3 CSR 10-6.405 General Provisions

PURPOSE: This rule establishes general provisions for sport fishing: permit requirements; daily and possession limits; reciprocal privileges on certain rivers; and stream versus impoundment fishing.

(1) Fish, mussels and clams, bullfrogs and green frogs, turtles and live bait may be taken only as provided in this chapter or as further restricted in Chapter 11, Chapter 12 or as otherwise noted.

(2) Permits Required.

(A) Any person, to exercise the privileges of this chapter, must obtain and have on his/her person the prescribed permit, temporary permit authorization number(s) or evidence of exemption. The temporary permit authorization number(s) and picture identification must be carried at all times while fishing until the actual permit(s) is received.

(B) Any person possessing a valid sport fishing license issued by the state of Arkansas, or who is legally exempted from those license requirements, without further permit or license, may fish in the flowing portions of the St. Francis River, within the boundary of Missouri.

(C) Any person possessing a valid sport fishing license issued by the state of Iowa,

Illinois, Tennessee, Kansas or Nebraska, or who is legally exempted from those license requirements, without further permit or license, may fish in the Des Moines, Mississippi and Missouri rivers and their backwaters within the boundary of Missouri adjacent to the state where that person is licensed. These persons may also fish in the Missouri portion of any oxbow lakes through which the state boundary passes.

(D) Any person possessing a valid sport fishing license issued by the state of Kentucky, or who is legally exempted from those license requirements, without further permit or license, may fish in the Mississippi River within the boundary of Missouri adjacent to the state of Kentucky. For the purposes of these reciprocal fishing privileges, the river is defined as the main channel and immediate side or secondary channels or chutes. It does not include oxbow or floodplain lakes, or backwaters that extend onto the floodplain or up tributaries when the Mississippi River level exceeds thirty-three feet (33') at the Cairo, Illinois gaging station.

(3) Limits and Possession.

(A) Any species taken into actual possession, unless released unharmed immediately after being caught, shall continue to be included in the daily limit of the taker for the day when taken except as authorized in subsection (3)(E) of this rule.

(B) A person may possess only the daily limit of any species while on the waters or banks thereof to which the limit applies.

(C) Regardless of where taken, no fish less than the specified minimum length limit shall be possessed on the waters or banks thereof to which length limits apply. The head, tail and skin must remain attached to all fish for which length limits are established while those fish are on the waters to which length limits apply or until the fish have been checked by an agent of the department.

(D) Fish held live for release by the sponsor after a bona fide fishing tournament need not be kept separate and identifiable following tournament judging if released unharmed to the waters from which taken on the day taken.

(E) During the months of September through June, black bass released unharmed by participants in a bona fide catch-and-release fishing tournament, which requires entrants to have a boat livewell with adequate capacity and a pump constantly adding fresh or recirculating water, shall not be included in the daily limit, however, at no time may the daily limit be exceeded.

(F) A person may possess no more than two (2) statewide daily limits as prescribed in 3 CSR 10-6.505 through 3 CSR 10-6.620.

(4) Reciprocal Privileges: Des Moines, Mississippi, Missouri and St. Francis Rivers.

(A) All reciprocal privileges outlined in this rule shall be contingent upon a grant of like privileges by the appropriate neighboring state to persons licensed or exempted by Missouri.

(B) Regulations of the state where the person is licensed shall apply in Arkansas boundary waters. Missouri regulations shall apply in the Missouri portion of Iowa, Illinois, Kentucky, Tennessee, Nebraska and Kansas boundary waters. Persons licensed in Iowa, Illinois, Kentucky, Tennessee, Kansas and Nebraska, when fishing in waters in which they are not licensed to fish by Missouri, shall comply with the most restrictive laws and regulations of the two (2) states.

(C) Persons must be licensed in Missouri to fish in tributaries of the Des Moines, Mississippi, Missouri and St. Francis rivers.

(D) Persons licensed in Arkansas or Iowa may not fish from or attach any device or equipment to land under the jurisdiction of Missouri.

(E) Persons licensed in Illinois, Kentucky, Tennessee, Kansas or Nebraska may fish from or attach devices or equipment to land under the jurisdiction of Missouri.

(5) Impoundments and Streams.

