Title 4—DEPARTMENT OF ECONOMIC DEVELOPMENT
Division 145—Missouri Board of Geologist Registration
Chapter 2—Licensure Requirements

4 CSR 145-2.010 Grandfather Requirements

PURPOSE: This rule establishes the requirements for licensure prior to October 1, 1995.

(1) Individuals applying for licensure as a registered geologist prior to October 1, 1995, shall submit a properly completed application, along with all required documents to the Board of Geologist Registration (see 4 CSR 145-1.030).

(2) All individuals shall meet the requirements of 4 CSR 145-2.020 and 4 CSR 145-2.030 to be considered for licensure as a registered geologist.

(3) The examination requirement of section 256.468.4, RSMo, shall be waived for those applicants who are practicing geology as defined in 256.450(7), RSMo, as of August 28, 1994, provided the application is post-marked on or before October 1, 1995, and all applicable fees have been paid.

4 CSR 145-2.020 Educational Requirements

PURPOSE: This rule defines the educational requirements for a registered geologist or geologist-registrant in-training.

(1) To be eligible for licensure, an applicant must have received a degree at the baccalaureate, master’s or doctoral level from a school, college, university, or other institution of higher education in the United States; which, at the time the applicant was enrolled and graduated, was accredited by a regional accrediting commission recognized by the United States Department of Education. Regional accrediting commissions acceptable to the board are as follows:

(A) Middle States Association of Colleges and Schools for the states of Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, and Virgin Islands;

(B) New England Association of Colleges and Schools for the states of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont;

(C) North Central Association of Colleges and Schools for the states of Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, West Virginia, Wisconsin, and Wyoming;

(D) Northwest Association of Schools and Colleges for the states of Alaska, Idaho, Montana, Nevada, Oregon, Utah, and Washington;

(E) Southern Association of Colleges and Schools for the states of Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia; and

(F) Western Association of Schools and Colleges for the states of California, Hawaii, American Samoa, Guam, Commonwealth of North Marianas Islands, and the Trust Republic of the Pacific Islands.

(3) A school, college, university or other institution of higher learning outside the United States which, at the time the applicant was enrolled and graduated, shall maintain a standard of training substantially equivalent to the standards of training of those institutions accredited by one (1) of the regional accrediting commissions recognized by the United States Department of Education and acceptable to the board.

(4) The applicant shall have completed at least thirty (30) semester hours or forty-five (45) quarter hours of credit in a course of study in geology.

(A) A course of study in geology, wherever it may be administratively housed, shall be clearly identified and designed to teach fundamentals of geology, and principles and practices of geology, and shall be designed to train the student to engage in the practice of geology.

(5) The following criteria shall be used by the board in evaluating the applicant’s academic credentials:

(A) Credit will be given for seminar courses only if the applicant is awarded credit and a grade for the course that appears on the transcript. It shall be the responsibility of the applicant to provide substantiation that the course was an in-depth study of geology or a branch of geologic study and work such as engineering geology, environmental geology, hydrogeology or mineral resources. Such documentation includes, but is not limited to, course descriptions in official school catalogs, course syllabi, bulletins or other like means or through written documentation from an appropriate school official regarding course content;

(B) No credit will be given for workshops, continuing education, work experience or readings courses, even if credit is awarded by the educational institution and the offering appears on the transcript;

1. An independent study will be accepted by the board only if the applicant is awarded credit and a passing grade appearing on the transcript accompanied by a letter from the appropriate school official explaining the course was an in-depth study of geology or a branch of geologic study and work;

(C) If an academic course title is not self-explanatory as to the content, content must be substantiated through course descriptions from official school catalogs or bulletins, course syllabi, or through written documentation from an appropriate school official;

(D) A course shall not be considered as complete or meeting any academic requirements unless the applicant’s official transcript clearly shows the course was awarded credit by the school and the applicant has received a passing grade; and

(E) It shall be the applicant’s burden to demonstrate his/her academic course work and training constituted a program of study in geology. The applicant shall request the school or university forward official transcripts and any other supporting evidence necessary to document the fact that these educational requirements have been met. A final determination of whether the program of study or course work which forms the basis of the applicant’s thirty (30) semester or forty-five (45) credit hours of study in geology is within the discretion of the board.

