

This section will contain the final text of the rules proposed by agencies. The order of rulemaking is required to contain a citation to the legal authority upon which the order of rulemaking is based; reference to the date and page or pages where the notice of proposed rulemaking was published in the *Missouri Register*; an explanation of any change between the text of the rule as contained in the notice of proposed rulemaking and the text of the rule as finally adopted, together with the reason for any such change; and the full text of any section or subsection of the rule as adopted which has been changed from that contained in the notice of proposed rulemaking. The effective date of the rule shall be not less than thirty (30) days after the date of publication of the revision to the *Code of State Regulations*.

The agency is also required to make a brief summary of the general nature and extent of comments submitted in support of or opposition to the proposed rule and a concise summary of the testimony presented at the hearing, if any, held in connection with the rulemaking, together with a concise summary of the agency's findings with respect to the merits of any such testimony or comments which are opposed in whole or in part to the proposed rule. The ninety-(90-) day period during which an agency shall file its Order of Rulemaking for publication in the *Missouri Register* begins either: 1) after the hearing on the Proposed Rulemaking is held; or 2) at the end of the time for submission of comments to the agency. During this period, the agency shall file with the secretary of state the order of rulemaking, either putting the proposed rule into effect, with or without further changes, or withdrawing the proposed rule.

**Title 2—DEPARTMENT OF AGRICULTURE
Division 80—State Milk Board
Chapter 2—Grade “A” Pasteurized Milk Regulations**

ORDER OF RULEMAKING

By the authority vested in the State Milk Board under section 196.939, RSMo 2000, the board amends a rule as follows:

2 CSR 80-2.010 Definitions is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on June 1, 2016 (41 MoReg 727). No changes have been made in the text of the proposed amendment, so it is not reprinted here. The proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: No comments were received.

**Title 10—DEPARTMENT OF NATURAL RESOURCES
Division 20—Clean Water Commission
Chapter 6—Permits**

ORDER OF RULEMAKING

By the authority vested in the Clean Water Commission under section 640.710, RSMo 2000, and section 644.026, RSMo Supp. 2014, the Department of Natural Resources amends a rule as follows:

10 CSR 20-6.300 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on March 1, 2016 (41 MoReg 308-321). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed amendment was held April 6, 2016. The public comment period ended May 18, 2016. The Department of Natural Resources received three (3) comments on the proposed amendment at the public hearing and twelve (12) comments pertaining to the rule were received via email or letter.

COMMENT #1: Public Hearing - Mr. Robert Brundage, representing Missouri Pork Association and Missouri Agribusiness Association; -I have been involved with CAFO rulemaking since the first rule was enacted in 1996. There is a need to revise the regulations primarily in reaction to HB28. I would ask you to go ahead and move this regulation forward....there is a lot of confusion when you apply for a permit as you're required to do. Department staff has to decide which parts of the regulation do not apply anymore and, trying to explain that is very confusing. This will clarify the process and make it clear and better for department staff and everyone involved.

RESPONSE: No changes were made as a result of this comment.

COMMENT #2: Public Hearing - Ms. Leslie Holloway, representing Missouri Farm Bureau; - I want to talk about one specific provision of the proposed rule before you. This new language would require that applications for general operating permits be submitted at least ninety (90) days prior to the start of the operation, applications for site-specific operating permits to be submitted at least one hundred eighty (180) days prior to the start, and then application shall include at a minimum the following documents. The first item is that the title page of the engineering report or similar document include the name of the operation, date report was prepared, name and address of firm preparing report, seal and signature of the engineer, and a statement saying the project was designed in accordance with 10 CSR 20-8.300 and 10 CSR 20-6.300. The new language under 6.300 specifies that there would have to be the seal and approval from the engineer that says this facility was designed in compliance with the manure storage requirements.

RESPONSE AND EXPLANATION OF CHANGE: When HB28 was enacted the department developed a "Draft Operating Permit Process" which included the requirement of a P.E seal and statement saying the project was designed in accordance with 10 CSR 20-8.300 and 10 CSR 20-6.300. The purpose of this is to show compliance with section 644.051, RSMo, which requires all point sources to be designed by a P.E. registered in Missouri in accordance with the Commission's design rules, which in this case is 10 CSR 20-8.300. For this reason, the requirement has been included with this amendment to the regulation. As a result of this comment the language "and 10 CSR 20-6.300" has been removed. This amended rulemaking contains only operating permit requirement. Design requirements for CAFOs are in 10 CSR 20-8.300.

COMMENT #3: Public Hearing - Mr. Darrick Steen, representing Missouri Corn Growers Association and Missouri Soybean Association; - Today, I'm obviously here to provide some comment on behalf of those organizations in general in support of this proposed rulemaking, 10 CSR 6.300. As it's been mentioned, this particular rulemaking is in direct response to House Bill 28 which was signed by the governor in 2013. That made a number of very significant changes to the permit process for CAFOs. That has certainly created some confusion over the last three years for stakeholders and for permittees, as the law certainly says something quite different

than the regulations as it relates to certain types of permits, specifically construction permits. So to the extent that we can get this rule moving forward and on the books quickly, that would certainly be good for everyone involved, and we encourage that to happen. In general, I don't have any specific technical comments and would just like to encourage that the rule be approved in July at the next meeting.

RESPONSE: No changes were made as a result of this comment.

COMMENT #4: Mr. Stephen Jeffery proposed additional language to 10 CSR 20-6.300(3)(E) that reads, "Balance sheet and income statement for the applicant prepared by a certified public accountant showing the applicant has sufficient assets to serve as a continuing authority in accordance with 10 CSR 20-6.010(3)." This would require that any applicant for a CAFO operating permit submit a balance sheet and an income statement prepared by a certified public accountant as part of its application package. The purpose of requiring these commonly utilized financial documents is for the applicant to provide "proof" that it is financially viable to operate, maintain, and modernize its proposed CAFO facility, as required by the continuing authority rule, 10 CSR 20-6.010(3).

RESPONSE: No changes were made as a result of this comment. Continuing authority requirements are contained in 10 CSR 20-6.010. Discussions and any proposed revisions to continuing authority requirements would need be addressed during stakeholder meeting(s) for the revision of that regulation.

COMMENT #5: Missouri Pork Producers (MPA) - Mo. Reg. pg. 310, paragraph (1)(B)19. - "Process Wastewater" definition. The definition has a new sentence at the end concerning water that "comes into contact with raw materials, products or byproducts feed, milk, eggs, or bedding." Although this sentence is found in the federal definition of process wastewater, this sentence was purposely omitted by the commission during the last rulemaking to prevent stormwater coming into contact with incidental dust from the operations (such as dust from ventilation fans, from being considered process wastewater). "Therefore, we request this sentence not be included - or if it is included, an additional sentence be added to clarify that dust outside barns cannot be the source of process wastewater."

RESPONSE: No changes were made as a result of this comment. The language referred to in this comment is being added to make the definition of "process wastewater" consistent with the definition in the federal regulations. The department continually monitors and updates inspection protocols to include regulatory and procedural changes to the extent they pertain to compliance inspections. The department uses discretion in determining the source of discharges whether they are process wastewater or stormwater.

COMMENT #6: Missouri Pork Producers (MPA) - Mo. Reg. pg. 310, paragraph (1)(B)23. - Why is the definition "Waste Management System" being added? Where did the definition come from? Should it be limited to the production areas? Does it also apply to land application areas?

RESPONSE: No changes were made as a result of this comment. The definition is being added because the term is used in regulations and in CAFO general permit templates. The term was defined originally in the MOG010000 and MOGS10000 general permit templates in 2013 as a result of a public comment. The definition does apply to production areas and land application areas.

COMMENT #7: Missouri Pork Producers (MPA) - Mo. Reg. pg. 311, subsection (2)(D) - Exemptions. The exemptions in subsection (D) should be retained, especially the exemptions for pilot projects and minor piping changes. If the exemptions are being transferred to 6.010, the department should issue guidance that these exemptions are being maintained and will be valid even if there is lag time before 6.010 is revised to include these exemptions.

RESPONSE: No changes were made as a result of this comment. The exemption for pilot or demonstration projects is already contained in 10 CSR 20-6.010(1)(B)8. The construction activity exemptions that are being removed do not require construction permit in accordance with section 644.051, RSMo.

COMMENT #8: Missouri Pork Producers (MPA) - Mo. Reg. pg. 312, paragraph (2)(E)2. refers to the requirements for an operating permit application. In subparagraph (2)(E)2.A., it requires the title page of an engineering report sealed by an engineer and a statement indicating the project was designed in accordance with the design regulation 8.300 and 6.300. This requirement is inconsistent with the requirements set forth in section 644.051, RSMo. Revisions to this section enacted by H.B. 28 (2013) do not require engineering documents be submitted to the MDNR, nor does it require that the engineering documents be sealed prior to the application for an operating permit being submitted to the MDNR. Therefore, a CAFO operator could apply for the operating permit, get the operating permit and then hire an engineer to design the facility and seal the plans.

RESPONSE AND EXPLANATION OF CHANGE: An engineer's seal is required to show compliance with section 644.051, RSMo. The Form W - Concentrated Animal Feeding Operation (CAFO) Permit Application also has a place for the engineer's seal that will also meet this requirement. Engineering documents are not required to be submitted with a CAFO operating permit application. Section 644.051, RSMo requires, "Any point source system designed to hold, convey, contain, store or treat domestic, agricultural, or industrial process wastewater shall be designed by a professional engineer registered in Missouri in accordance with the commissions design rules." This requirement is needed to show compliance with this statute. A permit cannot be issued to a facility that is not in compliance with the Missouri Clean Water Law and regulations. As a result of this comment, the language in paragraph (2)(E)2.A. has been revised to provide clarification.

COMMENT #9: Missouri Pork Producers (MPA) - Mo. Reg. pp. 311-312, subsection (2)(E). Does the engineer's seal apply only to the title page referenced in subparagraph (2)(F)2.A? Does the engineer's seal apply to any other subsections (2)(E)2.B. through F? If so, clarify.

