| 6 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

NOTES.
All the 12 months of the year should be accounted for thus: 12 months on full time; or 8 months on full time and 4 months on half time; or 10 months on full time and two months idle.
The inquiries in respect to the values of materials and of product are of prime importance. Great care and judgment should be exercised in making the returns relative thereto.
The cost of Superintendence, Rent, Freight of goods to market, and other general expenses of a manufacturing establishment are not to be included in Materials. Mill Supplies and Fuel should be included.
The value of the Product, in the case of mills and factories producing for a distant market, means the wholesale price of the goods. In the case of small shops producing goods or doing work for the
neighborhood only, the value of the product means the price charged at the shop.
POWER USED IN MANUFACTURE. - If the stream is a very small one, mention also the larger stream or river into which it flows.
Only serviceable boilers and engines are to be reported
HORSE-POWER. - This is an inquiry of great importance. The best information available should be used in filling these columns.
