HOW TO CITE RULES AND RSMo

RULES—Cite material in the *Missouri Register* by volume and page number, for example, Vol. 28, *Missouri Register*, page 27. The approved short form of citation is 28 MoReg 27.

The rules are codified in the *Code of State Regulations* in this system—

Title	Code of State Regulations	Division	Chapter	Rule
1	CSR	10-	1.	010
Department		Agency, Division	General area regulated	Specific area regulated

They are properly cited by using the full citation, i.e., 1 CSR 10-1.010.

Each department of state government is assigned a title. Each agency or division within the department is assigned a division number. The agency then groups its rules into general subject matter areas called chapters and specific areas called rules. Within a rule, the first breakdown is called a section and is designated as (1). Subsection is (A) with further breakdown into paragraph 1., subparagraph A., part (I), subpart (a), item I. and subitem a.

RSMo—The most recent version of the statute containing the section number and the date.

Under this heading will appear the text of proposed rules and changes. The notice of proposed rulemaking is required to contain an explanation of any new rule or any change in an existing rule and the reasons therefor. This is set out in the Purpose section with each rule. Also required is a citation to the legal authority to make rules. This appears following the text of the rule, after the word "Authority."

Entirely new rules are printed without any special symbology under the heading of proposed rule. If an existing rule is to be amended or rescinded, it will have a heading of proposed amendment or proposed rescission. Rules which are proposed to be amended will have new matter printed in boldface type and matter to be deleted placed in brackets.

An important function of the *Missouri Register* is to solicit and encourage public participation in the rulemaking process. The law provides that for every proposed rule, amendment, or rescission there must be a notice that anyone may comment on the proposed action. This comment may take different forms.

If an agency is required by statute to hold a public hearing before making any new rules, then a Notice of Public Hearing will appear following the text of the rule. Hearing dates must be at least thirty (30) days after publication of the notice in the *Missouri Register*. If no hearing is planned or required, the agency must give a Notice to Submit Comments. This allows anyone to file statements in support of or in opposition to the proposed action with the agency within a specified time, no less than thirty (30) days after publication of the notice in the *Missouri Register*.

An agency may hold a public hearing on a rule even though not required by law to hold one. If an agency allows comments to be received following the hearing date, the close of comments date will be used as the beginning day in the ninety- (90-) day-count necessary for the filing of the order of rulemaking.

If an agency decides to hold a public hearing after planning not to, it must withdraw the earlier notice and file a new notice of proposed rulemaking and schedule a hearing for a date not less than thirty (30) days from the date of publication of the new notice.

Proposed Amendment Text Reminder:

Boldface text indicates new matter.

[Bracketed text indicates matter being deleted.]

Title 3—DEPARTMENT OF CONSERVATION
Division 10—Conservation Commission
Chapter 2—[Forest Crop Lands] Missouri Managed Woods

PROPOSED AMENDMENT

3 CSR 10-2.020 [Classification and Requirements of Forest Crop Lands After December 1974] Forest Cropland. The commission proposes to amend the title of Chapter 2, the name of the rule, and sections (1)–(8), and add sections (9), (10), and (11) to this rule.

PURPOSE: This amendment enhances the commission's ability to classify forest croplands by increasing the value of the land eligible for classification bringing program guidelines into closer alignment with current property values, increasing the sum paid by the commission to counties in lieu of taxes for classified forest croplands, and setting a fifteen (15) year minimum enrollment period for the program. Classified forest croplands will be administered under a program to be known as Missouri Managed Woods. The title of the chapter more accurately reflects program goals.

(1) Any landowner desiring to have his/her land classified as forest [crop land] cropland shall have his/her ownership boundary lines marked and shall maintain those lines so as to be readily traceable during the period his/her land is classified.

(2) The [owner] landowner shall make all reasonable efforts to prevent wildfires from starting on or spreading to classified lands and to extinguish any wildfire which threatens or may threaten to burn on to classified lands.

(3) Forest [crop lands] croplands shall be devoted primarily to growing trees but may also be used for other purposes compatible with forestry practices so long as an adequate stocking of trees is maintained, damage to tree growth prevented, and the watershed protected. These lands shall not be used for grazing by domestic livestock, for the erection of permanent buildings on the land, or for the impoundment of water and installation of permanent wildlife food plots [in excess of three percent (3%) of each forty (40) acres] unless specifically authorized in the approved management plan.

