri's crisis system that relied on multiple regional entry points for crisis services. Missouri's crisis system has evolved significantly since this regulation was originally developed.*

*Following the national implementation of the 988 Suicide & Crisis Lifeline, Missouri now promotes 988 as the primary access point for individuals experiencing behavioral health crises or emotional distress. As Missouri's crisis continuum has developed, the requirements contained within the 9 CSR 30-4.195 Access Crisis Intervention (ACI) regulation no longer reflect the current structure of Missouri's crisis continuum.*

*Rescinding this rule will not impact the availability of crisis services in Missouri, as crisis response services continue to be supported through the Certified Community Behavioral Health Clinic (CCBHC) criteria, provider contracts, existing crisis service guidance, and the development of updated regulations.*

*Additionally, the Department of Mental Health (DMH) is in the process of implementing the following proposed regulations:*

- 9 CSR 30-7.005 Definitions;
- 9 CSR 30-7.030 988 Contact Centers; and
- 9 CSR 30-7.040 Mobile Crisis Response.

These proposed regulations will address core components of Missouri's crisis continuum, including 988 Crisis Contact Center services and Mobile Crisis Response (MCR) services. Existing regulations for the third component, Behavioral Health Crisis Centers, are already in place. The 988 and MCR regulations will reflect current services and align with Missouri's existing crisis continuum. Currently, the proposed regulations are undergoing a review with the DMH stakeholders and is expected to be submitted to the Missouri Secretary of State in the upcoming months. These proposed regulations will replace the 9 CSR 30-4.195 Access Crisis Intervention (ACI) rule in its entirety.

**PUBLIC COST:** This proposed rescission will not cost state agencies or political subdivisions more than five hundred dollars (\$500) in the aggregate.

**PRIVATE COST:** This proposed rescission will not cost private entities more than five hundred dollars (\$500) in the aggregate.

B. A rigid internal tubular stiffener, other than a split tubular stiffener, must be used in conjunction with the coupling;

C. All mechanical fittings must meet a listed specification based upon the applicable material; and

D. All mechanical joints or fittings installed after April 22, 2019, must be Category 1 as defined by a listed specification for the applicable material, providing a seal plus resistance to

a force on the pipe joint equal to or greater than that which will cause no less than twenty-five percent (25%) elongation of pipe, or the pipe fails outside the joint area if tested in accordance with the applicable standard.

(G) Plastic Pipe – Qualifying Joining Procedures. (192.283)

1. Heat fusion, solvent cement, and adhesive joints. Before any written procedure established under paragraph (6) (B)2. is used for making plastic pipe joints by a heat fusion, solvent cement, or adhesive method, the procedure must be qualified by subjecting specimen joints made according to the procedure to the following tests, as applicable:

A. The test requirements of –

(I) In the case of thermoplastic pipe, based on the pipe material, the Sustained Pressure Test or the Minimum Hydrostatic Burst Test per the listed specification requirements. Additionally, for electrofusion joints, based on the pipe material, the Tensile Strength Test or the Joint Integrity Test per the listed specification;

(II) *(Reserved)*;

(III) In the case of electrofusion fittings for polyethylene pipe and tubing, paragraph 9.1 (Minimum Hydraulic Burst Pressure Test), paragraph 9.2 (Sustained Pressure Test), paragraph 9.3 (Tensile Strength Test), or paragraph 9.4 (Joint Integrity Tests) of ASTM F1055[–98(2006)] (incorporated by reference in 49 CFR 192.7 and adopted in subsection (1)(D));

B. For procedures intended for lateral pipe connections, subject a specimen joint made from pipe sections joined at right angles according to the procedure to a force on the lateral pipe until failure occurs in the specimen. If failure initiates outside the joint area, the procedure qualifies for use; and

C. For procedures intended for non-lateral pipe connections, perform tensile testing in accordance with a listed specification. If the test specimen elongates no less than twenty-five percent (25%) or failure initiates outside the joint area, the procedure qualifies for use.

2. Mechanical joints. Before any written procedure established under paragraph (6)(B)2. is used for making mechanical plastic pipe joints, the procedure must be qualified in accordance with a listed specification based upon the pipe material.

3. A copy of each written procedure being used for joining plastic pipe must be available to the persons making and inspecting joints.

(8) Customer Meters, Service Regulators, and Service Lines.

(B) Service Lines and Yard Lines.

