

**T**his section will contain the final text of the rules proposed by agencies. The order of rulemaking is required to contain a citation to the legal authority upon which the order of rulemaking is based; reference to the date and page or pages where the notice of proposed rulemaking was published in the *Missouri Register*; an explanation of any change between the text of the rule as contained in the notice of proposed rulemaking and the text of the rule as finally adopted, together with the reason for any such change; and the full text of any section or subsection of the rule as adopted which has been changed from that contained in the notice of proposed rulemaking. The effective date of the rule shall be not less than thirty (30) days after the date of publication of the revision to the *Code of State Regulations*.

**T**he agency is also required to make a brief summary of the general nature and extent of comments submitted in support of or opposition to the proposed rule and a concise summary of the testimony presented at the hearing, if any, held in connection with the rulemaking, together with a concise summary of the agency's findings with respect to the merits of any such testimony or comments which are opposed in whole or in part to the proposed rule. The ninety (90)-day period during which an agency shall file its order of rulemaking for publication in the *Missouri Register* begins either: 1) after the hearing on the proposed rulemaking is held; or 2) at the end of the time for submission of comments to the agency. During this period, the agency shall file with the secretary of state the order of rulemaking, either putting the proposed rule into effect, with or without further changes, or withdrawing the proposed rule.

**Title 1—OFFICE OF ADMINISTRATION  
Division 10—Commissioner of Administration  
Chapter 15—Cafeteria Plan**

**ORDER OF RULEMAKING**

By the authority vested in the Office of Administration under section 33.103, RSMo Supp. 2010, the commissioner amends a rule as follows:

**1 CSR 10-15.010 Cafeteria Plan is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on February 1, 2011 (36 MoReg 448-524). No changes have been made in the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: No comments were received.

**Title 10—DEPARTMENT OF NATURAL RESOURCES  
Division 23—Division of Geology and Land Survey  
Chapter 4—Monitoring Well Construction Code**

**ORDER OF RULEMAKING**

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department amends a rule as follows:

10 CSR 23-4.010 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 118-119). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed amendment was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received nine (9) comments on the proposed amendment.

COMMENT #1: Both staff and the Petroleum Storage Tank Insurance Fund (PSTIF) commented that a change needed to be made to the definition for Cone Penetrometer in section (2) for clarification purposes. PSTIF suggested the definition be removed.

RESPONSE AND EXPLANATION OF CHANGE: The department agreed to the suggested changes but did not believe the definition should be removed. The resulting changes to the rule are printed below.

COMMENT #2: Environmental Works of Springfield, Missouri, commented that definitions in sections (4), (6), and (8) needed to be clarified because they believed the rule was not intended to cover wells set in non-native fill—like gravel.

RESPONSE: Because the rule is meant to cover wells set in non-native fill, no change will be made.

COMMENT #3: PSTIF suggested the definition for lysimeters in section (7) be removed because they believe the term may confuse the reader. Staff suggested some new wording for the definition for clarity.

RESPONSE AND EXPLANATION OF CHANGE: The department believes the definition is needed to ensure that there is an understanding that monitoring wells using these devices are considered monitoring wells under these rules. However, the new wording has been incorporated and is printed below.

COMMENT #4: PSTIF suggested that the definition of gas migration well in section (5) should be changed. This was also a comment made by staff.

RESPONSE AND EXPLANATION OF CHANGE: The definition has been changed to reflect the concerns of both staff and PSTIF and is printed below.

COMMENT #5: Staff commented that the words “in pump and treat systems” be removed from section (6) of this rule because not all injection occurs in conjunction with pump and treat systems. Staff also commented that the word “an” should be removed.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees with this comment and has removed those words from the definition. The new rule language is printed below.

COMMENT #6: PSTIF and staff suggested that subsection (8)(C) of the rule be changed to add the statement that soil borings advanced to collect construction foundation are excluded. They also suggested that subsections (8)(D) and (8)(H) be combined for clarity.

RESPONSE: The statutory definitions are all listed in a different rule (10 CSR 23-1.010) and this does not need to be repeated here. The department also believes that the current subsections (8)(D) and (8)(H) are clear and combining them may be more confusing since the screening devices can be used in applications other than direct push applications. No change is being made to the rule.

COMMENT #7: PSTIF and a staff member suggested changes to the observation well definition in section (11). The first suggestion was to remove the word “requirements of this rule” and change it to “this definition.” The second was to add the words “that is ten feet (10') or greater in depth” to the definition.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees with both of these suggestions. The change to the rule is printed below.

COMMENT #8: PSTIF suggested that the last sentence in the definition of protective casing in section (14) of the rule be deleted since it is a directive rather than part of the definition and, as such, belongs in the construction standards rule. Environmental Works suggested that the definition was confusing.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees with both comments and has changed the wording to reflect the comments. The directive has been moved to 10 CSR 23-4.060. The changed rule language is printed below.

COMMENT #9: Through a general public comment to this rule, PSTIF expressed reservations about the Well Installation Board's authority to regulate drill holes that do not intersect water, including those used for the sole purpose of collecting soil data, and soil gas wells. After meetings with department staff, PSTIF did agree not to object to rules governing this type of monitoring well based on some mutually agreeable contents of this rule.

