

CRISIS OFFICE OCT 23 1880

Supervisor's Dist. No. 22
Enumeration Dist. No.

Special Schedules of Manufactures—Nos. 9 and 10.

SLAUGHTERING AND MEAT-PACKING—SALT WORKS.

Products of Industry in St. Louis, in the County of St. Louis, State of Missouri
during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

J. H. Hawley

SLAUGHTERING AND MEAT-PACKING.

Table with 23 columns: NAME OF CORPORATION, CAPITAL, AVERAGE NUMBER OF HANDS EMPLOYED, WAGES AND HOURS OF LABOR, MONTHS IN OPERATION, MATERIALS. Includes entries for Francisco Burhoff, Joseph Smith, etc.

SLAUGHTERING AND MEAT-PACKING—Continued.

Table with 46 columns: MATERIALS—Continued, PRODUCTS, POWER USED IN MANUFACTURE. Includes columns for animal values, pounds of meat, and power usage.

SALT WORKS.

Table with 23 columns: NAME OF CORPORATION, CAPITAL, AVERAGE NUMBER OF HANDS EMPLOYED, WAGES AND HOURS OF LABOR, MONTHS IN OPERATION, IF BY BOILING PROCESS, MACHINES.

SALT WORKS—Continued.

Table with 43 columns: IF BY BOILING PROCESS—Continued, IF BY SOLAR EVAPORATION, PRODUCT, POWER USED IN MANUFACTURE.

NOTES—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle.

CENSUS OFFICE, DIST. DISTRICT

Supervisor's Dist. No. _____

Enumeration Dist. No. _____

Special Schedules of Manufactures—Nos. 9 and 10.

SLAUGHTERING AND MEAT-PACKING—SALT WORKS.

Products of Industry in St. Louis, in the County of _____, State of Missouri during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

J. H. Hawley

SLAUGHTERING AND MEAT-PACKING.

Table with columns: NAME OF CORPORATION, COMPANY, OR INDIVIDUAL PRODUCING TO THE VALUE OF \$500 ANNUALLY; CAPITAL (REAL AND PERSONAL) INVESTED IN THE BUSINESS; AVERAGE NUMBER OF HANDS EMPLOYED; WAGES AND HOURS OF LABOR; MONTHS IN OPERATION; MATERIALS.

SLAUGHTERING AND MEAT-PACKING—Continued.

Table with columns: MATERIALS—Continued; PRODUCTS; POWER USED IN MANUFACTURE.

SALT WORKS.

Table with columns: NAME OF CORPORATION, COMPANY, OR INDIVIDUAL PRODUCING TO THE VALUE OF \$500 ANNUALLY; CAPITAL (REAL AND PERSONAL) INVESTED IN THE BUSINESS; AVERAGE NUMBER OF HANDS EMPLOYED; WAGES AND HOURS OF LABOR; MONTHS IN OPERATION; IF BY BOILING PROCESS; MACHINES.

SALT WORKS—Continued.

Table with columns: IF BY BOILING PROCESS—Continued; IF BY SOLAR EVAPORATION; PRODUCT; POWER USED IN MANUFACTURE.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

CENSUS OFFICE RECEIVED OCT 25 1880

M D Allen
Enumerator

SLAUGHTERING AND MEAT-PACKING.

Table with 23 columns: NAME OF CORPORATION, CAPITAL, HANDS EMPLOYED, WAGES AND HOURS OF LABOR, MONTHS IN OPERATION, MATERIALS. Includes handwritten entry for 'D.A. Spuller' with values like 8,000, 12, 4, 10, 10, 200, 1.75, \$2,400, 12, 7300, 250, \$43000.

SLAUGHTERING AND MEAT-PACKING—Continued.

Table with 22 columns: MATERIALS—Continued, PRODUCTS, POWER USED IN MANUFACTURE. Includes handwritten values for materials and power usage.

SALT WORKS.

Table with 22 columns: NAME OF CORPORATION, CAPITAL, HANDS EMPLOYED, WAGES AND HOURS OF LABOR, MONTHS IN OPERATION, IF BY BOILING PROCESS, MACHINES.

SALT WORKS—Continued.

