Title 11—DEPARTMENT OF PUBLIC SAFETY Division 45—Missouri Gaming Commission Chapter 1—Organization and Administration

ORDER OF RULEMAKING

By the authority vested in the Missouri Gaming Commission under sections 313.004 and 313.805, RSMo 2000, the commission amends a rule as follows:

11 CSR 45-1.090 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on February 15, 2005 (30 MoReg 376). Changes have been made in the text of the proposed amendment, so it is reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Missouri Gaming Commission (MGC) received one (1) letter of comment on proposed rule 11 CSR 45-1.090 Definitions. Additionally, a public hearing was held at which individuals/groups were provided the opportunity to express their agreement with or concern about the proposed rule as written. No one appeared at the hearing.

COMMENT: Ms. Sandra McKinley, Senior Regulatory Compliance Analyst for International Game Technology (IGT), submitted the following written comments on behalf of the gaming industry: Please clarify if the definition for "critical program storage media" is adding requirements for external third-party verification and security seals on equipment listed that is currently not held to these standards. For example, IGT's central system does not play a role in the outcome of games, is housed in a secure room environment, and is presently not required to have security seals. If implemented, would this new definition then require IGT to maintain seals on a system that is already housed in a secure environment?

RESPONSE AND EXPLANATION OF CHANGE: The purpose of the proposed amendment is to better define and clarify storage media that should be verified and maintained within a secure environment. Components presently exist within the central system's secure environment, specifically the Accounting Data System Communicators, which are verified and sealed by the MGC. The MGC will continue to require this level of control. Realizing some components that are required to be verified may not have seals attached thereto, the MGC will, therefore, amend the proposed amendment.

11 CSR 45-1.090 Definitions

(3) Definitions beginning with C—

(I) Critical program storage media—Any program storage media that contains software that may affect the integrity of gaming, including but not limited to game, accounting, system, and peripheral firmware devices involved in or which significantly influence the operation and calculation of game play, game display, game result determination, game accounting, revenue, or security, and which must be verified utilizing an external third-party methodology approved by the commission and which may, as determined by the commission, have security seals attached thereto.

Title 11—DEPARTMENT OF PUBLIC SAFETY Division 45—Missouri Gaming Commission Chapter 5—Conduct of Gaming

ORDER OF RULEMAKING

By the authority vested in the Missouri Gaming Commission under sections 313.004 and 313.805, RSMo 2000, the commission amends a rule as follows:

11 CSR 45-5.200 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on February 15, 2005 (30 MoReg 376–379). Changes have been made in the text of the proposed amendment, so it is reprinted here. This proposed

amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: The Missouri Gaming Commission (MGC) received one (1) letter of comment on proposed amendment 11 CSR 45-5.200 Progressive Slot Machines. Additionally, a public hearing was held at which individuals/groups were provided the opportunity to express their agreement with or concern about the proposed amendment as written. No one appeared at the hearing.

COMMENT: Ms. Sandra McKinley, Senior Regulatory Compliance Analyst for International Game Technology (IGT), submitted the following written comments on behalf of the gaming industry. IGT respectfully requests the commission define the term "the amount" used in subsection (1)(C); we interpret this as "the amount of wagers" or "amount-in."

RESPONSE AND EXPLANATION OF CHANGE: The term "the amount" as used in the proposed amendment means "the amount of wagers." The MGC will, therefore, amend the proposed amendment.

COMMENT: The phrase "aggregate prize" as used in (1)(D) implies that all slot machines connected to wide-area progressive systems offer aggregate prizes; however, IGT has slot machines connected to wide-area systems that do not award aggregate prizes. IGT suggests the commission consider the phrases "progressive payout amount" and "fixed payout amount" an alternative, to cover non-aggregate and aggregate prizes.

RESPONSE AND EXPLANATION OF CHANGE: The term "aggregate prize(s)" appears in the original rule. The term actually refers to the immediately preceding definition (1)(C), "Progressive jackpot." The commission, therefore, deems it more appropriate to use the terminology for which a definition is provided and amends the proposed amendment by removing the term "aggregate prize(s)," replacing it with the term "progressive jackpot."

COMMENT: Section (4) requires approval of the commission to move the incremental amount of one (1) progressive jackpot to another. We would like to point out the difficulties with regard to timing and obtaining appropriate approval. For example, a jackpot could hit after IGT's request and prior to the commission issuing approval. This could have the affect of a negative reserve resulting in a direct financial loss to IGT. Will this proposed change prohibit IGT from discontinuing a system at a primary jackpot, but in the interim of receiving written approval from the commission? If so, please clarify how IGT may avoid this occurrence.

RESPONSE: While written approval from the commission was not articulated in the original rule, it was standard protocol. IGT has shut down thirteen (13) wide-area progressive systems during the past four (4) years, distributing the incremental amounts to other progressive jackpots. Written approvals have not posed a problem for either IGT or the commission; therefore the commission sees no need to amend the proposed rule.

COMMENT: Subsection (5)(B) of this rule, requires that in the event of a system failure "the authorized system provider take a reading of the jackpot amount on all excursion gambling boats connected to the system prior to bringing the failed system back online." IGT seeks clarification as to how this requirement would be met if not all machines connected to the system can be brought back online simultaneously.

RESPONSE: The purpose of this provision is twofold; (1) to ensure that when a system is brought back online the value on each progressive meter reads no less than when the system failed, and (2) when brought back online meters have incremented to the value of the jackpot at the immediately preceding polling cycle or data transfer. The commission sees no necessity to amend the rule. COMMENT: In subsection (5)(C), licensees are required to keep a hard copy log of all events for a period of at least sixty (60) days. IGT respectfully requests the commission consider expanding the language to include "... a hard or electronic copy ..." as IGT's proposed EMS system stores data electronically.