(4) Forest [crop lands] croplands shall be managed to produce timber and wood products according to a plan submitted by the [owner] landowner and approved by the commission or according to a plan prepared for the tract by the commission and agreed to by the [owner] landowner. [This] Based on the landowner's objectives, timber stand composition, and general condition of the stand, the plan shall outline and describe those reasonable accomplishments to be completed in a five- (5)-[] year period [having due regard for timber stand composition, general condition and the owner's

objectives]. Failure to complete accomplishments agreed upon during this period shall be deemed grounds for cancellation of the forest [crop land] cropland classification unless it may be demonstrated that the failure was due to circumstances beyond the control of the [owner] landowner. At the end of five (5) years and for each five- (5)-[] year period thereafter, a new accomplishment agreement shall be reached by and between the landowner and the commission.

(5) When the ownership of classified land is transferred, the new [owner] landowner may assume the management accomplishment agreement of the previous [owner] landowner or s/he may elect to enter into a new agreement as outlined previously.

(6) Tree [C]cutting must conform to practices outlined in the management plan and shall be conducted within a reasonable time schedule according to the silvicultural requirements of the tract, market conditions, and the overall objective of the landowner.

(7) [An owner] A landowner shall give written notice to the commission thirty (30) days prior to any cutting of timber. This notice shall include the location of the woodland, the approximate acreage proposed to be cut, and the cutting plan. Notice to the commission is not required for the cutting of firewood, posts, or timber for use on the premises by the [owner] landowner or person controlling the previously described lands.

(8) Within one (1) month following a commercial cutting or at the end of each month where the cutting is continuous, the [owner] landowner shall file with the commission a sworn statement showing the quantity of timber cut and the stumpage price received for each species sold. The commission shall compute the yield tax and notify the [owner] landowner of the amount due[, such amount due, the amount] to be paid within thirty (30) days after the date of the notice.

(9) No lands will be classified for tax relief if the value exceeds three thousand five hundred dollars (\$3,500) per acre.

(10) The commission will pay the county wherein the classified lands are located one dollar (\$1.00) per acre per year as a grant in lieu of taxes.

(11) Any privately owned lands approved and classified by the commission as forest croplands shall receive partial relief from taxation during a period of time set at fifteen (15) years, after which the classification shall expire unless a renewal is requested and mutually agreed upon by the landowner and the commission.

AUTHORITY: sections 40 and 45 of Art. IV, Mo. Const. and section 254.020, RSMo [1986] 2000. Original rule filed Nov. 27, 1974, effective Dec. 7, 1974. Amended: Filed March 14, 2016.

PUBLIC COST: This proposed amendment will cost state agencies or political subdivisions as much as five hundred thousand dollars (\$500,000) annually in the aggregate in payments to counties in lieu of taxes. The estimate will vary depending on the number of acres classified in any given year.

Payments to counties in lieu of taxes on enrolled lands are currently fifty cents (\$0.50) per acre per year. With the reinvigoration of the program, it is anticipated that enrollment in the program will surge. The proposed increase in the in lieu tax payment by the Department of Conservation to one dollar (\$1.00) per acre could increase the cost to the commission to as much as five hundred thousand dollars (\$500,000) annually. Payments in lieu of taxes for private land with classified forest cropland in FY2015 were thirteen thousand dollars (\$13,000). If targets are met for enrollment over a five- (5-) year period, increased spending of commission funds of four hundred eighty seven thousand dollars (\$487,000) annually will be needed.

County governments may receive more or less revenue depending on how they classify forest land for assessment purposes. Payments made by the commission in lieu of taxes are intended to compensate counties for lost revenue based on forest classified as agriculture soil grade number seven (#7). However, some counties classify forest land in soil grade number six (#6), a higher valued agriculture use. A one dollar (\$1.00) payment in lieu of taxes creates a favorable, or neutral, situation for counties classifying forested land as agricultural soil grade number six (#6) until a six point three percent (6.3%) property tax levy rate is exceeded. A revenue loss of twelve cents (\$0.12) per acre is estimated for these counties with a total property tax levy of seven percent (7%). More details can be found in the Fiscal Note attached.