1. All service line installations and residential/small commercial yard line replacements made after December 15, 1989, must be installed, owned, operated, and maintained by the operator regardless of meter location. Installations of customer-owned service lines and residential/small commercial yard lines, as defined in (1)(B), will not be permitted. If the customer meter is not located within five feet (5') of the building wall, the service line to the customer's nearest building shall be installed, owned, operated, and maintained by the operator. Installation and maintenance may be performed by representatives approved by the operator and the operator must assure that the work performed by approved representatives is in compliance with the requirements of this rule.

2. Yard lines for large commercial/industrial customers may be installed or replaced, owned, and maintained, except for leak surveys, by the customer, provided the new yard line is cathodically protected, coated steel, *[or]* polyethylene pipe, **PA-11**, or **PA-12** and the operator's installation standards are met.

(9) Requirements for Corrosion Control.

(X) In-line Inspection of Pipelines. (192.493) When conducting in-line inspections of pipelines required by this rule, an operator must comply with API STD 1163, *[ANSI/ASNT ILI-PQ]*, and NACE SP0102 (incorporated by reference in 49 CFR 192.7 and adopted in subsection (1)(D)). Assessments may be conducted using tethered or remotely controlled tools, not explicitly discussed in NACE SP0102, provided they comply with those sections of NACE SP0102 that are applicable.

II. Steel pipe of unknown or unlisted specification.

A. Bending properties. For pipe two inches (2") (51 mm) or

less in diameter, a length of pipe must be cold bent through at least ninety degrees (90°) around a cylindrical mandrel that has a diameter twelve (12) times the diameter of the pipe, without developing cracks at any portion and without opening the longitudinal weld. For pipe more than two inches (2") (51 mm) in diameter, the pipe must meet the requirements of the flattening tests set forth in ASTM A53/A53M (incorporated by reference in 49 CFR 192.7 and adopted in subsection (1)(D)), except that the number of tests must be at least equal to the minimum required in paragraph II.D. of this appendix to determine yield strength.

B. Weldability. A girth weld must be made in the pipe by a welder who is qualified under section (5) of 20 CSR 4240-40.030. The weld must be made under the most severe conditions under which welding will be allowed in the field and by means of the same procedure that will be used in the field. On pipe more than four inches (4") (102 mm) in diameter, at least one (1) test weld must be made for each one hundred (100) lengths of pipe. On pipe four inches (4") (102 mm) or less in diameter, at least one (1) test weld must be made for each four hundred (400) lengths of pipe. The weld must be tested in accordance with API Standard 1104 (incorporated by reference in 49 CFR 192.7 and adopted in subsection (1)(D)). If the requirements of API Standard 1104 cannot be met, weldability may be established by making chemical tests for carbon and manganese, and proceeding in accordance with section IX of the *ASME Boiler and Pressure Vessel Code* (incorporated by reference in 49 CFR 192.7 and adopted in subsection (1)(D)). The same number of chemical tests must be made as are required for testing a girth weld.

C. Inspection. The pipe must be clean enough to permit adequate inspection. It must be visually inspected to ensure that it is reasonably round and straight and there are no defects which might impair the strength or tightness of the pipe.

D. Tensile properties. If the tensile properties of the pipe are not known, the minimum yield strength may be taken as twenty-four thousand (24,000) psi (165 MPa) or less, or the tensile properties may be established by performing tensile tests as set forth in API Specification 5L (incorporated by reference in 49 CFR 192.7 and adopted in subsection (1)(D)). All test specimens shall be selected at random and the following number of tests must be performed:

Number of Tensile Tests – All Sizes	
10 lengths or less	1 set of tests for each length.
11 to 100 lengths	1 set of tests for each 5 lengths, but not less than 10 tests.
Over 100 lengths	1 set of tests for each 10 lengths, but not less than 20 tests.

If the yield-tensile ratio, based on the properties determined by those tests, exceeds 0.85, the pipe may be used only as provided in paragraph (2)(C)3. of 20 CSR 4240-40.030.