Table with 22 columns: IF BY BOILING PROCESS—Continued, IF BY SOLAR EVAPORATION, PRODUCT, POWER USED IN MANUFACTURE.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

1	2	3	4			6					11				15					19				
			AVERAGE NUMBER OF HANDS EMPLOYED.			WAGES AND HOURS OF LABOR.					MONTHS IN OPERATION.				IF BY BOILING PROCESS.									
			Males above 15 years.	Females above 15 years.	Children and youth.	Number of hours in the ordinary day of labor.	Average day's wages for a skilled mechanic.	Average day's wages for an ordinary laborer.	Total amount paid in wages during the year.	On full time.	On three-quarter time only.	On half time only.	Idle.	Number of blocks.	Number of boilers.	Aggregate capacity in gallons.	Number of kettles.	Aggregate capacity in gallons.	Number of pans.	Aggregate capacity in gallons.				

SALT WORKS—Continued.

23				26				29			30		31		32		33		34						
IF BY BOILING PROCESS—Continued.				IF BY SOLAR EVAPORATION.				PRODUCT.			POWER USED IN MANUFACTURE.														
Number of tons coal.	Value.	Number of cords wood.	Value.	Value of all other materials.	Total value of all materials.	Number of vats.	Aggregate area in square feet.	Total value of all materials.	Number of bushels salt.	Value.	On what river or stream? (See note below.)	Height of fall, in feet.	Number.	Kind.	Revolutions per minute.	Horse-power.	Number of boilers.	Number of engines.	Horse-power.						

NOTES—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

Wm. H. Prockmator

SLAUGHTERING AND MEAT-PACKING.

Table with columns: NAME OF CORPORATION, CAPITAL, AVERAGE NUMBER OF HANDS EMPLOYED, WAGES AND HOURS OF LABOR, MONTHS IN OPERATION, MATERIALS. Includes handwritten entries for 'Herry, Harle' and 'Annis Martin'.

SLAUGHTERING AND MEAT-PACKING—Continued.

Table with columns: MATERIALS—Continued, PRODUCTS, POWER USED IN MANUFACTURE. Includes handwritten entries for values like \$1950, \$1200, \$300, \$270, 2996, 2000.

SALT WORKS.

4996

Table with columns: NAME OF CORPORATION, CAPITAL, AVERAGE NUMBER OF HANDS EMPLOYED, WAGES AND HOURS OF LABOR, MONTHS IN OPERATION, IF BY BOILING PROCESS, MACHINES.

SALT WORKS—Continued.

Table with columns: IF BY BOILING PROCESS—Continued, IF BY SOLAR EVAPORATION, PRODUCT, POWER USED IN MANUFACTURE.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.

during the twelve months beginning June 1, 1879, and ending May 31, 1880, as enumerated by me.

Louis Jones

SLAUGHTERING AND MEAT-PACKING.

Table with columns for Name of Corporation, Capital, Average Number of Hands Employed, Wages and Hours of Labor, Months in Operation, and Materials. Includes entries for Hy. Fineman, William Jones, Baumgardner, Oswald Matt, William Kelley, and Daniel A. Lock.

SLAUGHTERING AND MEAT-PACKING—Continued.

Table with columns for Materials, Products, and Power Used in Manufacture. Includes sub-sections for 'IF WATER IS USED' and 'IF STEAM-POWER IS USED'.

SALT WORKS.

Table with columns for Name of Corporation, Capital, Average Number of Hands Employed, Wages and Hours of Labor, Months in Operation, and IF BY BOILING PROCESS.

SALT WORKS—Continued.

Table with columns for IF BY BOILING PROCESS—Continued, IF BY SOLAR EVAPORATION, PRODUCT, and POWER USED IN MANUFACTURE.

NOTES.—All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle. The inquiries in respect to the values of material and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto. The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included. The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the neighborhood only, the value of the product means the price charged at the shop. POWER USED IN MANUFACTURE.—If the stream is a very small one, mention also the larger stream or river into which it flows. Only serviceable boilers and engines are to be reported. HORSE-POWER.—This is an inquiry of great importance. The best information available should be used in filling these columns.