PRIVATE COST: This proposed amendment will not cost private entities more than five hundred dollars (\$500) in the aggregate.

*NOTICE TO SUBMIT COMMENTS: Anyone may file a statement in support of or in opposition to this proposed amendment with Regulations Committee Chairman, Department of Conservation, PO Box 180, Jefferson City, MO 65102-0180, or via the department's website at <http://mdc.mo.gov/node/24141>. To be considered, comments must be received within thirty (30) days after publication of this notice in the **Missouri Register**. No public hearing is scheduled.*

III. WORKSHEET

Missouri Department of Conservation – Fiscal Impact Calculations

- 500,000 acres enrolled at \$1.00 payment in-lieu of taxes to counties = \$500,000
- Current budget of \$13,000 annually for enrolled acres

$$\$500,000 - \$13,000 = \$487,000 \text{ increase annually}$$

County Governments – Fiscal Impact Calculations

Estimated revenue to counties (property tax) on non-Missouri Managed Woods enrolled forestland at a 5% tax levy.

- The property tax paid to the county for forested lands in soil grade #7 would be \$0.474 per acre.
- The property tax formula is: (soil grade value)x(12% (ag use assessment) x (county tax levy) = per acre property tax revenue to counties
 - $(\$79 \text{ (the soil grade \#7 value)} \times .12) \times .05 \text{ (the tax levy)} = \$0.474 \text{ (county property tax revenue per acre)}$

Estimated revenue to counties for lands enrolled in the Missouri Managed Woods includes property tax paid by the landowner and payments in-lieu of taxes.

- The landowner pays reduced property taxes based on a \$3.00 per acre assessed value
- The property tax formula is: $(\$3.00 \times \text{tax levy}) + \1.00 per acre payment in-lieu of taxes from Department of Conservation = county property tax revenue per acre
- Missouri Managed Woods lands would generate \$1.15 per acre property tax revenue to counties assuming a 5% tax levy
 - $(\$3.00 \text{ assessed value} \times .05) + \1.00 (Department of Conservation payment in-lieu of taxes) = county property tax revenue per acre.
 - $\$0.15 + \$1.00 = \$1.15$ per acre
 - $\$1.15 - \$0.474 = \$0.676$ gain per acre to the county compared to non-Missouri Managed Woods forested lands
- This relationship varies with the property tax levy rate and the gap between Missouri Managed Woods program lands and non-program lands decreases as the tax levy increases, but stays favorable to Missouri Managed Woods lands until the tax levy rises above 15.4%. So at a tax rate of about 15.5% or greater, counties would begin to lose money on Missouri Managed Woods lands classified as agriculture soil grade #7

However, some counties assess forestland in agriculture soil grade #6. Under this classification the counties would gain revenue on Missouri Managed Woods enrolled acres until the tax levy rises above 6.3%. At a total property tax levy rate of 6.4% or higher, counties classifying forested land in agriculture soil grade #6 will begin to lose money on lands enrolled in Missouri Managed Woods. The amount of the loss in property tax revenue per acre will increase as the total property tax levy rate increases above 6.4%.

Assuming a total county property tax levy of 5%:

- Estimated tax revenue for non-Missouri Managed Woods land in agriculture soil grade #6 with a total property tax rate of 5% is \$0.948 per acre
 - $(\$158 \text{ (the soil grade #6 value)} \times .12) \times \text{tax levy} = \text{county property tax revenue generated per acre}$
 - $(\$158 \times .12) \times .05 = \0.948 per acre
- Missouri Managed Woods would still generate a property tax revenue of \$1.15 per acre as noted above and would show a gain of \$0.202 per acre over non-program lands
 - $\$1.15 - \$0.948 = \$0.202$ gain per acre to the county compared to non-Missouri Managed Woods forested lands

For forested lands assessed in agriculture soil grade #6, and assuming a total property tax levy of 7%:

- Estimated property tax revenue for non-Missouri Managed Woods land in agriculture soil grade #6 with a total property tax levy of 7% is \$1.33 per acre
 - $(\$158 \text{ (the soil grade #6 value)} \times .12) \times \text{tax levy} = \text{county property tax revenue generated per acre}$
 - $(\$158 \times .12) \times .07 = \1.33 per acre