RESPONSE AND EXPLANATION OF CHANGE: The Department of Natural Resources offers that, in order to regulate construction and abandonment of monitoring wells for the prevention of groundwater contamination, some fiscal impact will be realized by PSTIF. The department has coordinated with this group to ensure that the requirements of this mutual agreement are included resulting in groundwater protection and minimal fiscal impacts to PSTIF. Changes have been made to the definition of a monitoring well and other places in this rule and are printed below.

#### 10 CSR 23-4.010 Definitions

(2) Cone penetrometer means a device used to gather any subsurface information. The device penetrates the ground surface by direct push as a general method of installation.

(5) Gas migration well is a monitoring well that is ten feet (10') or greater in depth and designed for the sampling, detection, and analysis of a gas or vapor that is potentially present or migrating away from a contaminant source.

(6) Injection well is a monitoring well that is ten feet (10') or greater in depth into which fluid or other media is injected, to clean, treat, or prevent contamination of groundwater. All other types of injection wells are defined by the Environmental Protection Agency (EPA); these wells may be regulated by other department programs or state agencies.

(7) Lysimeter is a device used to measure the percolation of water through soils and/or for determining what soluble constituents are in the fluids moving through the soils.

(8) Monitoring well means a well that is ten feet (10') or greater in depth which is constructed during assessment, characterization, and/or remediation of a site to obtain site-specific water quality, contaminant movement, or geologic or hydrologic data. This includes, but is not limited to:

- (A) Extraction wells;
- (B) Injection wells;
- (C) Soil borings;
- (D) Direct push wells;
- (E) Piezometers;
- (F) Observation wells;

(G) Gas migration wells; and

(H) Subsurface penetrations associated with field screening devices such as cone penetrometers and lysimeters.

(11) Observation well means any monitoring well that is ten feet (10') or greater in depth, in which the screen intersects a water table, for the specific purpose of determining either the elevation of the water table or the physical, chemical, biological, or radiological properties of groundwater. Observation wells constructed in the tank pit used as a part of an underground storage tank leak detection system are excluded from this definition.

(14) Casing means an industry standard sized pipe for the purpose of sealing off a specific zone of geology or contaminants.

### Title 10—DEPARTMENT OF NATURAL RESOURCES Division 23—Division of Geology and Land Survey Chapter 4—Monitoring Well Construction Code

#### ORDER OF RULEMAKING

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department amends a rule as follows:

10 CSR 23-4.020 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 119-120). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed amendment was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received five (5) comments on the proposed amendment.

COMMENT #1: Environmental Works commented that they wanted to include fee information in section (1) of this rule.

RESPONSE: All fee information is in another rule. Including it in all of the different chapters would require several rule changes every time a fee is changed. There will be no change made to the rule based on this comment.

COMMENT #2: The Petroleum Storage Tank Insurance Fund (PSTIF) commented that the sentence in section (3) of this rule requiring temporary wells be plugged within thirty (30) days is unnecessary and confusing and suggested that it be deleted. Environmental Works commented on the need for clarification that soil borings be registered as a group if they are temporary wells.

RESPONSE: The wording about temporary wells needing to be plugged is necessary because it is a common mistake made by contractors and it is included here to help clarify this. The department offers that the wording is a clear statement. No change is being made to the rule based on these comments.

COMMENT #3: PSTIF suggests a change to the wording in section (3) regarding the reporting of temporary monitoring wells. They suggest further subdividing the section and changed the wording to allow the report to be turned in “no more than one hundred eighty (180) days after completion of the plugging of the first temporary well being reported.”

RESPONSE AND EXPLANATION OF CHANGE: The report is to be submitted within one hundred eighty (180) days after completion of plugging the well. In an effort to make this more clear, the paragraph is being divided into two (2) separate sections. This change is printed below.

COMMENT #4: PSTIF suggested a change the wording section (4) of this rule to “. . . at least one (1) place after the second’s decimal point in this format: latitude . . .”

RESPONSE AND EXPLANATION OF CHANGE: The department agrees that this wording is clearer and has made this change. The section with this change is printed below.

COMMENT #5: The Antea Group commented that given the widespread use of global positioning system (GPS) devices and geographic information system (GIS) mapping, the rule should also allow the use of standard GPS coordinates to record geographic location of the wells.

RESPONSE: The department’s database will only accept data in the degree, minutes, and seconds format. Therefore, this is the format in which the data should be submitted. GPS devices can be programmed to record the data in this manner, and there are many Internet sites that can easily convert the data to this format if it has been collected in another format. No change is being made to this rule based on this comment.

#### **10 CSR 23-4.020 Certification and Registration for Monitoring Wells**

(3) A registration report form, supplied by the division, shall be used to report the plugging of a monitoring well or the major repair, or alteration, of a monitoring well and must be submitted to the division by the permittee within sixty (60) days after completion of such operations. The registration report form shall be accompanied by the registration fee. Temporary monitoring wells are required to be plugged within thirty (30) days after initial completion. The registration report form shall contain all required information specified thereon.