III. Steel pipe manufactured before November 12, 1970, to earlier editions of listed specifications. Steel pipe manufactured before November 12, 1970, in accordance with a specification of which a later edition is listed in section I. of this appendix, is qualified for use under this rule if the following requirements are met:

A. Inspection. The pipe must be clean enough to permit adequate inspection. It must be visually inspected to ensure that it is reasonably round and straight and that there are no defects which might impair the strength or tightness of the pipe; and

B. Similarity of specification requirements. The edition of the listed specification under which the pipe was manufactured

must have substantially the same requirements with respect to the following properties as a later edition of that specification listed in section I. of this appendix:

1) Physical (mechanical) properties of pipe, including yield and tensile strength, elongation and yield to tensile ratio, and testing requirements to verify those properties; and

2) Chemical properties of pipe and testing requirements to verify those properties; and

C. Inspection or test of welded pipe. On pipe with welded seams, one (1) of the following requirements must be met:

1) The edition of the listed specification to which the pipe was manufactured must have substantially the same requirements with respect to nondestructive inspection of welded seams and the standards for acceptance or rejection and repair as a later edition of the specification listed in section I. of this appendix; or

2) The pipe must be tested in accordance with section (10) of 20 CSR 4240-40.030 to at least one and one-fourth (1.25) times the maximum allowable operating pressure if it is to be installed in a Class 1 location and to at least one and one-half (1.5) times the maximum allowable operating pressure if it is to be installed in a Class 2, 3, or 4 location. Notwithstanding any shorter time period permitted under section (10) of 20 CSR 4240-40.030, the test pressure must be maintained for at least eight (8) hours.

I. Definitions.*

**A. Other Principal Arterials.**

These roadways serve major centers of metropolitan areas, provide a high degree of mobility, and can also provide mobility through rural areas. Unlike their access-controlled counterparts, these roadways can serve abutting land uses directly. Forms of access for other principal arterial roadways include driveways to specific parcels and at-grade intersections with other roadways. For the most part, roadways that fall into the top three functional classification categories (interstate, other freeways and expressways, and other principal arterials) provide similar service in both urban and rural areas. The primary difference is that multiple arterial routes usually serve a particular urban area, radiating out from the urban center to serve the surrounding region. In contrast, an expanse of a rural area of equal size would be served by a single arterial.

**B. Minor Arterials.**

Minor arterials provide service for trips of moderate length, serve geographic areas that are smaller than their higher-arterial counterparts, and offer connectivity to the higher-arterial system. In an urban context, they interconnect and augment the higher-arterial system, provide intra-community continuity, and may carry local bus routes. In rural settings, minor arterials should be identified and spaced at intervals that are consistent with population density so that all developed areas are within a reasonable distance of a higher-level arterial. In addition, minor arterials in rural areas are typically designed to provide relatively high overall travel speeds,

with minimum interference to through movement. The spacing of minor-arterial streets typically may vary from one-eighth- (1/8-) - to one-half- (1/2-) mile in the central business district and between two (2) and three (3) miles in the suburban fringes. Normally, the spacing should not exceed one (1) mile in fully developed areas.

**C. Major and Minor Collectors.**

Collectors serve a critical role in the roadway network by gathering traffic from local roads and funneling it into the arterial network. Within the context of functional classification, collectors are broken down into two (2) categories: major collectors and minor collectors. Until recently, this division was considered only in the rural environment. Currently, all collectors, regardless of whether they are within a rural area or an urban area, may be sub-stratified into major and minor categories. The determination regarding whether a given collector is a major or minor collector is frequently one (1) of the biggest challenges in functionally classifying a roadway network. In the rural environment, collectors generally serve primarily intra-county travel (rather than statewide) and constitute those routes on which, independent of traffic volume, predominant travel distances are shorter than on arterial routes. Consequently, more moderate speeds may be posted. The distinctions between major collectors and minor collectors are often subtle. In general, major-collector routes are longer in length, have lower connecting-driveway densities, have higher speed limits, are spaced at greater intervals, have higher annual average traffic volumes, and may have more travel lanes than their minor-collector counterparts. Careful consideration should be given to these factors when assigning a major or minor collector designation. In rural areas, annual average daily traffic and spacing may be the most significant designation factors. Since major collectors offer more mobility and minor collectors offer more access, it is beneficial to reexamine these two (2) fundamental concepts of functional classification. Overall, the total mileage of major collectors is typically lower than the total mileage of minor collectors, while the total collector mileage is typically one-third (1/3) of the local roadway network.

SUMMARY OF COMMENTS: The Missouri Department of Natural Resources' Air Pollution Control Program received two (2) comments on this rulemaking. The first comment was from Donna Zink. The comment made occurred during the public hearing for another rule, 10 CSR 10-6.060. Because the comment referenced this rule, the department will respond to the comment in this order of rulemaking. Donna Zink also provided the comment in written form after the public hearing. The second comment was from Sarah Schappe, Director of the Joint Committee on Administrative Rules.