- Missouri Managed Woods would generate a property tax revenue of \$1.21 per acre and would create a loss to the county of \$0.12 per acre
 - $(\$3.00 \text{ assessed value} \times .07) + \1.00 (Department of Conservation payment in-lieu of taxes) = county property tax revenue per acre.
 - $\$0.21 + \$1.00 = \$1.21$ per acre
 - $\$1.33 - \$1.21 = \$0.12$ loss per acre to the county compared to non-Missouri Managed Woods forested lands

A final scenario to consider is vacant and unused agriculture classification also referred to by some as recreational. Agricultural lands that do not appear to be managed for agricultural purposes are reclassified in this category and the fair market value becomes the value to be assessed. A 12% assessment rate is still used, and the local tax levy applied.

- Estimated revenue from property taxes would be \$9.00 per acre
- $(\text{Fair market value} \times 0.12) \times \text{the local tax levy}$
- $(\$1,500 \text{ (sample fair market value)} \times 0.12) \times 0.05 \text{ (sample tax levy)} = \9.00 per acre in county property tax revenue

This creates a substantially higher payment to counties that would be not be compensated for by Missouri Managed Woods. However, all counties currently using this practice provide a remedy to landowners who demonstrate to the county assessor that they are managing their woods or property for agricultural purposes. They can have the classification of their land returned to that of the appropriate agricultural soil grade if they demonstrate management. The requirement that landowners participating in the Missouri Managed Woods program be active participants in the American Tree Farm program would provide proof of management to county governments, because membership in Tree Farm requires implementation of the management plan prepared for the property.

IV. ASSUMPTIONS

Missouri Department of Conservation – Fiscal Impact Assumptions

- No new positions will be created within the Department of Conservation to administer this change
- Any additional workload will be handled by existing staff
- 500,000 acres enrolled at \$1.00 payment in-lieu of taxes to counties = \$500,000
- Current budget of \$13,000 annually for enrolled acres

County Governments – Fiscal Impact Assumptions

Provided below is background information to assist with understanding the impact of this program on county revenue.

- Agricultural and horticultural properties are assigned by the county assessor land values based on eight (8) approved agricultural land use grades and values assigned to each by the Missouri General Assembly. Examples from CSR 30-4.010 Agriculture Land Productive Values, State Tax Commission, include:
 - Grade #5. Soils not suited to continuous cultivation – 2015 value of \$205/acre

- Grade #6. Soils are generally unsuited for cultivation and are limited largely to pasture and sparse woodland - 2015 value of \$158/acre
- Grade #7. Soils generally unsuited for cultivation and may have other severe limitations for grazing and forestry – 2015 value of \$79/acre
- CSR 30-4.010 Agriculture Land Productive Values, prescribes that forested land whose cover is predominantly trees and other woody vegetation and is greater than 2 acres in size, for the purposes of property taxation, be placed in land grade #6 if it would fall in land grades #1 - #5 if cleared of trees. Similarly, forested land should be placed in land grade #7 if the land cleared of trees would fall into land grades #6 or #7
- The assessed value of land classified as agricultural is 12% of the above assigned productivity value
- Property tax levy rates vary by, and within, counties. Most calculations in this document use a 5% levy that is applied to the assessed value to determine what the landowner pays in property taxes – unless noted otherwise
- Lands enrolled in Missouri Managed Woods have an assessed value set within the program of \$3.00 per acre
- \$1.00 per acre payments will be made in-lieu of taxes for all enrolled lands
- Counties with lands classified as "vacant and unused" will not be adversely impacted by Missouri Managed Woods since other provisions already exist for landowners to reclassify those lands under agriculture use
- The following formula applies to lands not enrolled in Missouri Managed Woods:
Estimated revenue to counties per acre = (soil grade value x 12%) x tax levy
- The following formula applies to lands enrolled in Missouri Managed Woods:
Estimated revenue to counties per acre = (\$3.00 per acre assessed value x tax levy) + \$1.00 payment in-lieu of taxes

PROPOSED RULE

3 CSR 10-12.160 Outdoor Recreational Access Program

PURPOSE: This rule specifies public access options for landowners enrolled in a department-sponsored outdoor recreational access program and prohibits uses other than those specifically authorized by the landowner.