RESPONSE AND EXPLANATION OF CHANGE: The engineer seal is to show compliance with section 644.051, RSMo and 10 CSR 20-8.300. The requirements in subparagraphs (2)(E)2.B.-D. are included in 10 CSR 20-8.300. Subparagraphs (2)(E)2.E.-F. are requirements in 10 CSR 20-6.300 and do not require an engineer seal.

COMMENT #10: Missouri Pork Producers (MPA) - Mo. Reg. pg. 312, part (2)(E)2.E.(II) state no-discharge permit. This paragraph requires applicants for a state no-discharge permit to submit a nutrient management plan (NMP). This is partially inconsistent with the application that says "export only" facilities do not need to submit an NMP. Does 6.300 make it clear that a state no-discharge permitted CAFO may change its NMP at any time without a need to amend the permit, or undergo neighbor notice or public notice?

RESPONSE: No changes were made as a result of this comment. Part (2)(E)2.E.(II) requires submission of an NMP with an application for a "new" state no-discharge permit (MOGS10000). 10 CSR 20-6.300(3)(G)1. requires all permitted operations to develop and implement an NMP that meets the requirement in 10 CSR 20-6.300(5). The current version of Form W - Concentrated Animal Feeding Operation (CAFO) Permit Application states, "If the operation is export only, completing Parts 5-11 meets this requirement." 10 CSR 20-6.300(5) requires any revisions to the NMP must be submitted to the department for review with the changes from the previous version identified for National Pollutant Discharge Elimination System (NPDES) permits only. A public notice is required if the NMP revisions result in substantial changes to the terms of the NMP

incorporated into an NPDES operating permit.

COMMENT #11: Missouri Pork Producers (MPA) - Mo. Reg. pg. 312, paragraph (2)(F)4. requires submission of an NMP when renewing an NPDES operating permit. To be clear, submission of an NMP is required when renewing a state no-discharge is not required?

RESPONSE: No changes were made as a result of this comment. Submission of a NMP is not required with the renewal of a state no-discharge permit.

COMMENT #12: Missouri Pork Producers (MPA) - Mo. Reg. pg. 313. What is the MDNR trying to clarify by adding new text in paragraph (3)(B)2.?

RESPONSE: No changes were made as a result of this comment. When an operation expands but does not increase in class size, the buffer distance is only applicable to the new confinement buildings and new lagoons. The existing confinement buildings and lagoons complied with the buffer distance at the time they were initially permitted. If an operation expands to a larger class size the buffer distance of the larger class size is applicable to all new and existing buildings and lagoons unless they were in existence prior to June 25, 1996.

COMMENT #13: Missouri Pork Producers (MPA) - Mo. Reg. pg. 314. Are state no-discharge permitted CAFOs required to submit an annual report? The annual report section seems to only require an annual report for NPDES operating permits.

RESPONSE: No changes were made as a result of this comment. The requirement for state no-discharge permittees to submit an annual report is included in the permit. This issue can be addressed during the next renewal of the MOGS10000 master general permit template, which expires on January 27, 2018.

COMMENT #14: Missouri Pork Producers (MPA) - Mo. Reg. pg. 315, paragraph (4)(A)2. This paragraph should be deleted. No-discharge operations do not have subsurface discharge so effluent limitations are not applicable.

RESPONSE: No changes were made as a result of this comment. The definition of "Waters of the state" in 10 CSR 20-2.010(82) includes both surface and subsurface waters. Any discharge to waters of the state that are not allowed for by an NPDES permit is a violation of Water Quality Standards and subject to compliance and enforcement actions.

COMMENT #15: Missouri Pork Producers (MPA) - General comment. Does 6.300 make it clear what the NMP requirements are for an export only facility? The MDNR has considered parts of the application to satisfy some of the NMP requirements. This may not be clear.

RESPONSE: No changes were made as a result of this comment. 10 CSR 20-6.300(3)(G)1. requires all permitted operations to develop and implement an NMP that meets the requirement in 10 CSR 20-6.300(5) and to incorporate the requirements in (3)(G)2., which is only required when manure, litter, or process wastewater is applied to land application areas as defined in 10 CSR 20-6.300(1)(B)13. Export only operations do not apply to land application areas. Therefore, their NMP is not required to comply with paragraph (3)(G)2. or subsections (G), (H), and (I) of 10 CSR 20-6.300(5).

COMMENT #16: Missouri Pork Producers (MPA) - General comment. The draft regulation seems to delete all references to a construction permit. What about CAFOs that propose to construct an earthen storage basin? What are the construction permit requirements?

RESPONSE: No changes were made as a result of this comment. All references to construction permit application requirements have been moved to 10 CSR 20-8.300. CAFOs that plan to construct an earthen basin are required to obtain a construction permit in accordance with

10 CSR 20-8.300.

10 CSR 20-6.300 Concentrated Animal Feeding Operations

(2) Applicability and Application for Coverage.

(E) Operating Permit Applications. This section describes the application process and requirements for CAFO operating permits. A separate application for each operating location must be submitted to the department.

1. The department will not examine the adequacy or efficiency of the structural, mechanical, or electrical components of the waste management systems, only adherence to rules and regulations. The issuance of permits will not include approval of such features.

2. Applications for general operating permits should be submitted at least ninety (90) days prior to the start of operation. Applications for site-specific operating permits shall be submitted at least one hundred eighty (180) days prior to the start of operation. The application shall include at a minimum the following documents:

A. Title page of engineering report or similar document sealed by a professional engineer including name of the operation, date the report was prepared, name and address of firm preparing the report, seal and signature of the engineer, and a statement indicating the project was designed in accordance with 10 CSR 20-8.300;

B. Narrative project summary. This shall describe the existing and any proposed modifications to operating conditions including the number of confinement buildings or areas, the total design capacity in animal units and actual animal numbers for each type of animal, and an explanation of the existing and/or proposed modifications to the waste management system;

C. Include the amount of manure generated annually, storage volume, and days of storage of all manure storage structures, including mortality composters;

D. A recent aerial or topographic map showing the extent of the production area including;

(I) All existing and proposed confinement buildings, open lots, manure storage structures;

(II) Surface waters and areas subject to a one hundred (100) year flood event within or adjacent to the production area; and

(III) Production area setback distances in accordance with 10 CSR 20-8.300(5)(B);

E. Nutrient Management Plan—

(I) NPDES permit – applications shall include the operations' nutrient management plan; or

(II) State no-discharge permit – applications for a new permit shall include the operations' nutrient management plan;

F. Applications for Class I CAFOs shall also include:

(I) An aerial or topographic map that meets the requirement of 10 CSR 20-6.300(3)(C)4.;

(II) Proof of neighbor notice to all parties listed in 10 CSR 20-6.300(3)(C)2.

3. For renewal of NPDES operating permits, a copy of the operations nutrient management plan shall be submitted if it has not previously been submitted.

4. When an application is submitted incomplete or any of the required permit documents are deficient, or if additional information is needed including, but not limited to, engineering design plans, the department will act in one (1) of the following ways:

A. The department may return the entire permit application back to the applicant for re-submittal; or

B. The applicant and/or the applicant's engineer will be notified of the deficiency and will be provided time to address department comments and submit corrections. Processing of the application may be placed on hold until the applicant has corrected identified deficiencies.

5. Applicants who fail to correct deficiencies and/or fail to satisfy all department comments after two (2) certified department comment letters shall have the application returned as incomplete and the permit fee(s) shall be forfeited. The department will grant reasonable

time extensions when the applicant requests additional time to respond to department comments, however, such requests must be in writing and must occur within the time frame set by the department.

6. When the department has received all documents and information necessary for a properly completed operating permit application, including appropriate permit fees, the department will, review the application and said documents for compliance with this regulation and 10 CSR 20-8.300 and, if met, act in one (1) of the following ways:

A. For an operation seeking coverage under the state no-discharge general operating permit the department will issue the state no-discharge general operating permit; or

B. For an operation seeking coverage under the NPDES operating permit the department will post for fifteen (15) days on the department's webpage a notice of the pending CAFO NPDES permit. The notice will include an announcement of the opportunity for public review and comment on the CAFO's nutrient management plan and draft NPDES permit. The department will consider all comments before issuing the operating permit.

**Title 10—DEPARTMENT OF NATURAL RESOURCES
Division 20—Clean Water Commission
Chapter 8—Design Guides**

ORDER OF RULEMAKING

By the authority vested in the Clean Water Commission under section 644.026, RSMo Supp. 2014, the Clean Water Commission amends a rule as follows:

10 CSR 20-8.300 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on March 1, 2016 (41 MoReg 322-331). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing was held on the proposed amendment on April 6, 2016. The public comment period ended on May 18, 2016. At the public hearing the Missouri Department of Natural Resources (department) staff explained the proposed amendment. Comments were provided by Robert Brundage (Newman, Comley & Ruth P.C., Missouri Pork Producers), Darrick Steen (Missouri Soybean Association and Missouri Corn Growers Association), and Stephen Jeffrey (Jeffrey Law Group LLC, Hickory Neighbors). Samuel Leake (Clean Water Commissioner) also noted a math error in the proposed fiscal note.

COMMENT #1: Robert Brundage expressed his general support for the amendment and asked that the rulemaking move forward.

RESPONSE: The department appreciates the support. No change has been made as a result of this comment.

COMMENT #2: Commissioner Leake questioned the language in paragraph (5)(B)5. regarding excluding runoff "whenever possible," noting that the requirement was unclear. In response to this question, Darrick Steen explained that the intent of the rule was to avoid adding this additional water to the lagoon wherever practical and if the water is not excluded then this volume will have to be managed.

RESPONSE AND EXPLANATION OF CHANGE: To make sure the rule is clear, language in (5)(B)5. was revised so that the diversion of stormwater from entering the lagoon is clear.

