**REMARKS:** The term "Manufactures" must be understood to include not only all factories and large works, but also the mechanical trades, as tailormaking, carpentering, &c. The work to be estimated, provided the product manufactured is sold anywhere, including the use of materials. Enumerators will take pains to note all of the products established within the town, and only those that are actually carried on in the town. The value of the product, at the factory, must be entered here, and must include all labor and materials used. The value of the product, at the factory, must be entered here, and must include all labor and materials used.

**CHARTS:**

- Chart 1: The product of each manufacturer must be classified as specifically as possible, under one of the following heads: Grains; Crops; Fruits; Forage; Metals; Minerals; Manufacturing, Banking, &c.

- Chart 2: The value of the product must be entered in full, and if it be a mixed or unmixed product, the value must be entered in full.

- Chart 3: The value of the product, at the factory, must be entered in full, and if it be a mixed or unmixed product, the value must be entered in full.

- Chart 4: The value of the product, at the factory, must be entered in full, and if it be a mixed or unmixed product, the value must be entered in full.

- Chart 5: The value of the product, at the factory, must be entered in full, and if it be a mixed or unmixed product, the value must be entered in full.

- Chart 6: The value of the product, at the factory, must be entered in full, and if it be a mixed or unmixed product, the value must be entered in full.
