Acquisition Information: Gift; Accession #1982-0095

Processing Information: Processing completed by EW on 12/14/2016.

HISTORICAL AND BIOGRAPHICAL NOTES

The Carthage Marble Corporation was formed during Reconstruction outside of Carthage, Missouri, Jasper County. In the 1890s the Company supplied the marble used to build the Jasper County Courthouse. The company acquired Lautz-Missouri Marble Company in 1927. Lautz had been well known because it contracted with John Gill and Son Company in 1913 to supply the marble for the new State Capitol Building. This and five other companies were consolidated with the Carthage Marble Company in 1927.

Not only did Carthage Marble harvest from the nearby quarries, the Corporation also finished marble quarried from other mines in the United States and the world. By the 1960s and '70s the

demand for marble slowed to a trickle and the Corporation – now called Carthage Crushed Limestone Company – had to change with the times. It closed down the marble division and focused solely on crushed limestone.

SERIES

Carthage Marble Corporation Collection, 1913-1980

Scope and Content

In 1980 MO Senator Dick Webster visited the Carthage Marble Corporation and brought back some historic photographs and modern written histories of the marble business. He loaned the photographs to Capitol historian Bob Priddy who in turn had copies of the photographs made by Wright Studio in Jefferson City. Priddy returned the originals then donated the written records and copy prints to the Archives with the understanding that Carthage Marble gives Priddy and the Archives permission to duplicate.

Item #2 and the three photographs are digitized and available on the Z Drive.