(4) When temporary wells are installed, usually multiple wells per monitoring site are used. All temporary wells per monitoring site may be reported on one (1) registration report form if the wells are plugged the same way. Only one (1) registration fee is required per site. The submittal of this type of registration report form and fee is required within one hundred eighty (180) days of completion of the plugging of temporary wells. The registration report form shall contain all required information specified thereon.

(5) Certification and registration report forms shall include the geographic location of the well. The geographic location shall have a format in degrees, minutes, and seconds for latitude and longitude relative to the North American Datum 1983 (NAD1983) geodetic datum. Location accuracy shall be at least one (1) place after the second’s decimal point in this format: latitude 38° 59’ 59.9”N, longitude 94° 01’ 01.0”W.

#### **Title 10—DEPARTMENT OF NATURAL RESOURCES Division 23—Division of Geology and Land Survey Chapter 4—Monitoring Well Construction Code**

##### **ORDER OF RULEMAKING**

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department amends a rule as follows:

10 CSR 23-4.030 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 120). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed amendment was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received two (2) comments on the proposed amendment.

COMMENT #1: Environmental Works commented that in subsection (1)(B) the rule is not specific enough about determination of areas prone to flooding. They suggest the rule be more specific.

RESPONSE: This portion of the rule is written as guidance so that the well is located so that proper drainage in the vicinity of the well shall be provided to prevent the accumulation and pooling of surface water within ten feet (10’) of the well. No change is being made to the rule based on this comment.

COMMENT #2: The Petroleum Storage Tank Insurance Fund (PSTIF) and staff commented that the wording in subsection (1)(C) of this rule should be changed. They believe it is not clear. Their proposed change: “When located in areas of traffic, the wellhead must either be protected by protective posts to prevent damage or completed as a surface flush mount as described in . . .” Staff suggested adding the words “the well must be” before the word “completed” in this subsection.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees that wording change is necessary. The changed wording is printed below.

#### **10 CSR 23-4.030 Location of Wells**

(1) A monitoring well shall be—

(C) When located in areas of traffic, an above ground surface completion must either be protected by protective posts to prevent damage or the well must be completed as a surface flush mount as described in 10 CSR 23-4.060(10)(B).

#### **Title 10—DEPARTMENT OF NATURAL RESOURCES Division 23—Division of Geology and Land Survey Chapter 4—Monitoring Well Construction Code**

##### **ORDER OF RULEMAKING**

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department rescinds a rule as follows:

#### **10 CSR 23-4.040 Drilling Methods for Monitoring Wells is rescinded.**

A notice of proposed rulemaking containing the proposed rescission was published in the *Missouri Register* on January 3, 2011 (36 MoReg 120-121). No changes have been made in the proposed rescission, so it is not reprinted here. This proposed rescission becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed rescission was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received zero (0) comments on the proposed recession.

#### **Title 10—DEPARTMENT OF NATURAL RESOURCES Division 23—Division of Geology and Land Survey Chapter 4—Monitoring Well Construction Code**

##### **ORDER OF RULEMAKING**

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department amends a rule as follows:

**10 CSR 23-4.050 General Protection of Groundwater Quality and Resources is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 121). No changes have been made in the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

**SUMMARY OF COMMENTS:** A public hearing on this proposed amendment was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received (1) comment on the proposed amendment.

**COMMENT #1:** Environmental Works commented that the department is requiring pre-approval before converting the type of well. They understand that if the well is altered, it should be reported. However, they believe the rules should not include this requirement if a well's purpose is converted from monitoring to remediation. Their reasoning is that other department staff will be involved and there is no need to report this based on these rules.

**RESPONSE:** This is not a change to the current rule. If the use is changed, it must be reported to ensure new construction and use parameters will still be protective of the groundwater for the new intended use. For example, a monitoring well may have been installed to monitor for a contaminant and will now be converted to water well or a monitoring well used for remediation. No change is being made based on this comment.

**Title 10—DEPARTMENT OF NATURAL RESOURCES  
Division 23—Division of Geology and Land Survey  
Chapter 4—Monitoring Well Construction Code**

**ORDER OF RULEMAKING**

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department amends a rule as follows:

10 CSR 23-4.060 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 121-126). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

**SUMMARY OF COMMENTS:** A public hearing on this proposed amendment was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received nine (9) comments on the proposed amendment.

**COMMENT #1:** Staff commented that portions of paragraph (1)(D)1. should read the same as portions of paragraph (1)(C)1. to ensure consistency in that the requirements for riser pipes and screens are the same for both plastic and metallic materials that can be used.

**RESPONSE AND EXPLANATION OF CHANGE:** The department agrees with this comment. The changed wording is written below.

**COMMENT #2:** The Petroleum Storage Tank Insurance Fund (PSTIF) commented on section (3) of this rule. They believe the

entire section should be reworded and renumbered to provide more clarity.