COMMENT #1: Donna Zink commented, "I am in favor of the consolidation of fee requirements into one rule, but I have one concern with Part O of this rule (Vol. 50, No. 24, Page 1825). A federal instrumentality is not a federal agency. This term should be omitted, clarified or defined separately. Definitions should be clear and unambiguous to the extent possible. Combining federal agencies and institutionalities into a single term may create conflict or confusion when referenced for future questions regarding applicability and interpretation of regulations, both within the Air Quality division and by other departments within DNR. (This has happened in an unrelated instance.)"

RESPONSE: Subsection (2)(O) defines the term "Federal agency." The term "Federal agency" is used only once within the amended rule, in paragraph (2)(EE)3., which defines "Responsible official," specifically as it relates to individuals who are principal executive officers or ranking elected officials. Because subsection (2)(O) only defines a term found in another definition within this same rule, the subsection similarly does nothing to alter the stringency of this rule. Adding the definition serves only to clarify the term "Responsible official" to make the rule easier to understand. No changes were made to the rule text as a result of this comment.

COMMENT #2: A comment was received from Sarah Schappe, Director of the Joint Committee on Administrative Rules, requesting language to be added to incorporate 40 CFR 72.2 by reference in subsection (2)(A), and language be added to incorporate section 182(g)(1) and section 189(c)(1) of the Clean Air Act by reference in subsection (2)(V).

RESPONSE: Language was added to incorporate 40 CFR 72.2 by reference in subsection (2)(A) and language was added to incorporate section 182(g)(1) and section 189(c)(1) of the Clean Air Act by reference in subsection (2)(V).

**ORDER OF RULEMAKING**

By the authority vested in the Division of Alcohol and Tobacco Control under sections 311.520.5 and 311.660, RSMo Supp. 2025, the division amends a rule as follows:

**11 CSR 70-2.100 is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 2, 2026 (51 MoReg 21-22). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Division of Alcohol and Tobacco Control received one (1) comment on the proposed amendment.

COMMENT #1: Seth Hawkins with Anheuser-Busch made three suggestions for achieving the least impactful implementation for licensees and the division: first, noting that affixing individual invoices to monthly reports creates unnecessary friction for high-volume brewers and requesting that brewers be allowed to report American versus imported beer amounts on an aggregate basis within existing monthly reports; second, requesting that "case equivalents" be allowed as a unit of measure for reporting, in line with Anheuser-Busch's collective bargaining agreement; and finally, suggesting specific data fields for country of origin be added to the existing monthly reporting template to address the division's noted concern that inaccuracies in reporting could hinder the collection of appropriate taxes.

RESPONSE AND EXPLANATION OF CHANGE: The language of the regulation has been amended to clarify that reports do not need individually affixed invoices for each sale occurring within the preceding month. Concerning the use of “case equivalents” as a unit of measure, although the examples provided are more conventional imperial/metric quantities, we do not believe the language of the regulation as written precludes the use of “case equivalents” or similarly unique measurements, so long as such measure represents a single, discrete unit by which the total gallons may be calculated.

**11 CSR 70-2.100 Report of Brewers, Beer Manufacturers, Solicitors, and Beer Wholesalers**

(4) All reports required by this regulation certifying sales of malt liquor shall identify each invoice number for transactions occurring within that reporting period.

(A) Each invoice identified shall indicate the date the sale occurred, the amount of malt liquor shipped or delivered, the class of product shipped or delivered, and a notation clearly indicating whether the product is American manufactured or foreign import. For products designated as foreign import, the invoice must also note the country of origin.

(B) Each invoice shall separately state the total volume of both American manufactured and foreign import malt liquor, expressed as a single unit of measure (e.g., milliliters, liters, gallons, etc.).

(C) Licensees holding a microbrewery license, as authorized by section 311.195, RSMo, shall not be required to make the American manufactured designation or total volume specification on invoices.

**TITLE 20 – DEPARTMENT OF COMMERCE AND INSURANCE  
Division 2220 – State Board of Pharmacy  
Chapter 2 – General Rules**

**ORDER OF RULEMAKING**

By the authority vested in the State Board of Pharmacy under section 338.140, RSMo Supp. 2025, and section 338.280, RSMo 2016, the board amends a rule as follows:

**20 CSR 2220-2.200 Sterile Compounding is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 15, 2026 (51 MoReg 86-113). No changes have been made to the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The board received five (5) comments on the proposed amendment from Alison Smith, PharmD.