COMMENT #3: The Missouri Pork Association suggested that valves not be required for gravity piping that serve flow into the basin.

RESPONSE AND EXPLANATION OF CHANGE: The proper design of this piping does not require valves for gravity piping that flows into the basin. Rule language was added to subsection (6)(O) to make this clear.

COMMENT #4: The Missouri Pork Association recommended that the minimum pipe slope of one percent (1%) be replaced with minimum slope requirements based on the size of the pipe being installed. **RESPONSE AND EXPLANATION OF CHANGE:** The department has changed the rule to be consistent with guidance elsewhere in Chapter 8. Paragraph (10)(B)1. has been revised to require a minimum pipe slope in gravity pipelines of 1 for 4-inch pipe, 0.6 for 6-inch pipe, and 0.4% for 8-inch pipes.

COMMENT #5: Stephen Jeffrey recommended amending section (4) to require certification from a licensed professional engineer that the production area be protected from inundation by the 100-year flood; that any structure relied upon to provide such protection will not result in an increase of more than one (1) foot in the base flood elevations; and that the lowest floor in structures located within 300 feet of a special flood hazard area be located at or above the base flood elevation.

RESPONSE: The suggested change is not within the scope of this rulemaking. The changes to section (4) in the proposed rule amendment were limited to rule re-numbering and the deletion of an unnecessary phrase. The issues regarding inundation were not discussed in stakeholder meetings nor raised prior to public hearing. This comment may be considered in future rulemakings.

COMMENT #6: The Missouri Pork Association suggested removing a reference to the "Hog Bill" from subsection (1)(A).

RESPONSE: No changes to section (1)(A) were proposed. Therefore, no changes to the language are possible because it is beyond the scope of this rule amendment. The rule properly mentions the appropriate statute and the removal of the reference to the "Hog Bill" may be considered in future rule revisions.

COMMENT #7: The Missouri Pork Association questioned why the definition of the Nutrient Management Technical Standard (NMTS) was deleted.

RESPONSE: No change has been made as a result of this comment. The NMTS is a document that has been approved by the CWC and is incorporated by reference in 6.300. It is not a design requirement but provides guidance to developing a nutrient management plan.

COMMENT #8: The Missouri Pork Association questioned the need for so many new definitions.

RESPONSE: The new definitions were proposed to help clarify design requirements, are necessary for permit application review, and needed for the department's permit tracking system. In many cases they were added so that applicants would be clear about particular elements that need to be included as part of their application or are specifically needed for permit review. No changes were made to the rule as a result of this comment.

COMMENT #9: The Missouri Pork Association suggested changing the wording in (2)(D) from "obstruct" to "discourage".

RESPONSE: No changes to section (2)(D) were proposed. Therefore, no changes to the language are possible because it is beyond the scope of this rule amendment. The suggested change would serve to improve the clarity of the rule and this comment may be considered in future rule revisions.

COMMENT #10: The Missouri Pork Association suggested defining the term "earthen basin" including that they are not structures that hold stormwater, process wastewater, nor are they secondary containment structures.

RESPONSE: This term "earthen basin" is broadly applicable to

structures that are constructed from soils or other native materials. No changes were made to the rule as a result of this comment.

COMMENT #11: The Missouri Pork Association questioned the purpose of requiring soils information and the effect on design and operation.

RESPONSE: Soils information is needed to determine the suitability and limitations that exist for the design and construction of certain structures. Soils information, as prepared by USDA-Natural Resources Conservation Service, is readily available from various sources at no charge. No change was made to the rule as a result of this comment.

COMMENT #12: The Missouri Pork Association questioned why “(4) Revisions to Approved Plans” was deleted.

RESPONSE: The process by which construction permits are obtained is detailed in sections (2) and (4) of 10 CSR 20-6.010 Construction and Operating Permits. Deviations from the design requirements and construction permit application revisions are specifically addressed in 10 CSR 20-6.010. The revised proposed purpose statement for 10 CSR 20-8.300 specifically mentions deviations. For these reasons, section (4) was found to be redundant and not necessary. No changes were made to the rule as a result of this comment.

COMMENT #13: The Missouri Pork Association questioned what the differences are between waste treatment and storage lagoons.

RESPONSE: Lagoons are classified based on their storage capacity; storage lagoons have a minimum capacity of one hundred eighty (180) days storage period, waste treatment lagoons have a minimum capacity of three hundred sixty-five (365) day storage period. No changes were made as a result of this comment.

COMMENT #14: The Missouri Pork Association proposed changing the wording in (5)(B)5. from “exclude” to “divert” and renumbering within this section

RESPONSE AND EXPLANATION OF CHANGE: The suggested language change was made. The new language makes the intention of this provision clearer. The numbering of the rule has also been changed according to acceptable rulemaking practice.

COMMENT #15: The Missouri Pork Association questioned the purpose of adding the safety requirement to section (7) and suggested being more specific in regards to safety design or eliminating it from this rule since the Occupational Safety and Health Act regulates safety, not the department.

RESPONSE: It is prudent to consider safety issues at the time of design, and there have been times that department engineers have noticed opportunities to improve the safety of a design that was found to be helpful. This element was included in the proposed rule language based on a suggestion made by a stakeholder. There are no specific requirements, e.g. for fencing lagoons, other than addressing safety at each site as needed per structure type. No changes were made to the rule as a result of this comment.

COMMENT #16: The Missouri Pork Association suggested that the 300 foot setback distance from water supply wells be from “down-gradient” wells.

RESPONSE: This requirement is found in section (2) of 10 CSR 23-3.010 Location of Wells. To be consistent, the general 300 foot setback distance has been retained.

COMMENT #17: The Missouri Pork Association recommended using the term “earthen basin” consistently throughout the rule and asked for the source of the added definitions for manure storage structure, safety volume, storage lagoon, total storage capacity, treatment volume, waste treatment lagoon, wastewater, and wastewater flow.

RESPONSE AND EXPLANATION OF CHANGE: References to earthen storage structures have been changed to earthen basin and the term “manure storage structure” has been used consistently throughout the rule. The new definitions are for clarity for engineers in what information is needed in their designs.

COMMENT #18: The Missouri Pork Association suggested that the introductory paragraph in section (3) is confusing with respect to applicability.

RESPONSE AND EXPLANATION OF CHANGE: Language was added to sections (2) and (3) to add clarity. In accordance with section 644.051, RSMo construction permits are only required for facilities that are constructing earthen basins. However, new facilities that do not involve the construction of earthen basins are still required to follow all of the design requirements in 10 CSR 20-8.300. For those applicants that are not constructing an earthen basin and do not need to obtain a construction permit, 10 CSR 20-6.300 Concentrated Animal Feeding Operations is being concurrently amended to require that the operating permit application includes a professional engineer’s certification that the facility has been designed in accordance with the requirements of 10 CSR 20-8.300.

COMMENT #19: The Missouri Pork Association recommended defining the term “when applicable” in (3)(B)2. and stated that the Missouri Geological Survey is not qualified to give engineering advice, therefore applicants should not have to incorporate their recommendations in their plans.

RESPONSE AND EXPLANATION OF CHANGE: The Missouri Geological Survey does not provide engineering advice. They do, however, identify site limitations upon which structures may be constructed. Language was added to the rule to make it clear that the engineering plans must be developed using the full consideration of the site limitations that are provided by the Missouri Geological Survey when they conduct a hydrogeologic evaluation.

COMMENT #20: The Missouri Pork Association requested there be a discussion added to section (7) on how to appeal an evaluation from the Missouri Geological Survey and questioned when the Water Protection Program can ignore, amend, or revise the geohydrologic evaluations.

RESPONSE: Hydrogeologic evaluations prepared by the Missouri Geological Survey are not final actions by the department. These evaluations can be appealed as part of a final permit action, whether it involves the appeal of a permit or the appeal of a permit denial. 10 CSR 20-6.020 Public Participation, Hearings and Notice to Government Agencies includes provisions regarding permit appeals.

COMMENT #21: The Missouri Pork Association suggested that DNR not require operation and maintenance plans since nutrient management plans are substantially equivalent to an operation and maintenance plan.

RESPONSE: Detailed nutrient management plans are not required for facilities that export all wastewater. Whereas there is some potential overlap, the NMP is related to protecting water quality whereas the O&M plan pertains to operating and maintenance procedures of the facility. No change was made to the rule as a result of this comment.

COMMENT #22: The Missouri Pork Association noted that DNR does not have the authority to regulate stockpiling in fields and that it is an operational requirement rather than a design requirement.

RESPONSE: It is appropriate for the regulation to include provisions that regulate the temporary stockpiling of dry process waste when an applicant knows or anticipates that their design will involve this stockpiling. The regulation specifies a number of design criteria including setback distances and slope requirements. There were no changes made to the rule as a result of this comment. It is important to note that there will be times that temporary stockpiles of dry waste

may have to be accommodated after a facility has been constructed. In these cases the operational requirements of 10 CSR 20-6.300 will apply, along with any specific permit conditions.

COMMENT #23: Commissioner Samuel Leake noted a math error in the fiscal note. This error was a multiplication mistake in the cost savings portion of the note.

RESPONSE AND EXPLANATION OF CHANGE: This error has been corrected and the revised fiscal note will appear at the end of the final order of rulemaking.

10 CSR 20-8.300 Manure Storage Design Regulations

(1) Definitions.

(B) Other applicable definitions are as follows:

1. Design storage period—The calculated number of days that will fill the manure storage structure from the lower to the upper operating level for a covered storage structure or from the lower to the upper operating level for an uncovered, liquid storage structure during a period of average rainfall minus evaporation (R-E).

A. For a design storage period of fewer than three hundred sixty-five (365) days, the largest consecutive average monthly R-E, corresponding with the number of months of the storage period, shall be used.