**RESPONSE:** Since the wording and format of the rule has been changed already and this is the only comment received on the clarity issue of this rule, the department offers that the rule is clear. No changes will be made based on this comment.

**COMMENT #3:** Environmental Works commented on section (4) of this rule. They state that the rule starts out clearly about open-hole completions but brings in a reference to domestic wells at the location. They want more information as to what is being requested.

**RESPONSE:** Open-hole completions are only allowed on a case-by-case basis, so contact with the department is mandatory. Each contractor is provided the entire booklet on regulations for all wells. When the contractor contacts the department for approval of the open-hole completion wells, staff will include the casing requirements referred to in the rule. The citation referred to is in the booklet they receive when they get a permit to operate in the state; it is also on the secretary of state's website and on the department's website. There is no need to depict exact casing requirements in this rule because they are depicted in the Chapter 3 rules as cited in this rule and will be required during the pre-approval process for these types of wells. This increased casing requirement is more protective of the groundwater. No change will be made based on this comment.

**COMMENT #4:** PSTIF commented on subsection (6)(C) of this rule. They suggest splitting this subsection into two (2) subsections. They also suggested specific wording.

**RESPONSE AND EXPLANATION OF CHANGE:** The department agrees that this clarification is warranted. However, the wording was not used exactly as PSTIF proposed. The changed wording is written below.

**COMMENT #5:** Environmental Works commented on sections (7) and (8) of this rule. They believe the two (2) sections conflict with each other. PSTIF also commented that section (7) of this rule was difficult to understand as written. Staff commented on section (8) saying it needed more clarity.

**RESPONSE AND EXPLANATION OF CHANGE:** Considering all three (3) of the comments on these two (2) sections, the department made changes to the wording that should take care of all concerns. New wording is written below.

**COMMENT #6:** Antea Group commented on subsection (8)(C) of the rule stating that it was unclear if a variance was required for nested soil vapor wells. PSTIF also suggested a change to clarify this subsection by creating another subsection. Staff also commented on this subsection suggesting alternate wording.

**RESPONSE AND EXPLANATION OF CHANGE:** Considering all the comments on this subsection, the department made changes to this subsection and utilized wording that should take care of all of the concerns. Changed wording is written below.

**COMMENT #7:** PSTIF commented on section (9) of this rule stating that the rule refers to four (4) grout types but only three (3) grout types are listed. Staff suggested that the words "protective casing" should be changed to the words "surface completion" to make the rule consistent throughout.

**RESPONSE AND EXPLANATION OF CHANGE:** The department agrees with these comments, and the changed wording is written below.

**COMMENT #8:** PSTIF commented on section (10) of this rule recommending the word "regulated" be removed in reference to monitoring wells, since it is self-evident that the rules only apply to "regulated monitoring wells." They also suggested rewording the sentence as follows: "Surface protection is required on all monitoring

wells to deter . . .” They also suggested removing the last sentence in this section as it is repeated later in the rule.

**RESPONSE AND EXPLANATION OF CHANGE:** The department agrees with these suggested changes, and the changed wording is written below.

**COMMENT #9:** Environmental Works commented on section (13) of the rule stating they believe the pump installation contractor certification (permit) should be split up between those professionals whose primary work involves installing pumps for domestic water well use and those who are involved in environmental monitoring/remediation.

**RESPONSE:** The permitting requirements for pump installers of any type are addressed in Chapter 1 of the rules. They should not be addressed in this rule because it sets requirements for construction of wells, not permitting of the persons who construct them. No change will be made to this rule based on this comment.

### 10 CSR 23-4.060 Construction Standards for Monitoring Wells

#### (1) Riser Pipe and Screen Material.

(D) All metallic riser pipe must meet the following minimum standards:

1. The minimum nominal diameter for riser pipe and screen installed in monitoring wells is two inches (2") except that direct push wells may have riser pipe and screen with a minimum nominal diameter of three-quarters of an inch (3/4");

2. The wall thickness for carbon, low-carbon, and galvanized steel must not be less than Schedule 40. The wall thickness of stainless 304 and 316 must not be less than Schedule 5. The joint wall thickness must not be less than Schedule 40, with exception for soil gas monitoring wells utilizing a soil gas implant and tubing;

3. Metallic riser pipe must be joined by a watertight mechanical joint or welded. The well should be checked for the presence of explosive gases before welding begins; and

4. Riser pipe and screen material must be new and free from contaminants which would affect the quality of the groundwater or would adversely affect the monitoring.

(6) Installation of Primary Filter Pack. After the well screen and riser assembly are installed in the well, the filter pack materials must be emplaced.

(C) When installing a monitoring well for shallow monitoring, the primary filter pack must extend a minimum of six inches (6") above the top of the well screen.

(D) Soil vapor implants are required to have a minimum primary filter pack of six inches (6") above and below each implant.

(7) The installation of a secondary filter pack is required unless non-slurry bentonite is used as a bentonite seal or annular seal. The purpose of a secondary filter pack, which is placed directly on top of the primary filter pack, is to ensure that annular seal slurry grouts do not infiltrate into the primary filter pack. The secondary filter pack must extend from one foot to two feet (1'-2') above the primary filter pack and shall consist of one foot to two feet (1'-2') of clean fine sand.