(1) Public access on private land granted under a department-sponsored outdoor recreational access program will be designated for one (1) of the following types of access:

Title 3—DEPARTMENT OF CONSERVATION Division 10—Conservation Commission Chapter 4—Wildlife Code: General Provisions

ORDER OF RULEMAKING

By the authority vested in the Conservation Commission under sections 40 and 45 of Art. IV, Mo. Const., the commission amends a rule as follows:

3 CSR 10-4.110 General Prohibition; Applications is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 15, 2016 (41 MoReg 74). No changes have been made in the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Conservation Commission received one (1) comment on this proposed amendment.

COMMENT: Danny Marshall, Steelville, indicated indecision regarding the proposal to ban feeding in Chronic Wasting Disease (CWD) Management Zones and questioned the effectiveness of this regulation to stop the spread of the disease.

RESPONSE: With the finding of CWD in free-ranging deer in Missouri, it is important to prevent the further spread of the disease and minimize prevalence by implementing effective management strategies. Early detection of CWD is critical to management strategies focused on limiting the prevalence and further spread of CWD. Active surveillance focused on hunter-harvested deer within the

CWD Management Zone will increase the likelihood of detecting CWD and facilitate implementation of an effective management strategy. It is important to prevent the further spread of the disease and minimize prevalence by prohibiting those activities which will serve to further spread the disease. No changes to the rule have been made as a result of this comment.

Title 3—DEPARTMENT OF CONSERVATION Division 10—Conservation Commission Chapter 4—Wildlife Code: General Provisions

ORDER OF RULEMAKING

By the authority vested in the Conservation Commission under sections 40 and 45 of Art. IV, Mo. Const., the commission adopts a rule as follows:

3 CSR 10-4.200 Chronic Wasting Disease; Management Zone is adopted.

A notice of proposed rulemaking containing the text of the proposed rule was published in the *Missouri Register* on January 15, 2016 (41 MoReg 74-76). No changes have been made in the text of the proposed rule, so it is not reprinted here. This proposed rule becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Conservation Commission received sixteen (16) comments from thirteen (13) individuals on this proposed rule.

COMMENT #1: Scott Deatherage, Villa Ridge, questioned the seriousness of Chronic Wasting Disease (CWD) and noted that Wisconsin has much less restrictive regulations in place to deal with the disease. Mr. Deatherage expressed opposition to the proposal to require mandatory testing of deer taken during the first two (2) days of the fall firearms deer season in CWD Management Zones, citing inconvenience to hunters and potential damage to trophy-quality bucks as a result of the process used for sample collection.

RESPONSE: With regards to the seriousness of this disease, CWD is transmitted by prions, which are abnormal proteins that attack the nervous system, and is always fatal to the infected animal. There is currently no approved live test for CWD, with the only approved test performed post-mortem. CWD is spread both directly from deer to deer and indirectly from infected soil and other surfaces. Prions accumulate in the brain, spinal cord, eyes, spleen, and lymph nodes of infected animals. Once well established in an area, CWD is impossible to eradicate. States with CWD must focus on limiting the spread of the disease and preventing its introduction to new areas. An example of active management limiting CWD is shown in Illinois where it has been kept at a low prevalence rate (annual prevalence rate of 0.94 +/- 0.23%. (Manjerovic, M.B., M.L. Green, N. Mateus-Pinilla, and J. Novakofski. 2014. *The Importance of localized culling in stabilizing chronic wasting disease prevalence in white-tailed deer populations*. Preventive Veterinary Medicine 113 (2014):139-145.) However, Wisconsin has seen an increase in prevalence (<http://dnr.wi.gov/topic/wildlifehabitat/prevalence.html>).

With the finding of CWD in free-ranging deer in Missouri, it is important to prevent the further spread of the disease and minimize prevalence by implementing effective management strategies. Early detection of CWD is critical to management strategies focused on limiting the prevalence and further spread of CWD. Active surveillance focused on hunter-harvested deer within the CWD Management Zone will increase the likelihood of detecting CWD and facilitate implementation of an effective management strategy. It is

important to prevent the further spread of the disease and minimize prevalence by prohibiting those activities which will serve to further spread the disease.