(A) For purposes of these rules, the arms of major hydroelectric or flood control impoundments will extend to the lake contour that is commonly referred to as conservation pool, multipurpose pool or normal pool, or to specific locations identified by posting. Impoundment rules apply to all other bodies of water impounded by dams and to natural lakes not permanently connected to flowing streams. Stream fishing rules apply above in-stream structures that do not elevate water levels above the stream's high bank and that do not regulate water flow.

3 CSR 10-6.410 Fishing Methods

PURPOSE: This rule establishes the methods by which fishermen may take fish.

(1) Fish may be taken by the use of pole and line, trotline, throwline, limb line, bank line, jug line, gig, bow, crossbow, underwater spearfishing, snagging, snaring, grabbing, or atlatl, but only as specifically authorized in 3 CSR 10-6.415 through 3 CSR 10-6.550. No person may attempt to take fish by rock or hand fishing, with or without hook. Live bait, mussels, clams, bullfrogs, green frogs, common snapping turtles, and soft-shelled turtles may be taken only as specifically authorized in 3 CSR 10-6.605 through 3 CSR 10-6.620.

(2) Number of Poles and Hooks.

(A) Not more than three (3) unlabeled poles and not more than thirty-three (33) hooks in the aggregate, for any or all methods, may be used by any person at one (1) time.

(B) On the Mississippi River, not more than two (2) unlabeled poles and not more than fifty (50) hooks in the aggregate may be used by any person at one (1) time. While fishing concurrently on the Mississippi River and other Missouri waters, not more than fifty (50) hooks in the aggregate may be used and not more than thirty-three (33) of those hooks may be used in waters other than the Mississippi River.

(C) Trotlines and throwlines of more than one (1) individual may be joined together, but the number of hooks in the aggregate shall not exceed the prescribed number for one (1) individual on the waters that are being fished, and the lines must be labeled with each person's full name and address or Conservation Number.

(3) Hooks attached to throwlines or trotlines shall be staged not less than two feet (2') apart.

(4) Live bait traps, hooks, trotlines, throwlines, limb lines, bank lines, or anchored jug lines (rendered immobile from the location where set) may not be left unattended for more than twenty-four (24) hours or must be completely removed. Unanchored jug lines in streams must be attended at all times by the

permittee's immediate presence. Unanchored jug lines in impounded waters must be attended by the permittee's immediate presence at least one (1) time per hour. For purposes of this section, immediate presence is defined as within sight of the location of equipment in order to personally claim or identify such equipment during inspection by an agent of the department.

(5) No person may use any explosive, poison, chemical, electrical device, or equipment capable of transmitting underwater signals to kill, attempt to kill, or stupefy fish, and no material and equipment may be possessed for those purposes on waters of the state or adjacent banks.

(6) Fish not hooked in the mouth or jaw, except those legally taken by atlatl, snagging, snaring, grabbing, gig, bow, crossbow, or underwater spearfishing must be returned to the water unharmed immediately.

(7) Fish legally taken by snagging, snaring, grabbing, atlatl, gig, bow, crossbow, or underwater spearfishing shall be retained by the taker and included in the prescribed daily limit.

(8) Live bait traps, trotlines, throwlines, limb lines, bank lines, jug lines, and live boxes shall be plainly labeled on a durable material with the full name and address or Conservation Number of the person using the equipment.

(9) Spears propelled by explosive substances may not be used.

(10) Spearguns may not be possessed on unimpounded waters or adjacent banks.

(11) Except as provided in 3 CSR 10-6.605, fish traps, including slat traps and wire traps, may not be possessed on waters of the state or adjacent banks.

(12) As an aid to fishing methods, an artificial light may be used only above the water surface, except that underwater lights may be used to attract fish while fishing by pole and line and when bowfishing on impoundments as authorized by 3 CSR 10-6.550.

(13) Endangered species and fish included in 3 CSR 10-6.505 through 3 CSR 10-6.545, including their parts and eggs, may not be used for bait.

(14) The director may issue special authorization to properly licensed persons with disabilities to pursue and take fish, mussels and clams, bullfrogs and green frogs, turtles and

live bait by methods not prescribed in this chapter and Chapters 11 and 12 if the disability prevents fishing by prescribed methods.