(8) The installation of a bentonite seal is required if the annular seal is composed of slurry grout material and a secondary filter pack is not used. The purpose of the bentonite seal is to keep the slurry grout which is emplaced above from mixing with the primary and secondary filter pack materials. If required, the bentonite seal must be a minimum of two feet (2') thick.

(C) Nested well construction will be considered on a case-by-case basis. Pre-approval by the division is required, via the variance process, before construction begins, except that gas migration wells constructed using soil vapor implants do not require a variance as long as they meet the requirements of subsection (6)(D) of this rule, have a minimum bentonite seal of one foot (1') between each primary

filter pack and a minimum of one and one-half feet (1.5') of bentonite seal between the uppermost primary filter pack and that base of the surface completion.

(9) Installation of the Annular Seal. The monitoring well environment may contain many chemicals or organic compounds that could affect the sealing capabilities of various kinds of grout. The type of grout used must be able to function to one hundred percent (100%) of its designed sealing capabilities until the well is properly plugged. The type of grout used must not influence, contaminate, or hinder the use of the monitoring well for its designed purpose. The annular seal must extend from the secondary filter pack or bentonite seal to the base of the surface completion. The combined annular seal and bentonite seal (if a bentonite seal is utilized) must be at least two feet (2') thick unless monitoring for shallow contaminants. Monitoring wells constructed for shallow monitoring, as defined in 10 CSR 23-4.010, must have a minimum combined annular seal and bentonite seal (if a bentonite seal is utilized) of at least one foot (1'). The following grout types are permitted in monitoring wells:

(10) Well Protection. Surface protection on all monitoring wells is required to deter unauthorized entry, prevent surface water from entering the annular space, and protect the well from accidental damage caused by collision from vehicles or heavy equipment. The two (2) types of surface completion designs are above ground completions and flush mount completions.

(A) Above Ground Completions. Above ground completions must meet the following standards:

1. The protective casing must extend from at least one and one-half feet (1 1/2') above the finished grade of the ground surface to a point at least two feet (2') below the finished grade, except as stated in subsection (11)(B) of this rule for flush mount completions. The riser pipe must be at least two inches (2") below the top of the above ground completion. The above ground completion must be placed in a hole that is at least eight inches (8") in diameter larger than the above ground completion size. Care must be taken so that the shape of this hole, when filled with concrete, does not encourage frost heaving. The protective casing must be centered in this hole and concrete poured around the casing to secure it. Cement or bentonite slurry is not allowed. All water must be removed from the enlarged hole before concrete is added. The surface of the concrete must slope away from the protective casing so that pooling of surface water does not occur;

2. A weep hole or alternate method must be employed to ensure water does not accumulate inside the protective casing to the point that the top of the riser is submerged, except on temporary wells that are plugged within forty-eight (48) hours of initial installation;

3. A locking well cap and a suitable lock must be attached to the top of the above-ground completion. The riser pipe must be sealed with a watertight cap and must extend at least two feet (2') above the finished surface grade in flood prone areas. Temporary monitoring wells are exempt from this paragraph if they are plugged within forty-eight (48) hours of initial installation; and

4. All monitoring wells must be uniquely identified so as to distinguish one (1) well from another on the monitoring site and on the monitoring well certification form.

## Title 10—DEPARTMENT OF NATURAL RESOURCES Division 23—Division of Geology and Land Survey Chapter 4—Monitoring Well Construction Code

### ORDER OF RULEMAKING

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department rescinds a rule as follows:

**10 CSR 23-4.070 Monitoring Well Development is rescinded.**

A notice of proposed rulemaking containing the proposed rescission was published in the *Missouri Register* on January 3, 2011 (36 MoReg 126). No changes have been made in the proposed rescission, so it is not reprinted here. This proposed rescission becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed rescission was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received zero (0) comments on the proposed rescission.

**Title 10—DEPARTMENT OF NATURAL RESOURCES  
Division 23—Division of Geology and Land Survey  
Chapter 4—Monitoring Well Construction Code**

**ORDER OF RULEMAKING**

By the authority vested in the Department of Natural Resources under section 256.626, RSMo 2000, the department amends a rule as follows:

10 CSR 23-4.080 is amended.

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 126–127). Those sections with changes are reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing on this proposed amendment was held on February 3, 2011. The public comment period ended on February 7, 2011. The department received three (3) comments on the proposed amendment.

COMMENT #1: Roberts Environmental and Environmental Works commented on subsection (2)(B) of this rule stating that commonly the driller does not know if the casing or other well materials can be pulled until it is attempted in the field. The department should reconsider requiring a variance in advance of trying to pull the casing and they believe that the phrase “if possible” is still needed in the rule.

RESPONSE AND EXPLANATION OF CHANGE: The department agrees with this comment and is removing the requirement for requesting a variance for plugging in place when the riser and screen cannot be pulled. Changed wording is written below.