The commission anticipates providing a minimum of two (2) sampling stations per county to minimize any inconvenience to hunters. The commission has made an effort in the past and will continue to accommodate hunters when it comes to the current CWD sampling techniques if they wish to mount their deer. The proposed rule states, "the head with at least six inches (6") of neck attached from any deer....must be presented...." but does not necessarily require a sample be taken. If a hunter wishes to mount the deer, there are other opportunities (e.g., taxidermists) to acquire a sample from deer. A concerted effort will be made to provide necessary sampling information (e.g., sampling locations by county and a list of taxidermists who are willing to collect samples) to hunters prior to the deer hunting season. No changes have been made to the rule as a result of these comments.

COMMENT #2: Keith Voss, Leslie, expressed opposition to lifting the antler-point restriction in Franklin County in response to finding CWD in a free-ranging deer. Instead, Mr. Voss voiced support for additional testing to determine the prevalence of the disease in that area.

RESPONSE: The commission is not proposing to lift the antler-point restriction in Franklin County with this rule; however, they appreciate input from citizens on this and any conservation-related topic. Yearling and adult male deer have been found to exhibit CWD at a much higher rate than yearling and adult females and dispersal of yearling males from their natal range is one (1) of the most likely means of expanding the distribution of CWD. Regulations that protect yearling males will serve to increase prevalence rates and accelerate the spread of CWD. Therefore, in the future it will be necessary to remove the antler-point restriction that prevents the harvest of young males and ensure that hunting regulations are consistent with responsible disease management practices. With the proposed expansion of the CWD Management Zones, additional efforts will be focused on sample collection in Franklin County to determine the prevalence of the disease in that area. No changes have been made to the rule as a result of this comment.

COMMENT #3: Brett Dudenhoeffer, Bonnots Mill, expressed concern regarding the number of hunters who harvest deer over bait in his area and encouraged the Department of Conservation to enforce current regulations that prohibit baiting.

RESPONSE: The commission appreciates citizen input on this topic and will continue to enforce current regulations related to baiting. No changes have been made to the rule as a result of this comment.

COMMENT #4: Herb Hilderbrand, St. Charles, expressed support for the proposal to require mandatory testing of all deer taken during the opening weekend of the November portion of the fall firearms deer season in CWD Management Zones. He encouraged the department to notify hunters that they have the option of having samples collected by taxidermists if they wish to have their harvest mounted.

RESPONSE: The commission makes an effort to accommodate hunters who wish to mount their deer. The proposed rule states, "the head with at least six inches (6") of neck attached from any deer... must be presented...."; however, it does not necessarily require that a sample be taken at that time. While they are required to present their harvest for examination at a sample collection station, if a hunter wishes to have their deer mounted, there are other opportunities (e.g., taxidermists) to acquire a sample. A concerted effort will be made to provide sampling information (e.g., sampling locations by county and a list of taxidermists who are willing to collect samples) to hunters prior to the deer hunting season. No changes have been made to the rule as a result of this comment.

COMMENT #5: Eric (last name unknown), location unknown,

expressed opposition to the proposal to ban feeding in CWD Management Zones. He questioned the logic behind prohibiting this activity because literature on the subject indicates the exact methods of disease transmission are unclear.

RESPONSE: There is significant peer-reviewed published literature that indicates CWD is spread both directly from deer to deer and indirectly from infected soil and other surfaces; therefore, anything that unnaturally concentrates deer will increase the likelihood of disease transmission. Given the amount of solid information available, the proposed rule is justified. No changes have been made to the rule as a result of this comment.

COMMENT #6: Eric (last name unknown), location unknown, expressed opposition to the proposal to require mandatory testing of all deer taken during the opening weekend of the November portion of the fall firearms deer season in CWD Management Zones due to potential damage to trophy-quality deer.

RESPONSE: The commission has made an effort in the past and will continue to accommodate hunters when it comes to the current CWD sampling techniques if they wish to mount their deer. The proposed rule states, "the head with at least six inches (6") of neck attached from any deer....must be presented...." but does not necessarily require a sample be taken. While they are required to present their harvest for examination at a sample collection station, if a hunter wishes to have their deer mounted, there are other opportunities (e.g., taxidermists) to acquire a sample. A concerted effort will be made to provide necessary sampling information (e.g., sampling locations by county and a list of taxidermists who are willing to collect samples) to hunters prior to the deer hunting season. No changes have been made to the rule as a result of this comment.

