AGRICULTURAL IMPLEMENTS.

Table with 25 columns: 1-3 (Name, Capital, Hands), 4-6 (Average Number of Hands), 7-11 (Wages and Hours of Labor), 12-15 (Months in Operation), 16-25 (Power Used in Manufacture). Includes handwritten entries for 'Philips David' and 'Robertson Albert'.

AGRICULTURAL IMPLEMENTS—Continued.

Table with 22 columns: 26-29 (Materials), 30-51 (Products: Serrers and Planters, Implements of Cultivation, Harvesting Implements). Includes handwritten values for materials.

AGRICULTURAL IMPLEMENTS—Continued.

Table with 23 columns: 52-77 (Harvesting Implements—Continued, Seed Separators, Miscellaneous), 78-82 (Specify number and kind of other products), 83 (Value of all other products), 84 (Total value of all products). Includes handwritten entries like 'Wagner Hack'.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.