RESPONSE: The commission finds that the request in the comment for amendment to this subsection has merit. However, since no amendment was originally proposed to this particular subsection, it is not open for comment at this time. The commission would consider making a change in the language of the subsection in the future during a subsequent amendment process.

COMMENT: Beginning with paragraph (5)(D)2., and throughout the remainder of this section, the phrase "polling cycle" has been replaced with "data transfer." We respectfully request the commission provide a definition of the term "data transfer." Additionally, "polling cycle" has a defined time frame; will the commission define a time frame under "data transfer?"

RESPONSE AND EXPLANATION OF CHANGE: The real-time coin-in polling and the ten (10)-minute interval meter polling are time frames established by the authorized system provider and set forth in their system of internal controls; they are not time frames established by the commission. The term "data transfer" was changed to accommodate other potential system providers and was meant to include any methodology by which data is transmitted to the central system. The commission has no issue with including both terms in the rule to better clarify requirements.

COMMENT: Paragraph (5)(E)1. relating to the approval of widearea progressive systems added language that allows the commission to "review and approve" testing results from an independent laboratory selected by the commission. System approval is currently an administrative function of the commission; does this amendment alter that authority, (i.e., is formal commission approval now required)? Also, we are interpreting this as applicable to "initial system approvals" and that changes to systems currently in use will be dealt with in a different manner. Please clarify that this is the commission's intent.

RESPONSE: The existing regulation provides that during the initial approval stage underlying devices are tested and approved by the commission. Testing is actually performed by the independent testing laboratory employed by the commission with the commission rendering administrative oversight and approval. The proposed amendment does not change this practice; existing procedures are merely clarified. System changes will continue to be handled as in the past.

COMMENT: Subsection (5)(M) states that an agent or employee must be licensed to work on any component of the system. Please clarify the impact of this requirement for monitoring rooms located outside the state of Missouri.

RESPONSE: The rule is applicable whether the monitoring room is within or outside the state of Missouri.

COMMENT: In section (8), the terms "multi-game" and "multidenomination devices" are used. We respectfully ask the commission clarify the difference between these terms. Further, subsection (8)(A) requires a multi-game or multi-denom machine, where not all games and/or denominations are progressive, to meter per denomination ad per game. Our multi-game/multi-denom products do not meter to that granularity, and if a paytable is enabled as progressive at one (1) denom and non-progressive at a different denom, the progressive-only meters cannot be derived from the gaming machine. It is IGT's position that meters of this granularity are the responsibility of the progressive controller, not the gaming machine. As such, IGT respectfully requests the subsection (8)(A) be removed. Also, in (8)(B) the sentence ends with the connector "and" leading into subsection (8)(C); however, in reading this section it would seem more appropriate for an "or" to be in this place. Please clarify if it is the commission's intent to place the word "and" here, thereby

mandating progressive slot machines meet all three (3) requirements listed in (8).

RESPONSE: The metering required in (8)(A) addresses the computerized slot monitoring system's ability to account for each denomination and game. If the slot monitoring system lacks that ability, then all games on the device must contribute to the progressive jackpot. No requirement is placed on the gaming device's metering capability. Further, section (8) is correct as written in the proposed amendment; all three (3) elements must be met. Therefore, no change is required to the rule as proposed.

COMMENT: Section (9) has established an odds limit that previously did not exist. IGT respectfully requests the commission reconsider placing such odds limit or optionally placing any odds limit mandate in a policy that would allow the commission more flexibility for determining what is appropriate for the state.

RESPONSE: The commission feels odds of one (1) in fifty (50) million to be sufficiently high to accommodate any system, platform, or theme to be offered within our jurisdiction. Further, the commission feels the odds limit should be set forth through the rulemaking process and available publicly. The phrase "unless specifically approved in writing by the commission" included in the wording of the proposed rule provides the commission sufficient flexibility to determine if higher odds are appropriate in specific situations.

11 CSR 45-5.200 Progressive Slot Machines

(1) As used in this rule—

(C) Progressive jackpot means a slot machine payoff that increases over time solely as a function of the amount of wagers played on a machine or group of machines;

(D) Wide-area progressive means a system of slot machines with a progressive jackpot linked across a communication network approved by the commission which connects separate gaming establishments licensed or approved by the commission; and

(5) The operation of wide-area progressive slot machines is allowed subject to compliance with all other requirements of this rule, in addition to the following conditions:

(D) Jackpot verification procedures must include the following:

1. When a jackpot is won, the licensee authorized to provide the wide-area system may inspect the machine when accompanied by a gaming agent. The inspection shall include examining the critical program storage media, the error events received by the central system, and any other data which could reasonably be used to ascertain the validity of the jackpot;

2. The central system shall produce reports that will clearly demonstrate the method of arriving at the payoff amount. This shall include the amount contributed beginning at the polling cycle or data transfer immediately following the previous jackpot and will include all amounts contributed up to, and including, the polling cycle or data transfer, which includes the jackpot signal. Amounts contributed to the system before the jackpot message is received will be deemed to have been contributed to the progressive amount prior to the current jackpot. Amounts contributed to the system subsequent to the jackpot message being received will be deemed to have been contributed to the system subsequent to the jackpot message being received will be deemed to have been contributed to the progressive amount of the next jackpot;

3. The jackpot may be paid in installments as long as each machine clearly displays the fact that the jackpot will be paid in installments. In addition, the number of installments and time between installments must be clearly displayed on the face of the machine in a non-misleading manner that is approved by the commission; and

4. Two (2) jackpots that occur in the same polling cycle or data transfer will be deemed to have occurred simultaneously and therefore, each "winner" shall receive the full amount shown on the meter unless another method of operation has been approved in advance by the commission;