COMMENT #7: John Doe, location unknown, expressed opposition to the proposal to require mandatory testing of all deer taken during the opening weekend of the November portion of the fall firearms deer season in CWD Management Zones. Mr. Doe also questioned the mileage rate estimated in the fiscal note addressing private entity costs, citing the current higher rate of 44.5 cents per mile paid to state employees using a personal vehicle for business purposes and the rate of 54 cents per mile identified by the Internal Revenue Service.

RESPONSE: The current mileage rate set by the Missouri Office of Administration was used to estimate the cost of this proposed rule to private entities. No changes have been made to the rule as a result of this comment.

COMMENT #8: John Doe, location unknown, expressed opposition to the proposal to ban feeding in CWD Management Zones. Mr. Doe questioned the logic behind prohibiting this activity while continuing to allow landowners to plant food plots to attract deer.

RESPONSE: Feed materials and salt licks often congregate wildlife into a singular location on the landscape that may increase the risk of disease transmission. Food plots can attract wildlife, but do not necessarily congregate wildlife into a narrow and singular spot like a pile of corn or a salt block. No changes have been made to the rule as a result of this comment.

COMMENT #9: John Doe, location unknown, expressed support for stricter regulations governing captive cervid facilities to slow the spread of CWD in Missouri.

RESPONSE: The commission appreciates citizen input on this topic. No changes have been made to the rule as a result of this comment.

COMMENT #10: Randy Hastings, Poplar Bluff, expressed support for the proposal to require mandatory testing of deer taken during fall firearms deer season in CWD Management Zones. Mr. Hastings encouraged the department to provide at least two (2) sample collection stations in each county and extend the requirement to include the entire firearms deer season.

RESPONSE: The commission anticipates providing a minimum of two (2) sampling stations per county to minimize inconvenience to hunters. Given that the vast majority of the annual deer harvest occurs during the opening weekend of the November portion of the firearms season, the number of samples collected during that two (2) day period will allow the department to determine disease prevalence in specific areas. No changes have been made to the rule as a result of this comment.

COMMENT #11: Martin Borrok, Novinger, expressed opposition the proposal to require mandatory testing of deer taken during the first two (2) days of the fall firearms deer season in CWD Management Zones due to the inconvenience to hunters.

RESPONSE: The commission anticipates providing a minimum of two (2) sampling stations per county to minimize the inconvenience for hunters. No changes have been made to the rule as a result of this comment.

COMMENT #12: Danny Marshall, Steelville, expressed support for the proposal to require mandatory testing of deer taken during the first two (2) days of the fall firearms deer season in CWD Management Zones but voiced concern that some hunters may not be able to meet the deadline for sample collection and will not Telecheck their deer to avoid complying with this regulation.

RESPONSE: The commission will make every effort to minimize inconvenience for hunters and ensure that hunters have sufficient opportunities to comply with the mandatory sample collection regulation. No changes have been made to this rule as a result of the comment.

COMMENT #13: James Earl Davis, Mokane, expressed opposition to the proposal to ban feeding and require mandatory testing of deer taken during the first two (2) days of the fall firearms deer season in CWD Management Zones. Instead, he suggested that an exception be made for existing salt/mineral licks and for expanding the sampling requirement to include the entire fall deer season.

RESPONSE: The proposed rule does not require removal of existing salt and/or minerals; instead, it restricts placement of new salt licks or minerals within the CWD Management Zones. Given that the vast majority of the annual deer harvest occurs during the opening weekend of the November portion of the firearms season, the number of samples collected during that two (2) day period will allow the department to determine disease prevalence in specific areas. No changes have been made to the rule as a result of this comment.

COMMENT #14: Alvin Theissen, location unknown, expressed opposition to the proposed rule, questioning the seriousness of CWD. Mr. Theissen indicated support for the department's role in setting statewide season dates and limits but opposes enforcement of the antler-point restriction on private property.

