### MANUSCRIPT COLLECTIONS

#### Bagnell Dam Photograph Collection

*Abstract:* Photographs of the construction of Bagnell Dam on the Osage River in Central Missouri, resulting in a large hydroelectric plant and the Lake of the Ozarks, 1929-1952.

*Extent:* 4 1/3 cubic feet

*Physical Description:* Photographs, Negatives

*Location:* Missouri State Archives; Stacks

### ADMINISTRATIVE INFORMATION

*Alternative Formats:* TIFs and JPGs

*Access Restrictions:* None

*Publication Restrictions:* None

*Preferred Citation:* [description of item], [date]; *Bagnell Dam Photograph Collection*, Record Group 998.285; Missouri State Archives, Jefferson City.

*Acquisition Information:* Gift with deed; Accession #2000-0175

*Processing Information:* Processing completed by LJ. Updated by EW on 05/18/2017 & 03/24/2021.

### HISTORICAL AND BIOGRAPHICAL NOTES

“The Lake of the Ozarks is one of the largest man-made lakes in the United States. With a surface area of 55,000 acres, stretching 92 miles from end to end, and over 1,150 miles of shoreline, this lake brings in millions of dollars in tourism to Missouri each year. The lake is a direct result of the creation of the Bagnell Dam, built by the Union Electric Light and Power Company of St. Louis (now AmerenUE) between 1929 and 1931. Bagnell Dam, named for the closest town when construction first started, is a 148-foot tall, 2,543 foot-long concrete gravity dam with a 520-foot long spillway and a 511-foot long power station. The Stone and Webster

Engineering Corporation designed and engineered the dam on the Osage River at a cost of more than \$30 million. At the time of Bagnell Dam's construction, the Osage River valley was lush and fertile. Damming of the Osage River caused the river to snake back on itself, submerging the timber and farmland. The project also caused the eventual destruction of Old Linn Creek, then the Camden County seat. Union Electric Light and Power Company bought the land of many of the residents and the townsfolk left to form Linn Creek and Camdenton. These new towns thrived because of creation of the Lake of the Ozarks and its burgeoning tourist economy."

## PHOTOGRAPHS, 1929-1952

*Extent:* 4 1/3 cubic feet

*Arrangement:* By size then by negative number (negatives are mostly chronological)

### Scope and Content

This collection is made up of 845 black-and-white images taken during and after the construction of Bagnell Dam. Each image folder contains a negative and a print. The collection also includes some images of flooding in the mid-1930s as well as a power station addition constructed in 1951-1952.

JPG surrogates of these photographs are on the Archives' Missouri Digital Heritage website at [http://www.sos.mo.gov/archives/mdh\\_splash/default.asp?coll=bagnell](http://www.sos.mo.gov/archives/mdh_splash/default.asp?coll=bagnell). TIF images are on the Z Drive.

### Container List

See the Excel spreadsheet for a complete item listing of the photographs.