B. For multiple storage stages, the storage period is the sum of available storage days in each stage.

C. For covered liquid manure storage structures, the upper operating level is one foot (1') below the top of the structure;

2. Freeboard—The elevation difference between the bottom of the spillway to the top of the berm for an earthen basin;

3. Groundwater table—The seasonal high water level occurring beneath the surface of the ground, including underground water-courses, artesian basins, underground reservoirs and lakes, aquifers, other bodies of water located below the surface of the ground, and water in the saturated zone. For the purposes of this rule, groundwater table does not include the perched water table;

4. Manure—The fecal and urinary excretion of animals;

5. Manure storage structure—A fabricated structure or earthen basin used to store manure, litter, and/or process wastewater;

6. Rainfall minus evaporation (R-E)—The average depth of monthly liquid precipitation minus evaporation as published in the most recent *National Weather Service Climate Atlas* for the geographical region of the proposed structure;

7. Safety depth—One foot (1') of liquid depth or the depth needed to hold the volume of the ten- (10-) year, ten- (10-) day storm, whichever is greater;

8. Solid manure—Manure that can be stacked without free flowing liquids;

9. Safety volume—The volume of wastewater stored between the upper pumpdown and emergency spillway crest;

10. Storage lagoon—A lagoon that does not have adequate volume to accomplish treatment;

11. Storage volume—The volume of manure, runoff, washwater, rainfall, and additional water sources between the lower and upper operating levels;

12. Ten- (10-) year, ten- (10-) day storm—The depth of rainfall occurring in a ten- (10-) day duration over a ten- (10-) year return frequency as defined by the most recent publication of the *National Weather Service Climate Atlas* for the geographical region of the proposed manure storage structure;

13. Total storage capacity—The combined volume of storage and safety volumes stored between the lower pumpdown level and emergency spillway crest;

14. Treatment volume—The permanent volume maintained below the lower pumpdown designed for anaerobic treatment of manure based on latitude;

15. Waste treatment lagoon—A lagoon that is sized to have three hundred sixty-five (365) days of storage volume and adequate treat-

ment volume;

16. Wastewater—A combination of manure, washwater, runoff, rainfall, and process wastewater; and

17. Wastewater flow—The annual rate of wastewater contributed to an animal waste management system.

(2) General.

(A) Applicability. This rule shall apply to all new or expanding Concentrated Animal Feeding Operations (CAFOs), however, only those applicants that are constructing earthen basins need to obtain construction permits.

(3) Permit Application Documents. Applicants for a construction permit for earthen basins shall include one (1) set of documents described in this section for department approval as part of the construction permit application process. Applicants who are not constructing earthen basins and are seeking an operating permit shall develop and maintain these documents and submit those required in 10 CSR 20-6.300. The engineering documents shall provide the basic information, present design criteria and assumptions, examine alternate systems, where appropriate, and provide plans and specifications. The documents shall also include process description, sizing, data, controlling assumptions, and considerations for the functional operation of an animal waste management system. All engineering documents shall be prepared by or under the direct supervision of a registered professional engineer licensed to practice in Missouri. The department will not examine the adequacy or efficiency of the structural, mechanical, or electrical components of the animal waste management systems, only adherence to rules and regulations.

(A) Engineering report—The following paragraphs list requirements for the content of the project engineering report to be submitted to the department for review and approval:

1. Title page. Title of project, date, operation's name and address, name and address of firm preparing the report, and seal and signature of the engineer;

2. Project location map. This map shall include state and county roads, county boundaries, and city boundaries, and show the location of the proposed project;

3. Narrative project summary. Provide an explanation of any existing conditions at the operation and a summary of the proposed modifications to the operation;

4. Summary of design. This section should include the design data, calculations, all assumptions, and all relevant information used to justify the design. If the engineering documents contain known deviations from the design criteria contained in this rule, documentation and justification for the deviation should be submitted with the design criteria. The following items should be included:

A. Each animal type and number within the production area, the maximum design animal capacity, and the average weight for each animal type;

B. A detailed explanation of the process by which manure is deposited, handled, managed, and transferred within the operation;

C. Calculations showing the estimated annual amount of manure generated at the production area and wastewater flows with average rainfall. Where possible, design manure volume shall be based on past operating records or operating data from facilities with similar feed inputs and animal characteristics. Documentation of these volumes shall be included. If operating data is not available, the design manure volume shall be estimated using the most recent edition of a research based reference. The reference name, edition, and data shall be included;

D. Design calculations justifying the size of manure storage structures. This includes safety volume, storage volume, total storage capacity, design storage period, and treatment volume. For waste treatment lagoons, the volume of treatment shall be based on the geographical region of the proposed structure and calculated using the most recent edition of a research-based reference. The reference name, edition, and data shall be included;

E. Stage-storage tables on at least one-foot (1') increments for all earthen basins with design operating depths (elevation of lower and upper pumpdown levels) shall be clearly identified;

F. Collection, treatment, and disposal of all domestic wastewater flows associated with the operation; and

G. If applicable, justifications for constructing an uncovered manure storage structure. Covered storages are preferred due to the lower risk of environmental damage from excessive rainfall;

5. Soils report/soils information. The engineering report shall contain county soil survey information for the soil types and characteristics of the production areas. Unless required otherwise by the department, soils information shall include soil series name, soil textural class, and physical properties and water features for earthen basins and solid manure components. The soils map shall show approximate boundaries of the different soils. When applicable, the design of all structures shall be sufficient to address the site limitations identified by the Missouri Geological Survey and should be discussed in the engineering report. Any soil boring or test pit logs shall also be included in the report; and

6. Operation and maintenance plan—An operation and maintenance plan shall be provided to explain the key operating procedures. At a minimum, the plan shall address operation and maintenance of mechanical equipment.

(B) General layout drawings. Plans shall include both an aerial and a topographic map or drawing that shows the spatial location and extent of the production area. Each drawing or map must be easily readable and include a visual scale, preferably one inch (1") per one thousand feet (1,000'), a north directional arrow, a fixed geographic reference point, and the date the drawing or map was completed. Each drawing or map shall include the following:

1. All confinement barns, open lots, manure storage, and control structures, along with the other various components of the operation such as areas designated for stockpiling, composting, and for the management of animal mortalities;

2. The source of the operation's water supply and all wells within three hundred feet (300') of the production area; and

3. The location of all surface water features within the boundaries or immediately adjacent to the production area.

(C) Construction plan drawings. Plan drawings shall include the following:

1. The name of the operation and the scale in feet, a graphic scale, a north directional arrow, and the signed and dated engineer's seal;

2. The plans shall be clear and legible. They shall be drawn to a scale which will permit all necessary information to be plainly shown. The size of the plans generally should not be larger than thirty inches by forty-two inches (30" × 42"), with a preference for smaller sizes;

3. Locations of all test borings with date shall be shown on the plans;

4. Detail plans shall consist of plan views, elevation views, profiles, sections, and supplementary views which, together with the specifications and general layouts, provide the working information for the construction of the containment facilities; and

5. Include dimensions and relative elevations of manure storage structures, the location of components of the animal waste management system, alignment and size of piping, and profiles of piping with grades.

(D) Specifications. When specifically directed by the department, technical specifications shall accompany the plans.

(4) Location.

(C) Distances from earthen basins shall be measured from the outside edge of the top of the berm.

(5) Manure Storage Structure Sizing.

(B) Design Storage Period.

1. The recommended design storage period is three hundred

sixty-five (365) days.

2. The minimum design storage period for liquid manure, solid manure, and dry process waste to be land applied is one hundred eighty (180) days.

3. Solid manure and dry process waste to be sold or used as bedding shall have a minimum design storage period of ninety (90) days unless justification is given for a shorter time period.

4. The minimum design storage period for waste treatment lagoons without an impermeable cover is three hundred sixty-five (365) days.

5. Stormwater runoff from the production area will be diverted from lagoons as possible.

(6) Construction of Earthen basins.

(O) Piping. Piping through the lagoon berm shall be located at a point of minimum fill, preferably on cut slope, and must be valved. Valves are not required on gravity piping into the lagoon.

(10) Design and Construction of Pipelines, Pump Stations, and Land Application Systems.

(B) Gravity Pipelines.

1. The minimum slope for a gravity pipe installation is one percent (1%) for four inch (4") pipe, six-tenths percent (0.6%) for six inch (6") pipe, and four-tenths percent (0.4%) for eight inch (8") pipe.

2. Clean-out access shall be provided for gravity pipelines at a maximum interval of three hundred feet (300') unless an alternative design is approved. Gravity pipelines shall not have horizontal curves or bends except minor deflections (less than ten (10) degrees) in the pipe joints unless special design considerations are used.

3. Gravity discharge pipes used for emptying a storage/treatment structure shall have a minimum of two (2) gates or valves in series, one (1) of which shall be manually operated.

REVISED PRIVATE COST: The aggregate net cost increase was estimated to be ten thousand one hundred thirty dollars (\$10,130) versus seven thousand nine hundred seventy dollars (\$7,970), which was submitted with the original proposal.

