The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz:

- Boot and Shoe Factories
- Cooperages and Barrels
- Machine Shops
- Iron Works
- Spinning and Weaving Mills
- Brick Kilns and Tile Works
- Saw Mills
- Coal Mines
- Agricultural Implement Works
- Quarters

SCHEDULE 3 - MANUFACTURES.—Products of Industry in the State of Missouri, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Notes:—The term "Productivity" must be understood to be the ratio of product to the labor employed, the cost of materials, as blacksmithing, coopering, carpentering, etc. The master shop should not be worked, provided the product is made from 80% annually, including the cost of materials. Enumerators will take pains to mark all of the productive establishments, large and small, within their census district.

Columns 11 to 17 should be filled in to show the number of hands employed. It will be seen that the number is increased by the whole or half of the time of work. In this case 12 persons will not be filled in, but 12. The number of hands employed should be as nearly as possible the same as the number of hands paid. The number of hands employed includes all persons employed in the establishment, from the master and his family to the laborers. In the case of small shops producing goods, or doing work for the neighborhood, only the value of the product minus the price charged for the labor of the shop.

Column 20 and 21.—This is the duty of great importance. The best information should be used in filling these columns.
### SCHEDULE 3—Manufactures.

Products of Industry in Richmond, in the County of Richmond, State of Missouri, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Post Office: Richmond

<table>

**Remarks:**

- The term "Manufacturing Industry" must be understood, in this statistical return, to include not only all factories and large works, but also the mechanical trades, as blacksmithing, carpentering, &c. The number of hands should not be counted, provided the product is made on a manufacturing scale.
- The capital should be stated as accurately as possible. The term "power" includes all engines, whether water or steam, or other engines.
- The name of the manufacturer or corporation should be stated as accurately as possible.
- The number of hands employed includes all, whether journeymen, apprentices, or others.
- The average number of hands employed is the average number of hands employed during the year.
- The average daily earnings of each hand is the average daily earnings of each hand during the year.
- The power used for manufacture includes all engines, whether water or steam, or other engines.

**Columns 11 to 24—All the figures in these columns should be expressed in the following manner: 1 to 9; 10 to 199; 200 to 1999; 2000 to 19999; 20000 to 199999; or 200000 to 1999999.**

**Columns 25 and 26—These columns are of great importance. The data are compiled on the assumption that all manufacturers are not to be included in the returns. The total of the product in the case of all manufacturers is the total of the product in the case of all manufacturers, including the product of all the manufacturers.**

**Columns 27 and 28—This is an important column. The best information available should be used in filling these columns.
The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz:

(1.) Boot and Shoe Factories.
(2.) Canvas and Hatter Factories.
(3.) Flouring and Grist Mills.
(4.) Salt Works.
(5.) Lumber Mills and Saw Mills.
(6.) Brick Yards and Tile Works.
(7.) Paper Mills.
(8.) Coal Mines.
(9.) Agricultural Implement Works.
(10.) Quarries.

**SCHEDULE 3.—MANUFACTURES.—Products of Industry in 129, in the County of May, State of Missouri, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.**

Post Office: Richmond

**Notes:**

- The term "Product of Industry" must be understood to include not only all factories and large works, but also the mechanical trades, in blacksmithing, carpentering, &c. The anvil shop should not be entered, provided the property moves on wheels as well as on the ground.
- The kind of cotton in the state of product should be described as specifically as possible, from Bolling, Durham, Cross, Parsons, Fossandy, Mullah, Hop, Coopering, Blacksmithing, &c.
- In all cases, the value of property at place of manufacture should be entered as specifically as possible, including all materials, tools, implements, &c.
- The value of property at place of manufacture should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of hands employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of men employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of women employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of boys employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of girls employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of apprentices employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of journeymen employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of men employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of women employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of boys employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of girls employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of apprentices employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of journeymen employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of men employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of women employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of boys employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of girls employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of apprentices employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of journeymen employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of men employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of women employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of boys employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of girls employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of apprentices employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of journeymen employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of men employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of women employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of boys employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of girls employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of apprentices employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of journeymen employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of men employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of women employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of boys employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of girls employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of apprentices employed should be entered as specifically as possible, including all materials, tools, implements, &c.
- The number of journeymen employed should be entered as specifically as possible, including all materials, tools, implements, &c.
The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and on the General Schedule, viz.:

1. Dye and Shoe Factories.
2. Bessemer and Blast Furnaces.
3. Ore and Iron Works.
4. Iron and Steel Works.
5. Lumber Mills and Saw Mills.
10. Quarries.