COMMENT #1: Dr. Smith submitted a comment suggesting the rule should not require cleaning of the buffer room as a mandatory part of a viable air sample remedial investigation. Dr. Smith suggested surface cleaning does not impact air quality and alternatively suggested the rule provide that cleaning of the buffer room “may be considered as part of the remedial investigation if it is likely to impact the source of the above action level” colony forming units (CFUs).

RESPONSE: Cleaning/disinfection is an important aspect of maintaining air quality and the board disagrees that cleaning/disinfection of surfaces does not impact air quality. Additionally, the requirement referenced is existing rule language. To ensure environmental quality and patient safety, no changes have been made to the rule amendment in response to the comment.

COMMENT #2: Dr. Smith suggested recertification of primary engineering controls (PECs) may be appropriate in the event of a failed air sample.

RESPONSE: Certification/recertification is a comprehensive event that usually requires the services of a qualified third-party vendor. Recertification may not be appropriate in all situations and the suggested change will likely result in additional licensee costs. The board believes the decision to recertify a PEC should be made on a case-by-case basis which is

consistent with existing rule language. No changes have been made in response to the comment.

COMMENT #3: Dr. Smith suggested that requiring additional monthly surface sampling is costly and unnecessary, if surface sampling has been conducted close to the required monthly sampling date as part of a remedial investigation.

RESPONSE: The requirement referenced is existing rule language and would not impose additional compliance requirements. To the extent Dr. Smith is recommending the rule allow licensees to delay surface resampling during a remedial investigation until the next monthly sampling date, the board disagrees. The board believes remedial investigations, corrective actions, and necessary resampling must occur as soon as possible to reduce risks and prevent inaction. To the extent the recommendation is to accept surface resampling from a remedial investigation as the required monthly sampling when the dates are in close proximity, this is currently allowed by board inspection staff and will remain an option after the amendment. No changes have been made in response to the comment; however, the board will educate licensees on rule allowances.

COMMENT #4: Dr. Smith suggested the board amend the requirement that pharmacies may only continue compounding after two consecutive monthly viable samples from the same buffer room location exceeds USP 797 action levels, if the beyond use date (BUD) assigned to all preparations is no greater than twenty-four (24) hours. Dr. Smith suggested "BUDs should be reduced during remedial investigations only for consecutive failed samples in the same location indicating a more long-term issue or problem that has not been resolved through daily cleaning."

RESPONSE: The requirement referenced is existing rule language. Additionally, reducing the BUD is in the best interest of public safety/patient protection, pending the outcome of remedial investigation results. No changes have been made in response to the comment.

COMMENT #5: Dr. Smith suggested clarifying licensee notification requirements and adopting a risk-based approach on when/which notifications are needed.

RESPONSE: The comment does not identify the requested notification/clarification changes. The board notes the amendment contains edits intended to clarify notification requirements based on feedback from licensees and the stakeholder sub-committee that assisted in drafting rule language. No changes have been made in response to the comment; however, the board will provide additional compliance materials and online resources to assist licensees in understanding the notification provisions. Compliance materials will be posted on the board's compliance resource page: <https://pr.mo.gov/pharmacists-publications-resources.asp>.

## TITLE 20 – DEPARTMENT OF COMMERCE AND INSURANCE

### Division 2220 – State Board of Pharmacy Chapter 2 – General Rules

#### ORDER OF RULEMAKING

By the authority vested in the State Board of Pharmacy under section 338.280, RSMo 2016, the board amends a rule as follows:

**20 CSR 2220-2.500 Nuclear Pharmacy – Minimum Standards**

for Operation **is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 15, 2026 (51 MoReg 114-121). No changes have been made to the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The board received one (1) comment on the proposed amendment from William Crisp, PharmD.

COMMENT #1: Dr. Crisp submitted a comment supporting the proposed amendment but recommended amending subsection (4)(G) to not include "full compounding documentation requirements to non-compounding activities such as dispensing or repackaging." Dr. Crisp suggested these activities are not required to meet USP Chapter 825, Section 9.2's documentation standards (e.g., master formulation record, associated compounding-level QC testing) and suggested the board adopt a similar approach to avoid unnecessary regulatory burden.

RESPONSE: The referenced requirement is existing rule language and would not impose additional compliance requirements. To verify compliance and ensure public protection, the board believes all manipulations should be documented in the pharmacy's records regardless of designation. No change has been made in response to the comment; however, the board will continue to monitor USP developments/changes for future board review.