FISCAL NOTE

PRIVATE COST

I. RULE NUMBER

Rule Number and Name	<i>10 CSR 20-8.300 Manure Storage Design Regulations</i>
Type of Rulemaking	<i>Proposed Rule Amendment</i>

II. SUMMARY OF FISCAL IMPACT

Estimate of the number of entities by class which would likely be affected by the adoption of the proposed rule:	Classification by types of the business entities which would likely be affected:	Estimate in the aggregate as to the cost of compliance with the rule by the affected entities:
One facility per year	541330 Engineering services 112112 Cattle Feedlots 112210 Hog and Pig Farming 112420 Goat Farming 112410 Sheep Farming 112120 Dairy Cattle and Milk Production 112320 Broilers and Other Meat Type Chicken Production 112310 Chicken Egg Production 112330 Turkey Production 112340 Poultry Hatcheries 112390 Other Poultry Production 112920 Horses and Other Equine Production	\$10,130 increase

III. WORKSHEET

The revisions to 10 CSR 20-8.300 *Manure Storage Design Regulations* will:

- 1) improve and add several definitions
- 2) clarify regarding the items required in an application for engineering review
- 3) remove nutrient management plan requirements that are redundant with the requirements of 10 CSR 20-6.300 *Confined Animal Feeding Operations*
- 4) change design requirements for lagoons
- 5) make a name change of Missouri Geological Survey

COST SAVINGS:

Fewer hours needed for preparing application/plans

$$2 \text{ hours/application} \times \$120.00/\text{hour (engineering fee)} \times 1 \text{ application} = \$240 \text{ savings}$$

COST INCREASES:

Increased number of yards needed in lagoon berms

$$17,000 \text{ cubic yards} \times 0.2 \times \$ 3.05/\text{cy} \times 1 \text{ application} = \$10,370 \text{ increased cost}$$

TOTAL COST INCREASES	\$10,370
<u>TOTAL COST SAVINGS</u>	<u>\$ 240</u>
TOTAL NET COST INCREASE	\$10,130

IV. ASSUMPTIONS

1. An annualized aggregate cost of this rulemaking is used for the purposes of providing the aggregate cost for the life of the rule. The annualized aggregate cost is the agency estimate of the average costs that will be incurred in any future year, no matter how far distant. For convenience of calculating this fiscal note over a reasonable time period, the life of the rule is assumed to be indefinite. If the life of the rule extends beyond 1 year, the annual costs for additional years will be consistent with the assumptions used to calculate annual costs as identified in this fiscal note.
2. The number of animal waste lagoons being constructed has dropped in the last 20 years with the industry standard for swine facilities changing to the use of deep pit systems. This trend may see a reversal with the increased interest in biogas collection from covered lagoons.

Lagoons are commonly used on dairy operations however we receive very few construction permit applications for new or expanding dairies. Therefore no additional applications are calculated in for dairy. At this point we only anticipate receiving 1 application per year for a lagoon or lagoon system from the integrators.

3. With fewer requirements in the engineering report, the engineer will use 2 fewer hours to complete the design. Engineering fees are based on a Deltek Axiom 2011 survey median for engineering billing rates <https://www.axium.com/blog/architecture-and-engineering-billing-rate-trends/>.
4. Top widths will increase by at least two times based on fill heights. This increase will increase the total yardage in lagoon berms by a factor of 0.2. An average yardage value of 17,000 cy was used at a construction rate of \$3.05 per cubic yard. This cost was gleaned from data collected annually by the NRCS.
5. The net cost of compliance was calculated without applying a factor for inflation.

**Title 19—DEPARTMENT OF HEALTH
AND SENIOR SERVICES
Division 30—Division of Regulation and Licensure
Chapter 40—Comprehensive Emergency Medical Services
Systems Regulations**

ORDER OF RULEMAKING

By the authority vested in the Missouri Department of Health and Senior Services under sections 190.131 and 190.185, RSMo Supp. 2013, the department amends a rule as follows:

19 CSR 30-40.331 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on April 15, 2016 (41 MoReg 495-496). Changes have been made in the text of the proposed amendment, so it is reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Department of Health and Senior Services received eleven (11) comments.

COMMENT #1: Dr. Lynthia B. Andrews, Chair of the State Advisory Council on Emergency Medical Services; Frank Foster; Virginia Wilson, President of the I/C Society; Shane Lockard, President of the Missouri Ambulance Association; Brad Mason with the Mid-America Regional Council Emergency Rescue; Ruby Mehrer, President of the Missouri Emergency Medical Services Association; B. Scott Roy, President of the Ambulance District Association of Missouri; Charles Doss; Bryant Gladney with the Boone County Fire Protection District; George W. Hatch, Jr. with the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions; and Terisa M. McGinnis with the Central Jackson County Fire Protection District request that the department allow the training entities to individually assess the EMT-Intermediate and EMT-Paramedic students' military training and award these students advanced placement credit for competencies they have already demonstrated. These individuals and entities believe this type of advanced placement would be consistent with that used in higher education and as allowed for by the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions. The Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions requires all programs accredited by it to have a policy on advanced placement, transfer of credits, and credits for experiential learning. The National Registry of Emergency Medical Technicians requires all paramedic examination candidates who test with it to have graduated from an institution accredited by the Commission on Accreditation of Allied Health Education Programs or one that is seeking accreditation sponsored by the Commission on Accreditation of Allied Health Education Programs. Currently, the only nationally recognized accreditation available for Emergency Medical Services education is through the Commission on Accreditation of Allied Health Education Programs' Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions. Brad Mason with the Mid-America Regional Council Emergency Rescue specifically requests for the department to use the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions' definition of Advanced Placement.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees and has made this change to 19 CSR 30-40.331 by incorporating the advanced placement language for EMT-Intermediate or EMT-Paramedic students who are current or past members of the United States Armed Forces including National Guard and Reserves. The department has also included the definition of advanced placement that has already been created by the Committee on

Accreditation of Educational Programs for the Emergency Medical Services Professions. The department has omitted the language allowing for EMT-Intermediate or EMT-Paramedic students who are current or past members of the United States Armed Forces including National Guard and Reserves to take final written and practical examinations from training entities for the EMT-Intermediate or EMT-Paramedic programs. The department has also omitted the language allowing EMT-Intermediate or EMT-Paramedic students who are current or past members of the United States Armed Forces including National Guard and Reserves to be required to take half of the number of hours of clinical experience in a clinical setting with a Missouri licensed ambulance service and half of the required number of clinical hours in a health care facility.

COMMENT #2: Dr. Lynthia B. Andrews, Chair of the State Advisory Council on Emergency Medical Services; Frank Foster; Virginia Wilson, President of the I/C Society; Shane Lockard, President of the Missouri Ambulance Association; Brad Mason with the Mid-America Regional Council Emergency Rescue; Ruby Mehrer, President of the Missouri Emergency Medical Services Association; Charles Doss; Bryant Gladney with the Boone County Fire Protection District; and Terisa M. McGinnis with the Central Jackson County Fire Protection District are concerned that the department issuing a state license to EMT-Intermediates and EMT-Paramedics who have successfully passed the required final written and practical examinations and the clinical hours and experience will not make them as easy to be employed as those EMT-Intermediate and EMT-Paramedic students who have passed the National Registry of Emergency Medical Technicians' examination and become certified by the National Registry of Emergency Medical Technicians. These individuals and entities are also concerned that a license issued by the department will not be as easy for the EMT-Intermediate and EMT-Paramedic students who successfully passed the required final written and practical examination and the clinical hours and experience to relocate to other states since they do not have a certification with the National Registry of Emergency Medical Technicians. These individuals and entities would like the EMT-Paramedic and EMT-Intermediate students to be able to qualify to sit for the National Registry of Emergency Medical Technicians' examination in order to be certified by the National Registry of Emergency Medical Technicians instead of having only a "second class" license from the department without the National Registry of Emergency Medical Technicians' certification. Dr. Andrews, Chair of the State Advisory Council on Emergency Medical Services, believes that the successful passage of the National Registry exam ensures qualified EMT-Paramedics into the job market. Dr. Andrews, Chair of the State Advisory Council on Emergency Medical Services, believes that EMT-Intermediates and EMT-Paramedics will also want to further their education to gain a National Registry of Emergency Medical Technicians' certification.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees and has made this change to 19 CSR 30-40.331 by incorporating the advanced placement language for the EMT-Intermediate or EMT-Paramedic students who are current or past members of the United States Armed Forces including National Guard and Reserves. This advanced placement language will allow the EMT-Intermediate or EMT-Paramedic students to be able to sit for the National Registry of Emergency Medical Technicians examinations and apply for certification as an EMT-Intermediate or EMT-Paramedic from the National Registry of Emergency Medical Technicians.

COMMENT #3: Virginia Wilson, President of the I/C Society requests that the EMT-Paramedic or EMT-Intermediate veteran should become a registered student with the training entity rather than the student using a shortcut process with the training entity.

RESPONSE: There is nothing in the proposed amendment that prohibits the training entities from registering the students. The department has made no changes as a result of this comment.

19 CSR 30-40.331 Application and Accreditation or Certification Requirements for Training Entities that Conduct Training for First Responders, Emergency Medical Dispatchers, Emergency Medical Technicians-Basic, Emergency Medical Technicians-Intermediate, and Emergency Medical Technicians-Paramedic

(2) Specific Requirements for EMS Training Entities Offering Initial EMT-P Courses and EMT-I Courses.

(N) United States Armed Forces Including National Guard and Reserves Option for EMT-I and EMT-P course requirements.

1. An EMT-B licensee that was issued a license by the EMS Bureau pursuant to 19 CSR 30-40.342(2)(A) and section (3) indicating the licensee is a current or past member of the United States Armed Forces including National Guard and Reserves and has met the EMS Bureau's requirements for this license may present this license to a training entity certified by the EMS Bureau within two (2) years of the date of their honorable discharge if the licensee is a past member of the United States Armed Forces including National Guard and Reserves or at any time that the licensee is a current member of the United States Armed Forces including National Guard and Reserves.

2. The EMT-B licensee may request the training entity for the EMT-P or EMT-I programs evaluate their military training for advanced placement credit to determine which competencies have been met through their military training. The training entity shall allow the EMT-B licensee's military training to be assessed for competencies through advanced placement if the EMT-B licensee presents an EMT-B United States Armed Forces license from the EMS Bureau indicating the licensee is a current or past member of the United States Armed Forces including National Guard and Reserves and has met the requirements in 19 CSR 30-40.342(2)(A) and section (3). Advanced placement is any process where a program formally recognizes prior learning of a student and applies that recognition toward meeting the program requirements. Advanced placement shall be applied on a case-by-case basis and allows a student to "place out" of specified program didactic, laboratory, clinical, or field requirements. This may shorten the time for completion of the program and is often thought of as an alternative pathway to program completion and eligibility for the National Registry of Emergency Medical Technicians or state examination at the paramedic level. The EMT-P and EMT-I training entities shall use the minimum training requirements for the appropriate licensure level in subsection (2)(L) above for the EMT-P program and subsection (2)(M) above for the EMT-I program to determine what the EMT-B licensee will place out of following the advanced placement review of the EMT-B licensee's military training. The EMT-B licensee shall complete all of the minimum training requirements for the appropriate licensure level in subsection (2)(L) above for the EMT-P program and subsection (2)(M) above for the EMT-I program that the EMT-B licensee is not awarded credit for through the advanced placement assessment of the EMT-B licensee's military training.