COMMENT #2: Antea Group commented on subsection (2)(E) of this rule. They believe that crushed rock, gravel, or poorly sorted gravel that is readily compactible should be allowed as backfill material in addition to the current requirement of compacted uncontaminated native material. They also request that the requirement to have a contractor with a non-restricted permit on site when a well is completely excavated be removed as they believe it is impractical. Staff also suggested changing the words “protective casing” to “surface completion.”

RESPONSE AND EXPLANATION OF CHANGE: Backfilling a monitoring well that is not in a tank pit is not a standard practice. It is important, especially in a contaminated site, to have material that is as impermeable as possible used as backfill material. However, the department offers that in some circumstances, other type of fill is appropriate. The department agrees that it is not necessary that a non-restricted contractor be on site to ensure that the excavation is complete and that no conduit for contaminants entering the groundwater exists when the excavation is complete. Any permitted contractor will be knowledgeable enough to ensure this excavation is

complete and that the groundwater is protected. A change to the rule was made based on comments to clarify the section.

COMMENT #3: Petroleum Storage Tank Insurance Fund (PSTIF), the Antea Group, and Environmental Works commented on section (3) of this rule. They all have commented on either the reporting and/or fee requirements for wells that have been altered in some way such as paved over, buried, or otherwise lost should not have to be submitted to the department as required now as a standard business practice. PSTIF believes they should be reported but no fee should be charged. Environmental Works believes they should not have to be reported until the end of the project when all wells are being plugged. The Antea Group and PSTIF believe there should be another form created to report these wells. PSTIF has questioned the Well Installation Board’s authority for requiring the reporting of these wells. Antea Group has questioned the department’s authority for requiring fees for the reporting of these wells.

RESPONSE AND EXPLANATION OF CHANGE: The department added wording to this proposed amendment to clarify what it has been doing as standard practice since 1994 when the rule was first promulgated. This practice has recently come to the notice of more firms in the past year due to enhanced coordination among department programs, resulting in discovery of many more lost wells that had not been reported. The department agrees that either the current form needs to be revised or a new form should be created to more accurately report these wells. Per request from several firms, the department has requested a legal opinion on its authority to require the reporting and fees for these wells. While awaiting that determination, the department has decided to remove the proposed new wording in the rule and continuing holding the records reporting these wells and work on a new form for reporting them. Once the determination is made the department will act accordingly, either amending the rules that pertain to this activity or continuing with the practice the department has been adhering to for the past seventeen (17) years. The changed wording is written below.

**10 CSR 23-4.080 Plugging of Monitoring Wells**

(2) When plugging a monitoring well, the following minimum requirements shall be met:

(B) All surface completion and permanent casing, riser pipe, and well screen must be removed from the borehole. If, when removing the casing, the borehole begins to collapse, grout must be simultaneously emplaced while the casing is removed to ensure a proper seal;

(E) A monitoring well that is less than twenty-four feet (24') in total depth may be completely excavated as opposed to being plugged with grout. If the remaining hole is ten feet (10') or more in depth, it must be filled with clean replacement material that is compactable to a permeability less than, or equal to, the minimum permeability of the encompassing native materials. A monitoring well installation contractor must be on site at all times during the excavation and filling operations.

(3) The plugging or complete excavation of a monitoring well must be reported on a registration report form supplied by the division.

**Title 11—DEPARTMENT OF PUBLIC SAFETY  
Division 45—Missouri Gaming Commission  
Chapter 12—Liquor Control**

**ORDER OF RULEMAKING**

By the authority vested in the Missouri Gaming Commission under section 313.805, RSMo Supp. 2010, the commission amends a rule as follows:

**11 CSR 45-12.090 Rules of Liquor Control is amended.**

A notice of proposed rulemaking containing the text of the proposed amendment was published in the *Missouri Register* on January 3, 2011 (36 MoReg 127). No changes have been made to the text of the proposed amendment, so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: A public hearing was held on this proposed amendment on February 16, 2011. No one commented at the public hearing, and no written comments were received.

**Title 12—DEPARTMENT OF REVENUE  
Division 10—Director of Revenue  
Chapter 3—State Sales Tax**

**ORDER OF RULEMAKING**

By the authority vested in the director of revenue under section 144.270, RSMo Supp. 2010, the director rescinds a rule as follows:

**12 CSR 10-3.888** Sales “In Commerce” Between Missouri and Other States **is rescinded**.

A notice of proposed rulemaking containing the proposed rescission was published in the *Missouri Register* on March 1, 2011 (36 MoReg 899). No changes have been made in the proposed rescission, so it is not reprinted here. This proposed rescission becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: No comments were received.

**Title 12—DEPARTMENT OF REVENUE  
Division 10—Director of Revenue  
Chapter 23—Motor Vehicle**

**ORDER OF RULEMAKING**

By the authority vested in the director of revenue under section 700.111, RSMo Supp. 2010, the director adopts a rule as follows:

**12 CSR 10-23.475** Fees and Required Documentation for Designating Manufactured Homes as Real or Personal Property **is adopted**.