RESPONSE: The commission is not proposing to lift the antler-point restriction at this time; however, they appreciate citizen input on all conservation-related topics. With regard to the seriousness of this disease, CWD is transmitted by prions, which are abnormal proteins that attack the nervous system, and is always fatal to the infected animal. Those prions accumulate in the brain, spinal cord, eyes, spleen, and lymph nodes of infected animals. CWD is spread both directly from deer to deer and indirectly from infected soil and other surfaces and once it is established in an area, it is impossible to eradicate. States with CWD must focus on limiting the spread of the disease and preventing its introduction to new areas. There is currently no approved live test for CWD, with the only approved test performed post-mortem. No changes have been made to the rule as a result of this comment.

COMMENT #15: Ken Katzenberger, Barnhart, questioned the need for this regulation due to lack of knowledge regarding causes for the spread of this disease given the unexplained occurrence in counties

not adjacent to the original management zone. He voiced support for additional study to determine the root cause so that it can be specifically addressed.

RESPONSE: Extensive research has been conducted on CWD and a significant amount of peer-reviewed published literature indicates that the disease is spread both directly from deer to deer and indirectly from infected soil and other surfaces and once it is established in an area, it is impossible to eradicate. States with CWD must focus on limiting the spread of the disease and preventing its introduction to new areas. Given the amount of solid information available, the proposed rule is justified. No changes have been made to the rule as a result of this comment.

COMMENT #16: Tim Hunt, Novelty, voiced general support for regulations that would limit the spread of CWD in Missouri. Mr. Hunt voiced opposition to recent regulation changes that reduced the length of the antlerless portion of the fall firearms deer season and the bag limit for antlered deer from three (3) to two (2) per hunter.

RESPONSE: The commission appreciates input from citizens on any conservation-related topic. No changes have been made to the rule as a result of this comment.

ORDER OF RULEMAKING

By the authority vested in the director of the Department of Insurance, Financial Institutions and Professional Registration under section 374.045, RSMo Supp. 2013, and section 382.240, RSMo 2000, the director amends a rule as follows:

SUMMARY OF COMMENTS: A public hearing on this proposed amendment was held February 8, 2016, and the public comment period ended February 8, 2016. At the public hearing, three (3) comments were made.

COMMENT #1: Debbie Doggett, with the Division of Insurance Company Regulation in the Department of Insurance, Financial Institutions and Professional Registration, and Mark W. Stahlhuth, Attorney at Law, each spoke at the public hearing in support of the proposed amendment.

RESPONSE: No changes have been made to the amendment text as a result of this comment.

COMMENT #2: Mark W. Stahlhuth, Attorney at Law, suggested omission of the words “that could produce enterprise risk as defined in section 382.010(4) of the Act” in Form F of the proposed amendment (41 MoReg 32).

RESPONSE: To maintain accreditation under the National Association of Insurance Commissioners (NAIC) Financial Regulation Standards and Accreditation Program, a compelling governmental interest, the referenced language has not been excised since – as noted by the commenter – it was a material part of the NAIC model regulation upon which the proposed amendment was fashioned.

COMMENT #3: Mark W. Stahlhuth, Attorney at Law, expressed a preference that the director exercise discretion to conduct hearings regarding Form A transactions on a case-by-case basis as an efficient use of regulatory resources.

RESPONSE: The statutory authority to conduct discretionary hearings pursuant to section 382.060, RSMo (Supp. 2015) is outside the scope of this rulemaking and therefore no changes have been made to the amendment text as a result of this comment.

Background

The individuals listed in this notice have recently filed applications requesting MoDOT to issue SPE Certificates to exempt them from the physical qualification requirements relating to vision in 49 CFR 391.41(b)(10), or to diabetes in 49 CFR 391.41(b)(3), which otherwise apply to drivers of CMVs in Missouri intrastate commerce.

Under section 622.555, RSMo, MoDOT may issue an SPE Certificate, for not more than a two- (2-) year period, if it finds that the applicant has the ability, while operating CMVs, to maintain a level of safety that is equivalent to or greater than the driver qualification standards of 49 CFR 391.41. Upon application, MoDOT may renew an exemption upon expiration.

Accordingly, the agency will evaluate the qualifications of each applicant to determine whether issuing an SPE Certificate will comply with the statutory requirements and will achieve the required level of safety.