(9) Initial licensure examination for EMT-B, EMT-Intermediate, and EMT-Paramedic.

(A) The EMS Bureau shall use the National Registry of EMTs examination process as the basis for initial licensure examinations for all levels of EMTs. The EMT-Basic exam conducted in Missouri is considered "the state approved practical examination" by the National Registry of Emergency Medical Technicians. It shall serve as the state of Missouri's examination used for National Registry of EMT's certification as an EMT-Basic.

1. Any student of an accredited Missouri EMT-Basic program shall complete the EMT-B practical examination in Missouri.

2. If a student from a Missouri accredited EMT-B program attempts a state approved exam outside the state of Missouri, that student shall complete all practical testing in that state and shall be ineligible from completing the Missouri EMT-B practical examination.

3. EMT-I and EMT-P candidates shall complete the National Registry of EMTs practical exam in Missouri or at an approved National Registry of EMTs' Advanced Level exam site in another state.

Title 19—DEPARTMENT OF HEALTH AND SENIOR SERVICES

**Division 30—Division of Regulation and Licensure
Chapter 40—Comprehensive Emergency Medical Services Systems Regulations**

ORDER OF RULEMAKING

By the authority vested in the Missouri Department of Health and Senior Services under sections 190.142, 190.160, 190.165, and 190.185, RSMo Supp. 2013, the department amends a rule as follows:

19 CSR 30-40.342 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on April 15, 2016 (41 MoReg 496-502). Changes have been made in the text of the proposed amendment, so it is reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Department of Health and Senior Services received comments from eleven (11) individuals, and one (1) comment was made by department staff.

COMMENT #1: Dr. Lynthia B. Andrews, Chair of the State Advisory Council on EMS; Frank Foster; Virginia Wilson, President of the I/C Society; Shane Lockard, President of the Missouri Ambulance Association; Brad Mason with the Mid-America Regional Council Emergency Rescue; Ruby Mehrer, President of the Missouri Emergency Medical Services Association; B. Scott Roy, President of the Ambulance District Association of Missouri; Charles Doss; Bryant Gladney with Boone County Fire Protection District; George W. Hatch, Jr. with the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions; and Terisa M. McGinnis with the Central Jackson County Fire Protection District request that the department allow the training entities to individually assess the EMT-Intermediate and EMT-Paramedic students' military training and award these students advanced placement credit for competencies they have already demonstrated. These individuals and entities comment that this type of advanced placement would be consistent with advanced placement used in higher education and as allowed for by the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions. The Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions requires all programs accredited by it to have a policy on advanced placement, transfer of credits, and credits for experiential learning. The National Registry of Emergency Medical Technicians requires all paramedic examination candidates who test with it to have graduated from an institution accredited by the Commission on Accreditation of Allied Health Education Programs or one that is seeking accreditation sponsored by the Commission on Accreditation of Allied Health Education Programs. Currently, the only nationally recognized accreditation available for Emergency Medical Services education is through the Commission on Accreditation of Allied Health Education Programs' Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions. Brad Mason with the Mid-America Regional Council Emergency Rescue specifically requests for the department to use the definition of advanced placement that has already been created by the Committee on Accreditation of Educational Programs for the Emergency Medical

Services Professions.

RESPONSE AND EXPLANATION OF CHANGE: In 19 CSR 30-40.342, the department has omitted the option of state only license on the application form that was included herein. The department also completely eliminated the verification form that was included herein.

COMMENT #2: Ruby Mehrer, President of the Missouri Emergency Medical Services Association and Shane Lockard with the Missouri Ambulance Association would like clarity that each veteran has successfully completed an EMT-Basic program with the appropriate national testing.

RESPONSE: Subsection (2)(A) of this proposed amendment states that any applicant for initial licensure as an EMT-Basic shall submit with their license application to the EMS Bureau evidence of current certification with the National Registry of EMTs as an EMT-B, EMT-I, or EMT-P. The applicant who is a past member of the United States Armed Forces including National Guard and Reserves who has been honorably discharged from the United States Armed Forces including National Guard and Reserves within the past two (2) years may in addition request a special EMT-B United States Armed Forces license with their application; however all EMT-Basics must provide evidence of current certification with the National Registry of EMTs as stated in subsection (2)(A) of this proposed amendment. There is no difference in the requirements for licensure of EMT-Basics. The difference is what the license will look like for those who qualify for the EMT-B United States Armed Forces license. No change has been made as a result of this comment.

COMMENT #3: Frank Foster comments that the proposed amendment conflicts with section 190.142, RSMo, and the definitions of EMT-Paramedics, EMT-Intermediates and EMT-Basics in section 190.100, RSMo, by not making the veteran applicants eligible to take the National Registry examination.

RESPONSE: Section 190.142, RSMo, as it stands at the time of filing of this final order of rulemaking, allows the department to promulgate rules relating to the requirements for an emergency medical technician including education and training requirements based on respective national curricula of the United States Department of Transportation and any modifications to such curricula specified through rules adopted pursuant to sections 190.001 to 190.245, RSMo. The department is also allowed to promulgate rules on initial licensure testing requirements and continuing education and relicensure requirements. The National Registry of Emergency Medical Technicians is a non-governmental private organization which grants certification to an individual that voluntarily chooses to certify with the National Registry of Emergency Medical Technicians and meets the National Registry of Emergency Medical Technicians predetermined specified qualifications. The department is not required to utilize the National Registry of Emergency Medical Technicians' certification through initial licensure or relicensure. Similarly, the definitions of all levels of emergency medical technicians in section 190.100, RSMo, are emergency medical technicians who have successfully completed courses of instructions based on sections 190.001 to 190.245, RSMo and rules adopted by the department pursuant to sections 190.001 to 190.245, RSMo. The department is not mandated to utilize the National Registry of Emergency Medical Technicians for initial licensure or relicensure. No change has been made as a result of this comment.

COMMENT #4: Bryant Gladney with the Boone County Fire Protection District comments that it is curious, ironic, and absurd that the Bureau of EMS touts the National Registry process in every other circumstance but has chosen to take a totally opposite position on this matter.

RESPONSE: The department allows for EMT-Basics, EMT-Intermediates, and EMT-Paramedics to relicense with the department with either a certification by the National Registry of Emergency

Medical Technicians or by appropriate continuing education set forth in this proposed amendment under subsection (4)(B) for EMT-Paramedics or subsection (5)(B) for EMT-Intermediates or subsection (2)(C) for EMT-Basics. Certification by the National Registry of Emergency Medical Technicians is not required for those who relicense with the department with the required continuing education. Currently, approximately sixty-nine percent (69%) of the emergency medical technicians (all levels) who obtain their initial license with the department by showing evidence that they have current certification with the National Registry of Emergency Medical Technicians drop their certification with the National Registry of Emergency Medical Technicians and relicense with the department by using the appropriate continuing education rather than certification with the National Registry of Emergency Medical Technicians. No change has been made as a result of this comment.

COMMENT #5: The department determined during its review of the EMS Personnel License Application included herein that it needed to update the revision date of this form.

RESPONSE AND EXPLANATION OF CHANGE: The department updated the revision date for the EMS Personnel License Application included herein.

19 CSR 30-40.342 Application and Licensure Requirements for the Initial Licensure and Relicensure of Emergency Medical Technician-Basics, Emergency Medical Technician-Intermediate, and Emergency Medical Technician-Paramedics

(4) EMT-Paramedic Licensure and Relicensure Requirements.

(A) EMT-Paramedic (Initial Licensure). Initial licensure requirements apply to any person who was not licensed in Missouri prior to August 28, 1998, as a mobile emergency medical technician by the EMS Bureau or whose Missouri license has expired for more than two (2) years. The applicant for initial licensure shall submit with their license application to the EMS Bureau evidence of current certification with the National Registry of EMTs as an EMT-P.

(B) EMT-Paramedic (Relicensure).

1. The applicant for relicensure shall submit with their license application to the EMS Bureau evidence of current certification with the National Registry of EMTs as an EMT-P; or

2. An applicant shall certify to the EMS Bureau—

A. That they have successfully completed one hundred forty-four (144) hours of continuing education which meet the EMS Bureau's approval criteria under 19 CSR 30-40.331, forty-eight (48) hours of which may be elective topics and the remaining ninety-six (96) hours covering all elements of the EMT-P core continuing education curriculum;

B. That they are able to produce documentation of the required continuing education and will make all records available to the EMS Bureau upon request. Licensees shall maintain such records for a period of five (5) years after the date of relicensure. Failure to obtain and retain complete and accurate documentation shall be cause for taking action upon a license; and

C. That they have current advanced cardiac life support training (can be counted towards the refresher requirement).

(5) EMT-Intermediate (EMT-I) Licensure and Relicensure Requirements.

(A) EMT-I (Initial Licensure). Initial licensure requirements apply to any person applying for licensure in Missouri. The applicant for initial licensure shall submit with their license application to the EMS Bureau evidence of current certification with the National Registry of Emergency Medical Technicians as an EMT-I. The EMT-I in Missouri may perform all the skills except intraosseous infusions in the *National EMS Scope of Practice Model for Advanced EMT* which is incorporated by reference in this rule as published in 2007 by the U.S. Department of Transportation and is available at U.S. Department of Transportation, Office of Emergency Medical

Services, West Building W 44-314, 1200 New Jersey Ave. SE, NTI 140, Washington DC 20590. This rule does not incorporate any subsequent amendments or additions.