A notice of proposed rulemaking containing the text of the proposed rule was published in the *Missouri Register* on March 1, 2011 (36 MoReg 899-901). No changes have been made in the text of the proposed rule, so it is not reprinted here. This proposed rule becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: No comments were received.

**Title 15—ELECTED OFFICIALS  
Division 60—Attorney General  
Chapter 8—Unfair Practices**

**ORDER OF RULEMAKING**

By the authority vested in the attorney general under section 407.145, RSMo 2000, the attorney general amends a rule as follows:

**15 CSR 60-8.010** Definitions **is amended**.

A notice of proposed rulemaking containing the text of the proposed

amendment was published in the *Missouri Register* on January 18, 2011 (36 MoReg 230). No changes have been made in the text of the proposed amendment so it is not reprinted here. This proposed amendment becomes effective thirty (30) days after publication in the *Code of State Regulations*.

SUMMARY OF COMMENTS: No comments were received.

**T**his section may contain notice of hearings, correction notices, public information notices, rule action notices, statements of actual costs, and other items required to be published in the *Missouri Register* by law.

**Title 11—DEPARTMENT OF PUBLIC SAFETY  
Division 10—Adjutant General  
Chapter 11—State Emergency Management Agency**

**IN ADDITION**

The following public notice regarding the severe storms, tornadoes, and flooding occurring from April 19, 2011, and continuing is issued by the Department of Homeland Security, Federal Emergency Management Agency Joint Field Office located in Columbia, Missouri. This public notice is published per federal regulation requirements found in Section 2(a)(4) of Executive Order 11988 and Section 2(b) of Executive Order 11990.

Joint Field Office  
1512 Heriford Road  
Columbia, MO 65202

# FEMA

May 14, 2011  
FEMA Region VII News Desk  
816-283-7095

## **PUBLIC NOTICE      FEMA-1980-DR-MO**

The Federal Emergency Management Agency (FEMA) hereby gives notice to the public of its intent to reimburse eligible applicants for eligible costs to repair and/or replace facilities damaged by Severe Storms, Tornadoes, and Flooding occurring from April 19, 2011, and continuing. This notice applies to the Public Assistance (PA), Individual Assistance (IA), and Hazard Mitigation Grant (HMGP) programs implemented under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5206.

Under a major disaster declaration (FEMA –1980-DR-MO) signed by the President on May 9, 2011, the following county has been designated adversely affected by the disaster and eligible for both IA and PA: St. Louis. The following counties are eligible for IA only: Butler, Mississippi, New Madrid, and Taney. Additional counties may be designated at a later date. All counties in the State of Missouri, and the Independent City of St. Louis, are eligible for HMGP.

This public notice concerns activities that may affect historic properties, activities that are located in or affect wetland areas or the 100-year floodplain, and critical actions within the 500-year floodplain. Such activities may adversely affect the historic property, floodplain or wetland, or may result in continuing vulnerability to flood damage.

Presidential Executive Orders 11988 and 11990 require that all federal actions in or affecting the floodplain or wetlands be reviewed for opportunities to relocate, and evaluated for social, economic, historical, environmental, legal and safety considerations. Where there is no opportunity to relocate, FEMA is required to undertake a detailed review to determine what measures can be taken to minimize future damages. The public is invited to participate in the process of identifying alternatives and analyzing their impacts.

FEMA has determined that for certain types of facilities there are normally no alternatives to restoration in the floodplain/wetland. These are facilities that meet all of the following criteria: 1) FEMA's estimate of the cost of repairs is less than 50% of the cost to replace the entire facility, and is less than \$100,000; 2) the facility is not located in a floodway; 3) the facility has not sustained major structural damage in a previous Presidentially declared flooding disaster or emergency; and 4) the facility is not critical (e.g., the facility is not a hospital, generating plant, emergency operations center, or a facility that contains dangerous materials). FEMA intends to provide assistance for the restoration of these facilities to their pre-disaster condition, except that certain measures to mitigate the effects of future flooding or other hazards may be included in the work. For example, a bridge or culvert restoration may include a larger waterway opening to decrease the risk of future washouts.

For routine activities, this will be the only public notice provided. Other activities and those involving facilities that do not meet the four criteria are required to undergo more detailed review, including study of alternate locations. Subsequent public notices regarding such projects will be published if necessary, as more specific information becomes available.

In many cases, an applicant may have started facility restoration before federal involvement. Even if the facility must undergo detailed review and analysis of alternate locations, FEMA will fund eligible restoration at the original location if the facility is functionally dependent on its floodplain location (e.g., bridges and flood control facilities), or the project facilitates an open space use, or the facility is an integral part of a larger network that is impractical or uneconomical to relocate, such as a road. In such cases, FEMA must also examine the possible effects of not restoring the facility, minimize floodplain/wetland impacts, and determine both that an overriding public need for the facility clearly outweighs the Executive Order requirements to avoid the floodplain/wetland, and that the site is the only practicable alternative. State of Missouri and local officials will confirm to FEMA that proposed actions comply with all applicable State and local floodplain management and wetland protection requirements.

