</tbody>
</table>

**Remarks:**
- The term "Distilleries" means all firms, in the largest sense, engaged in the production of spirits or other distilled liquors.
- The term "Articles of Manufac." means all materials, labor, and other expenses necessary to the production of the product.
- The term "Price per Bar." means the price paid for each barrel of the product.
- The term "Barrels" means the number of barreled units of the product.
- The term "Per cent." means the percentage of the total value of the product.
- The term "Weight in cwt." means the weight of the product in hundredweight.

---

**Legend:**
- (1) Bottling and Canning Factories.
- (2) Cheese and Butter Factories.
- (3) Flouring and Grist Mills.
- (4) Salt Works.
- (5) Lumber Mills and Saw Mills.
- (6) Brick Yards and Tile Works.
- (8) Coal Mines.
- (9) Agricultural Implement Works.
- (10) Quarries.

---

**County:**

- **Clinton County:**
  - J. H. Smith: Bourbon, 120 barreled, 60 per cent.
  - M. J. Ingle: Whisky, 120 barreled, 60 per cent.

---

**Remarks:**

</table>

Note: The term "Manufacturing Industry" must be understood to include not only all factories and large works, but also the mechanical trades, as blacksmithing, carpentering, etc. The smallest shops should not be omitted, provided the production makes 5000 annually, including the cost of materials. Enumerators will take pains to reach all of the productive establishments, large and small, within the several districts.

Columns 5 to 10 for the entire 12 months of the year should be added to the above or any of the columns 11 to 15 for the year in which the shop is located. If any shop is not in operation for the entire year, then column 10 should be filled in, or in the case of a shop which has been in operation for less than a year, column 11 should be filled in, and the value of the product in the year of operation should be multiplied by the ratio of the number of months the shop has been in operation to the total number of months in the year.
