Table with 29 columns: 1-3: Name of Corporation, Company, or Individual; 4-7: Capital (real and personal) invested; 8-12: Average number of hands employed; 13-17: Wages and Hours of Labor; 18-19: Months in Operation; 20-29: Power used in Manufacture. Includes handwritten entries for 'Williams & Co. Cheese Factory' and 'P. J. Mealy Flouring Mill'.

on 10 months on full time and two months idle. In making the entries under this heading, Mill Supplies and Fuel should be included in Materials. Mill Supplies and Fuel should be included in the case of small shops producing goods, or doing work for the neighborhood only.

REMARKS.—The term "Productive Industry" must be understood, in its largest significance, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, coopering, carpentering, &c. The smallest shop should not be omitted, provided the production reaches \$500 annually, including the cost of materials. COLUMN 2.—The kind of business or the character of product should be described as specifically as possible, thus: Sewing-Machines, Corsets, Furniture, Foundry, Machine Shop, Coopering, Blacksmithing, &c. COLUMN 11.—In many establishments (as carpenter shops, blacksmith shops, &c.) it will be found that no ordinary laborers are employed. In this case column 11 will not be filled. COLUMNS 13 to 17.—All the 12 months of the year should be accounted for in one or more of the columns 13 to 17, thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and 2 months idle. COLUMNS 18 and 19.—These inquiries are of prime importance. Great care and judgment should be exercised in making the returns relative thereto, especially in the case of small shops where book-accounts are not kept. [18.]—The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. [19.]—The value of the product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods, or doing work for the neighborhood only, the value of the product means the price charged at the shop. COLUMN 20.—If the stream is a very small one, mention also the larger stream or river into which it flows. COLUMNS 27 and 28.—Only serviceable boilers and engines are to be reported. COLUMNS 26 and 29.—This is an inquiry of great importance. The best information available should be used in filling these columns.
