**Rules of**

**Department of Economic Development**

**Division 240—Public Service Commission**

**Chapter 18—Safety Standards**
PURPOSE: This rule prescribes minimum safety standards relating to the operation of electric and telephone utilities and rural electric cooperatives. Adoption of this rule will not only inform the regulated utilities, to which it applies, of the minimum safety standards required by the commission but will also be of assistance to the commission staff in carrying out its assigned duties.

PUBLISHER’S NOTE: The publication of the full text of the material that the adopting agency has incorporated by reference in this rule would be unduly cumbersome or expensive. Therefore, the full text of that material will be made available to any interested person at both the Office of the Secretary of State and the office of the adopting agency, pursuant to section 536.031.4, RSMo. Such material will be provided at the cost established by state law.

(1) The commission adopts as its rule and incorporates by reference, Parts 1, 2 and 3 and Sections 1, 2 and 9 of the American National Standard, National Electrical Safety Code (NESC); 1997 Edition as approved by the American National Standards Institute on June 6, 1996. The NESC is published by the Institute of Electrical and Electronics Engineers, Inc., as the minimum safety standards relating to the operation of electric and telephone utilities and rural electric cooperatives. The NESC is composed of four (4) different parts and four (4) sections, each of which pertain to different aspects of the electric and telecommunications industries. Part 1 specifies rules for the installation and maintenance of equipment normally found in electric generating plants and substations. Part 2 pertains to safety rules for overhead electric and communication lines. Part 3 contains safety rules for underground electric and communication lines. Section 1 is an introduction to the NESC, Section 2 defines special terms and Section 9 requires certain grounding methods for electric and communications facilities.

(2) All electric and telephone utilities and rural electric cooperatives subject to regulation by this commission pursuant to Chapters 386, 392–394, RSMo shall be required to adhere to the safety standards established by this rule.