FEMA intends to provide IA program funding for disaster-related emergency housing. These actions may adversely affect a floodplain/wetland, or may result in continuing vulnerability to floods. These actions may include repair, restoration or construction of housing or private bridges, purchase and placement of travel trailers or manufactured housing units, or repair of structures as minimum protective measures. This will be the only public notice concerning these actions.

FEMA also intends to provide HMGP funding to the State of Missouri, and the Independent City of St. Louis, to mitigate future disaster damages. These projects may include construction of new facilities, modification of existing, undamaged facilities, relocation of facilities out of floodplains, demolition of structures, or other types of projects to mitigate future disaster damages. In the course of developing project proposals, subsequent public notices will be published if necessary, as more specific information becomes available.

The National Historic Preservation Act requires federal agencies to take into account the effects of their undertakings on historic properties. Those actions or activities affecting buildings, structures, districts or objects 50 years or older or that affect archeological sites or undisturbed ground will require further review to determine if the property is eligible for listing in the National Register of Historic Places (Register). If the property is determined to be eligible for the Register, and FEMA's undertaking will adversely affect it, FEMA will provide additional public notices. For historic properties not adversely affected by FEMA's undertaking, this will be the only public notice.

As noted, this may be the only public notice regarding the above-described actions under the PA, IA, and HMGP programs. Information about assistance projects may be obtained by submitting a written request to the Regional Administrator, DHS-FEMA Region VII; 9221 Ward Parkway, Suite 300; Kansas City, MO 64114-3372. The information may also be obtained by calling: (816) 283-7060, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Comments should be sent in writing to the Regional Director, at the above address, within 15 days of the date of publication of this notice.

**Title 19—DEPARTMENT OF HEALTH AND  
SENIOR SERVICES  
Division 60—Missouri Health Facilities Review  
Committee  
Chapter 50—Certificate of Need Program**

**NOTIFICATION OF REVIEW:  
APPLICATION REVIEW SCHEDULE**

The Missouri Health Facilities Review Committee has initiated review of the expedited applications listed below. A decision is tentatively scheduled for June 21, 2011. These applications are available for public inspection at the address shown below.

**Date Filed**

**Project Number:** Project Name  
City (County)  
Cost, Description

**05/09/11**

**#4669 NT:** Elizabeth House  
Bridgeton (St. Louis County)  
\$8,923,121, Replace 60-bed SNF

**05/10/11**

**#4670 RT:** Shirkey Pavilion Assisted Living  
Richmond (Ray County)  
\$2,022,719, Renovate/modernize 30-bed ALF

**#4657 HT:** Golden Valley Memorial Hospital  
Clinton (Henry County)  
\$1,696,719, Replace magnetic resonance imager

Any person wishing to request a public hearing for the purpose of commenting on these applications must submit a written request to this effect, which must be received by June 10, 2011. All written requests and comments should be sent to:

Chairman  
Missouri Health Facilities Review Committee  
c/o Certificate of Need Program  
3418 Knipp Drive, Suite F  
Post Office Box 570  
Jefferson City, MO 65102

For additional information, contact  
Donna Schuessler, (573) 751-6403.

**T**he Secretary of State is required by sections 347.141 and 359.481, RSMo 2000, to publish dissolutions of limited liability companies and limited partnerships. The content requirements for the one-time publishing of these notices are prescribed by statute. This listing is published pursuant to these statutes. We request that documents submitted for publication in this section be submitted in camera ready 8 1/2" x 11" manuscript by email to [dissolutions@sos.mo.gov](mailto:dissolutions@sos.mo.gov).

NOTICE OF WINDING UP AND DISSOLUTION OF LIMITED LIABILITY COMPANY TO ALL CREDITORS OF AND CLAIMANTS AGAINST BRISTOL DEVELOPMENT GROUP, LLC.

On April 18, 2011, Bristol Development Group, LLC, a Missouri limited liability company (the "Company") filed its Notice of Winding Up and Articles of Termination with the Missouri Secretary of State. The Company requests that claimants against the Company present claims in writing to: Zachary A. Abeles, Attorney c/o Polsinelli Shughart PC, 100 South Fourth Street, Suite 1000, St. Louis, MO 63102. All claims must include (1) the name, address and telephone number of the claimant; (2) the amount claimed; (3) the basis of the claim; (4) the date on which the claim arose; and (5) documentation supporting the claim. All claims against the Company will be barred unless a proceeding to enforce the claim is commenced within three (3) years after the publication of this notice.

## Rule Changes Since Update to Code of State Regulations

This cumulative table gives you the latest status of rules. It contains citations of rulemakings adopted or proposed after deadline for the monthly Update Service to the *Code of State Regulations*, citations are to volume and page number in the *Missouri Register*, except for material in this issue. The first number in the table cite refers to the volume number or the publication year—30 (2005) and 31 (2006). MoReg refers to *Missouri Register* and the numbers refer to a specific *Register* page, R indicates a rescission, W indicates a withdrawal, S indicates a statement of actual cost, T indicates an order terminating a rule, N.A. indicates not applicable, RAN indicates a rule action notice, RUC indicates a rule under consideration, and F indicates future effective date.