SCHEDULE 3.—MANUFACTURES.—Products of Industry in the County of , State of , during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by the enumerator.

Remarks:

The term "Manufacture" is used in its largest signification, to include not only all factories and large works, but also the mechanic trades, such as blacksmithing, coopering, carpentering, etc. The smallest shop should not be excluded, provided the produce exceeds $500 annually.

Column 6—The kind of horses or the character of the product should be described as accurately as possible, thus: Cutting Machines, Grooves, Ladle, Packing, Machine-Shop, Carpenter, Blacksmithing, etc.

Column 8—The description of the process by which the product is made should be given, thus: Rolling-mill, Stamp, Die, etc., to be read from an ordinary dictionary. In the case of articles it will not be filled.

Column 11—The description of the process by which the product is made should be given, thus: Rolling-mill, Stamp, Die, etc., to be read from an ordinary dictionary. In the case of articles it will not be filled.

The following notes are intended to guide the enumerator in filling out the schedule:

1. The product of the product, in the case of small and insignificant producing for a distant market, assume the wholesale price of the goods. In the case of small shops producing goods for local use, the neighborhood only, the value of the product should be given.

2. If the census is a very small one, mention also the larger amount or close loss which it shows.
The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz: (1.) Small and Shoe Factories. (2.) Grain and Flouring Mills. (3.) Lumber Mills and Saw Mills. (4.) Brick Yards and Tile Works. (5.) Paper Mills. (6.) Coal Mines. (7.) Agricultural Implement Works. (8.) Quarry.

**SCHEDULE 3.—MANUFACTURES.—Products of Industry in Richmond, in the County of Day, State of Miami, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.**

**Notes:**
- The nature of Industry must be understood to exclude not only all factories and large works, but also the mechanical trades, as blacksmithing, carpentering, etc. The verbal description should not be omitted, provided the power used in manufacture is accurately described, including the cost of materials. Precisions will take pains to teach all of the products of industry, large and small, within their several divisions.
- The name of the employer should be entered as accurately as possible, with the nature of the industry.
- The power used in manufacture should be described as accurately as possible, even if not known, or only partly known. The expense of materials should be accurately described, including the cost of labor.
- The description of the works should include all of the machinery and tools used in the manufacture, and the amount of labor required to maintain the works.

**Explanations:**
- The cost of materials should be accurately described, including the cost of labor.
- The description of the works should include all of the machinery and tools used in the manufacture, and the amount of labor required to maintain the works.

**Notes:**
- The description of the works should include all of the machinery and tools used in the manufacture, and the amount of labor required to maintain the works.

**Notes:**
- The description of the works should include all of the machinery and tools used in the manufacture, and the amount of labor required to maintain the works.
The following classes of Manufacturing Establishments will be reported on a SPECIAL MANUFACTURING SCHEDULE, and not on this Schedule, viz:

(1.) Boot and Shoe Factories.
(2.) Glove and Leather Factories.
(3.) Flouring and Grist Mills.
(4.) Salt Works.
(5.) Lumber Mills and Saw Mills.
(6.) Brick Yards and Tile Works.
(7.) Paper Mills.
(8.) Coal Mines.
(9.) Agricultural Implement Works.
(10.) Quarries.

SCHEDULE 3.—Manufacutes.—Products of Industry in __________, in the County of __________, State of Missouri, during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Remarks — The term "Manufacturing Industry" must be understood to include not only all factories and large works, but also the mechanical trades, as blacksmithing, casting, superintending, &c. The smallest shop shall not be entered, provided the products therein made be sold mainly for local consumption.

Columns 2, 4, 5, &c. are to be entered in full, except the last column, in which fractional parts of the power should be entered, to the nearest half horsepower, or the nearest whole horsepower, as the case may be.

Columns 6, 7, &c. are to be entered in full, except in the case of the columns 6 to 12, where the number of hands employed in the work of the shop should be entered.

The value of the product, in the case of mills and factories, producing for a distant market, is the wholesale price of the goods. In the case of small shops producing goods for home use, for the neighborhood only, the value of the product means the price charged for the goods.
