EXPLANATIONS.—The term "Productive Industry" must be understood to be larger in signification to include not only of factories and large works, but also the small mechanical trades, blacksmithing, carpentering, etc. The smallest shop should not be omitted, provided it is a product of industry, including the cost of materials. Returns will take place to read all of the productive establishments, large and small, within the actual limits.

Note: The term "Productive Industry" must be understood to include not only factories and large works, but also small mechanical trades, blacksmithing, carpentering, etc. The smallest shop should not be omitted, provided it is a productive establishment, including the cost of materials. Returns will take place to read all productive establishments, large and small, within the actual limits.

Chapters 11 and 12—They express the size of the industry. The size and judgment should be calculated in the same manner as cheating, and the same rates on all facts, or 8 months on all facts, and 10 months on all materials.