(B) EMT-Intermediate (EMT-I) Relicensure.

1. The applicant for relicensure shall submit with their license application to the EMS Bureau evidence of current certification with the National Registry of EMTs as an EMT-I; or

2. An applicant shall certify to the EMS Bureau—

A. That they have successfully completed one hundred forty-four (144) hours of continuing education which meet the EMS Bureau's approval criteria under 19 CSR 30-40.331, seventy-two (72) hours of which cover all elements of the EMT-I core continuing education curriculum and seventy-two (72) hours of which may be elective topics from the EMT-B, EMT-I, or EMT-P curriculum;

B. That they are able to produce documentation of the required continuing education and shall make all records available to the EMS Bureau upon request. Licensees shall maintain such records for a period of five (5) years after the date of relicensure; and

C. Applicants shall produce a copy of the front and back of a basic cardiac life support training card which confirms that the applicant has successfully completed a basic life support training course within the past two (2) years.

(C) EMT-B Step Down from EMT-P or EMT-I.

1. The applicant for relicensure shall submit with their license application to the EMS Bureau evidence of current certification with the National Registry of EMTs as an EMT-B, EMT-I, or EMT-P; or

2. An applicant shall certify to the EMS Bureau—

A. That they have successfully completed one hundred (100) hours of continuing education which meet the EMS Bureau's approval criteria under 19 CSR 30-40.331, forty-eight (48) hours of which cover all elements of the EMT-B core continuing education curriculum and fifty-two (52) hours of which may be elective topics from the EMT-B, EMT-I, or EMT-P curriculum;

B. That they are able to produce documentation of the required continuing education and shall make all records available to the EMS Bureau upon request. Licensees shall maintain such records for a period of five (5) years after the date of relicensure; and

C. Applicants shall also have current basic cardiac life support training. This does not count towards core continuing education curriculum.

Transportation Commission
Chapter 25—Motor Carrier Operations**

IN ADDITION

7 CSR 10-25.010 Skill Performance Evaluation Certificates for Commercial Drivers

PUBLIC NOTICE

Public Notice and Request for Comments on Applications for Issuance of Skill Performance Evaluation Certificates to Intrastate Commercial Drivers with Diabetes Mellitus or Impaired Vision

SUMMARY: This notice publishes MoDOT's receipt of applications for the issuance of Skill Performance Evaluation (SPE) Certificates from individuals who do not meet the physical qualification requirements in the Federal Motor Carrier Safety Regulations for drivers of commercial motor vehicles in Missouri intrastate commerce because of impaired vision or an established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control. If granted, the SPE Certificates will authorize these individuals to qualify as drivers of commercial motor vehicles (CMVs), in intrastate commerce only, without meeting the vision standard prescribed in 49 CFR 391.41(b)(10), if applicable, or the diabetes standard prescribed in 49 CFR 391.41(b)(3).

DATES: Comments must be received at the address stated below, on or before, October 17, 2016.

ADDRESSES: You may submit comments concerning an applicant, identified by the Application Number stated below, by any of the following methods:

- *Docket:* For access to the department's file, to read background documents or comments received, 830 MoDOT Drive, Jefferson City, MO 65102, between 7:30 a.m. and 4:00 p.m., CT, Monday through Friday, except state holidays.

FOR FURTHER INFORMATION CONTACT: Pam Lueckenotto, Motor Carrier Investigations Specialist, 636-288-6082, MoDOT Motor Carrier Services Division, PO Box 270, Jefferson City, MO 65102. Office hours are from 7:30 a.m. to 4:00 p.m., CT, Monday through Friday, except state holidays.

SUPPLEMENTARY INFORMATION:

Public Participation

If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard.

Background

The individuals listed in this notice have recently filed applications requesting MoDOT to issue SPE Certificates to exempt them from the physical qualification requirements relating to vision in 49 CFR 391.41(b)(10), or to diabetes in 49 CFR 391.41(b)(3), which otherwise apply to drivers of CMVs in Missouri intrastate commerce.

Under section 622.555, RSMo, MoDOT may issue an SPE Certificate, for not more than a two- (2-) year period, if it finds that the applicant has the ability, while operating CMVs, to maintain a level of safety that is equivalent to or greater than the driver qualification standards of 49 CFR 391.41. Upon application, MoDOT may renew an exemption upon expiration.

Accordingly, the agency will evaluate the qualifications of each applicant to determine whether issuing an SPE Certificate will comply with the statutory requirements and will achieve the required level of safety. If granted, the SPE Certificate is only applicable to intrastate transportation wholly within Missouri.

Qualifications of Applicants

Application #370

New Applicant's Name & Age: Octavia E. Williams, 62

Relevant Physical Condition: Vision impaired.

Ms. Williams's best corrected visual acuity in her right eye is 20/30 Snellen. Her best corrected visual acuity in her left eye is 20/100 Snellen. Ms. Williams has had this visual impairment since February 11, 2016.

Relevant Driving Experience: Ms. Williams has approximately twenty-eight (28) years of commercial motor vehicle experience. Ms. Williams currently has a Class B license. In addition, she has experience driving personal vehicle(s) daily.

Doctor's Opinion & Date: Following an examination in May 2016, a board-certified ophthalmologist certified her condition would not adversely affect her ability to operate a commercial motor vehicle safely.

Traffic Accidents and Violations: Ms. Williams has had no tickets or accidents on record for the previous three (3) years.

Request for Comments

The Missouri Department of Transportation, Motor Carrier Services Division, pursuant to section 622.555, RSMo, and rule 7 CSR 10-25.010, requests public comment from all interested persons on the applications for issuance of Skill Performance Evaluation Certificates described in this notice. We will consider all comments received before the close of business on the closing date indicated earlier in this notice.

Issued on: August 4, 2016

Commercial Drivers**

PUBLIC NOTICE

Public Notice and Request for Comments on Applications for Issuance of Skill Performance Evaluation Certificates to Intrastate Commercial Drivers with Diabetes Mellitus or Impaired Vision

SUMMARY: This notice publishes MoDOT's receipt of applications for the issuance of Skill Performance Evaluation (SPE) Certificates from individuals who do not meet the physical qualification requirements in the Federal Motor Carrier Safety Regulations for drivers of commercial motor vehicles in Missouri intrastate commerce because of impaired vision or an established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control. If granted, the SPE Certificates will authorize these individuals to qualify as drivers of commercial motor vehicles (CMVs), in intrastate commerce only, without meeting the vision standard prescribed in 49 CFR 391.41(b)(10), if applicable, or the diabetes standard prescribed in 49 CFR 391.41(b)(3).

DATES: Comments must be received at the address stated below, on or before, October 17, 2016.

ADDRESSES: You may submit comments concerning an applicant, identified by the Application Number stated below, by any of the following methods:

- *Email:* Pamela.lueckenotto@modot.mo.gov
- *Mail:* PO Box 270, Jefferson City, MO 65102
- *Hand Delivery:* 830 MoDOT Drive, Jefferson City, MO 65102
- *Instructions:* All comments submitted must include the agency name and Application Number for this public notice. For detailed instructions on submitting comments, see the Public Participation heading of the Supplementary Information section of this notice. All comments received will be open and available for public inspection and MoDOT may publish those comments by any available means.

Accordingly, the agency will evaluate the qualifications of each applicant to determine whether issuing an SPE Certificate will comply with the statutory requirements and will achieve the required level of safety. If granted, the SPE Certificate is only applicable to intrastate transportation wholly within Missouri.

Qualifications of Applicants

Application #363

New Applicant's Name & Age: Daniel F. Large, 37

Relevant Physical Condition: Vision impaired.

Mr. Large has monocular vision and is considered blind in his right eye and his best uncorrected visual acuity in his left eye is 20/20 Snellen. Mr. Large has had this visual impairment since 2007.

Relevant Driving Experience: Mr. Large has approximately one (1) year of commercial motor vehicle experience. Mr. Large currently has a Class A license. In addition, he has experience driving personal vehicle(s) daily.

Doctor's Opinion & Date: Following an examination in July 2016, a board-certified optometrist certified his condition would not adversely affect his ability to operate a commercial motor vehicle safely.

Traffic Accidents and Violations: Mr. Large has had no tickets or accidents on record for the previous three (3) years.

STATEMENT OF ACTUAL COST

10 CSR 20-6.011 Fees

The original fiscal note containing the estimated public entity cost of this rulemaking was published in the *Missouri Register* on October 1, 2013 (38 MoReg 1539-1542). The cost to state agencies and political subdivisions has exceeded the cost estimate by more than ten percent (10%). Therefore, pursuant to section 536.200.2, RSMo 2000, it is

necessary to publish the cost estimate together with the actual cost of the first full fiscal year. The estimated cost to the department was one hundred thousand five hundred dollars (\$100,500), and at the end of the first full fiscal year, the costs were five hundred three thousand four hundred twelve dollars (\$503,412). The estimated cost to state agencies and political subdivisions was one hundred twenty-six thousand six hundred sixty-six dollars (\$126,666), and the actual costs were one hundred forty-six thousand nine hundred eighty-three dollars (\$146,983). The original total estimated cost was two hundred twenty-three thousand one hundred sixty-six dollars (\$223,166). The total actual cost of compliance, the revenue loss to the department plus total costs to state agencies and political subdivisions, is six hundred fifty thousand three hundred ninety-five dollars (\$650,395).

Projected additional revenues to the department were estimated at \$1,993,645. Despite additional revenues to the department, a shortfall of \$1,244,550 exists as of June 30, 2016. Less revenues than expected are a result of lower than expected fee collections and over estimating the revenues expected as a result of the fee increases in the rule.

Updated: 8/15/2016

Construction Transient

The following is a list of all construction contractors performing work on construction projects in Missouri who are known by the Department of Revenue to be transient employers pursuant to Section 285.230, RSMo. This list is provided as a guideline to assist public bodies with their responsibilities under this section that states, "any county, city, town, village or any other political subdivision which requires a building permit for a person to perform certain construction projects shall require a transient employer to show proof that the employer has been issued a tax clearance and has filed a financial assurance instrument as required by Section 285.230 before such entity issues a building permit to the transient employer."

The Secretary of State is required by sections 347.141 and 359.481, RSMo 2000, to publish dissolutions of limited liability companies and limited partnerships. The content requirements for the one-time publishing of these notices are prescribed by statute. This listing is published pursuant to these statutes. We request that documents submitted for publication in this section be submitted in camera ready 8 1/2" x 11" manuscript by email to dissolutions@sos.mo.gov.

**NOTICE OF WINDING UP AND DISSOLUTION
TO ALL CREDITORS AND CLAIMANTS
AGAINST MIDWEST DYNAMICS, INC.**

Midwest Dynamics, Inc., a Missouri corporation, plans to dissolve. Dissolution of the corporation has been authorized by Action by Unanimous Written Consent of Shareholders dated June 7, 2016, pursuant to Missouri Revised Statute 351.466. Said corporation requests that all persons and organizations who have claims against it present them immediately by letter to the corporation:

MIDWEST DYNAMICS, INC.
C/O REGISTERED AGENT, L.L.C.
117 SOUTH LEXINGTON ST., STE 100
HARRISONVILLE, MO 64701

All claims must include the following: (i) the name, address and telephone number of the claimant; (ii) the amount of the claim; (iii) the basis for the claim; (iv) documentation of the claim; and (v) the date(s) on which the event(s) on which the claim is based occurred and whether the claim is secured, and if so, a description of the collateral.

Because of the dissolution of Midwest Dynamics, Inc. any claims against it will be barred unless a proceeding to enforce the claim is commenced within two years after the publication of this notice.

**NOTICE OF CORPORATE DISSOLUTION TO ALL CREDITORS OF AND
CLAIMANTS AGAINST ROBERT C. STEPPLER, D.D.S., P.C.**

On July ~~14~~¹⁹, 2016, Robert C. Stepler, D.D.S., P.C., a Missouri professional corporation (the "Corporation"), filed its Articles of Dissolution by Voluntary Action with the Missouri Secretary of State. All persons and organizations with claims against the Corporation must submit to Robert C. Stepler, Liquidation Trustee, c/o Evans & Dixon, L.L.C., 211 N. Broadway, #2500, St. Louis, MO 63102, a written summary of any claims against the Corporation, which shall include the name, address, and telephone numbers of the claimant, the amount of the claim, date(s) the claim accrued, a brief description of the nature/basis for the claim, and any documentation of the claim. Claims against the Corporation will be barred unless a proceeding to enforce the claim is commenced within two years after the publication of this notice.

NOTICE OF WINDING UP TO ALL CREDITORS
AND CLAIMANTS OF CREECH FAMILY FARM LLC

You are hereby notified that Creech Family Farm LLC, a Missouri limited liability company (the "Company"), the principal office of which is located at 2721 El Camino Drive, St. Charles, Missouri 63301, filed a Notice of Winding Up for Limited Liability Company with the Secretary of the State of Missouri on August 1, 2016. In order to file a claim with the Company, you must furnish:

1. The name and address of the claimant;
2. Amount of claim;
3. Basis for the claim;
4. Documentation of the claim; and
5. The date(s) on which the event(s) on which the claim is based occurred.

The claim must be mailed to A. Carter Creech, Jr., 300 Crescent Court, Dallas, Texas 75201. A claim against the Company will be barred unless a proceeding to enforce the claim is commenced within three (3) years after the publication date of this notice.

NOTICE OF WINDING UP TO ALL CREDITORS OF AND
CLAIMANTS AGAINST B&S FENCING, L.L.C., A
MISSOURI LIMITED LIABILITY COMPANY

On July 25, 2016, B&S Fencing, L.L.C., Charter Number LC1325499, filed its Notice of Winding Up with the Missouri Secretary of State. Said Company requests that all persons and organizations who have claims against it present them immediately by letter to Danny Joe Brown, 14506 290th Street, Skidmore, MO 64487. All claims must include the following information: (1) The name and current address of the claimant. (2) The amount claimed. (3) A brief description and nature of the debt or the basis for the claim. (4) The date the claim was incurred.

Note: Any claims against the Corporation will be barred unless a proceeding to enforce the claim is commenced within three years after the publication of this or any other notice authorized by statute, whichever is published last.

**NOTICE OF DISSOLUTION OF LIMITED LIABILITY COMPANY
TO ALL CREDITORS OF AND CLAIMANTS AGAINST
COLORADO AUSTIN HEIGHTS RETURN, LLC**

On July 28, 2016, Colorado Austin Heights Return, LLC, a Missouri limited liability company (hereinafter the “**Company**”), filed its Notice of Winding Up for a Limited Liability Company with the Missouri Secretary of State.

Any claims against the Company may be sent to: Douglas M. Neeb, 1111 Main Street, Suite 1600, Kansas City, Missouri, 64105. Each claim must include the following information: name, address and phone number of the claimant; amount claimed; date on which the claim arose; basis for the claim; and documentation in support of the claim

All claims against the Company will be barred unless the proceeding to enforce the claim is commenced within three (3) years after the publication of this notice.

**NOTICE OF DISSOLUTION OF LIMITED LIABILITY COMPANY
TO ALL CREDITORS OF AND CLAIMANTS AGAINST
COLORADO COUNTRYSIDE RETURN, LLC**

On July 28, 2016, Colorado Countryside Return, LLC, a Missouri limited liability company (hereinafter the “**Company**”), filed its Notice of Winding Up for a Limited Liability Company with the Missouri Secretary of State.

Any claims against the Company may be sent to: Douglas M. Neeb, 1111 Main Street, Suite 1600, Kansas City, Missouri, 64105. Each claim must include the following information: name, address and phone number of the claimant; amount claimed; date on which the claim arose; basis for the claim; and documentation in support of the claim

All claims against the Company will be barred unless the proceeding to enforce the claim is commenced within three (3) years after the publication of this notice.

**NOTICE OF DISSOLUTION OF LIMITED LIABILITY COMPANY
TO ALL CREDITORS OF AND CLAIMANTS AGAINST
COLORADO GLENWOOD PARACHUTE RETURN, LLC**

On July 28, 2016, Colorado Glenwood Parachute Return, LLC, a Missouri limited liability company (hereinafter the “**Company**”), filed its Notice of Winding Up for a Limited Liability Company with the Missouri Secretary of State.

Any claims against the Company may be sent to: Douglas M. Neeb, 1111 Main Street, Suite 1600, Kansas City, Missouri, 64105. Each claim must include the following information: name, address and phone number of the claimant; amount claimed; date on which the claim arose; basis for the claim; and documentation in support of the claim

All claims against the Company will be barred unless the proceeding to enforce the claim is commenced within three (3) years after the publication of this notice.

**NOTICE OF DISSOLUTION TO ALL CREDITORS OF
AND CLAIMANTS AGAINST LENGE FAMILY LP**

On August 1, 2016, Lenge Family LP, a Missouri limited partnership, was dissolved upon the filing of a Cancellation of Registration with the Secretary of State.

Said partnership requests that all persons and organizations who have claim against it present them immediately by letter to: J. Brian Hill, Esq., 2900 Brooktree Lane, Suite 100, Gladstone, Missouri 64119. All claims must include the claimant's name, address and telephone number, the amount, date and basis for the claim.

ANY CLAIMS AGAINST LENGE FAMILY LP WILL BE BARRED UNLESS A PROCEEDING TO ENFORCE THE CLAIM IS COMMENCED WITHIN THREE YEARS AFTER THE LAST PUBLICATION DATE OF THE NOTICES AUTHORIZED BY STATUTE.

Rule Changes Since Update to Code of State Regulations

This cumulative table gives you the latest status of rules. It contains citations of rulemakings adopted or proposed after deadline for the monthly Update Service to the *Code of State Regulations*, citations are to volume and page number in the *Missouri Register*, except for material in this issue. The first number in the table cite refers to the volume number or the publication year—39 (2014) and 40 (2015). MoReg refers to *Missouri Register* and the numbers refer to a specific *Register* page, R indicates a rescission, W indicates a withdrawal, S indicates a statement of actual cost, T indicates an order terminating a rule, N.A. indicates not applicable, RAN indicates a rule action notice, RUC indicates a rule under consideration, and F indicates future effective date.

Executive Orders	Subject Matter	Filed Date	Publication
2016			
16-07	Declares that a State of Emergency exists in the State of Missouri and directs that the Missouri State Emergency Operations Plan be activated as a result of storms that began on May 25, 2016. This order shall terminate on June 26, 2016, unless extended.	May 27, 2016	41 MoReg 830
16-06	Declares that the next Missouri Poet Laureate will be named in June 2016 and directs that a Missouri Poet Laureate be named biennially to serve for two years at the pleasure of the governor. The order also includes qualifications and responsibilities for the post. Additionally the Missouri Poet Laureate Advisory Committee is hereby established.	May 27, 2016	41 MoReg 828
16-05	Directs the Department of Public Safety, with guidance from the Missouri Veteran's Commission and the Adjutant General of the State of Missouri, to coordinate events with the World War I Centennial Commission that recognize and remember efforts and sacrifices of all Americans during World War I.	May 27, 2016	41 MoReg 826
16-04	Orders all departments, agencies and boards, and commissions, in the Executive Branch subject to the authority of the governor to take all necessary action to amend initial employment applications by removing questions related to an individual's criminal history unless a criminal history would render an applicant ineligible for the position.	April 11, 2016	41 MoReg 658
16-03	Extends Executive Orders 15-10, 15-11, and 16-02 until February 22, 2016, due to severe weather that began on December 22, 2015.	Jan. 22, 2016	41 MoReg 299