(6) The board will review an applicant’s educational credentials upon receiving official educational transcripts directly from the college, school, or university and upon payment of a fee for an educational review. All information must be submitted to the board no later than thirty (30) days before a regularly scheduled board meeting to be reviewed at that meeting.
4 CSR 145-2.040 Examination

PURPOSE: This rule outlines the examination requirements and procedures for obtaining a registered geologist license.

1. Every applicant for licensure by the board as a registered geologist, except those meeting the requirements for licensure by grandfather procedures, reciprocity, or where test examination score has been endorsed by the board, shall take a written examination as prescribed by the board.

2. The applicant shall pass the National Geologist Examination as developed by the National Association for the State Boards of Geology (ASBOG) or its predecessor which consists of (2) sections; Fundamentals of Geology, and Principles and Practices of Geology.

3. The examinations shall be given at least twice each year at times determined by the board.

(A) The board shall notify all candidates in writing at least thirty (30) days prior to the date of the examination of the time and place of the examination.

(B) The candidate shall submit the applicable nonrefundable fees as prescribed.

(C) If the candidate fails to appear for the examination without submitting a written notice to the board at least seven (7) days prior to the examination, the examination fee shall be forfeited.

(D) The board shall notify all candidates in writing of their success or failure on any examination.

4 CSR 145-2.055 Complaints, Appeals and Challenges of Examination

PURPOSE: This rule outlines the procedures by which an examination candidate may make a complaint about the examination administration, appeal the examination content and/or make a challenge to the examination.

1. Examination Administration Complaints.

(A) A candidate may file a complaint regarding the administration of the examination by sending a letter to the Missouri Board of Geologist Registration (MBGR), in which the candidate will describe the basis for the administrative complaint and will include pertinent information. The letter of complaint must be postmarked no later than thirty (30) business days after the date of the examination and must be sent via traceable mail with delivery-signature of receipt required (e.g., certified mail).

(B) The MBGR through the executive director will investigate and determine the validity of the complaint and will respond to the candidate via traceable mail with delivery-signature of receipt required (e.g., certified mail) within sixty (60) business days after receiving the complaint.

2. Content Appeals.

(A) A candidate may begin an appeal process of an examination by submitting a written request to the board office for one or more of the following:

1. The line-item results;
2. A manual regrade; and/or
Chapter 2—Licensure Requirements

3. To inspect his/her examination papers at the office of the MBGR during mutually convenient normal business hours.

(B) Said request(s) must be postmarked no later than thirty (30) business days after receipt of the examination results and must be sent via traceable mail with delivery-signature of receipt required (e.g., certified mail). In making the request(s), the candidate must submit payment of the applicable processing fee(s) directly to the testing service.

(C) At the time of inspection, no one other than the examinee and/or his/her attorney and a representative of the MBGR shall have access to the examination papers, and no material other than the examination papers may be taken into or out of the inspection room. The inspection shall not exceed four (4) hours, unless special accommodations are requested at least seven (7) business days prior to the inspection and are approved by the executive director.

(3) Examination Challenges.

(A) Within thirty (30) business days after receiving the requested appeal information and/or inspecting the examination papers, the candidate may issue a challenge by asking the MBGR to review a particular question(s). In making such a challenge, the candidate will describe the basis for the challenge and will include pertinent information. The letter of challenge must be sent to the board office via traceable mail with delivery-signature of receipt required (e.g., certified mail).

(B) The MBGR with the executive director will investigate the challenge and will have a hearing at a mutually agreeable time to determine the validity of the challenge. The MBGR will hold the hearing and will respond to the candidate via traceable mail with delivery-signature of receipting (e.g., certified mail) the challenge within sixty (60) business days.

(C) In making said challenge, the candidate agrees to abide by the decision of the MBGR.

4 CSR 145-2.060 Licensure by Reciprocity

PURPOSE: This rule outlines the procedures to apply for licensure by reciprocity.

(1) An applicant may make application for licensure by reciprocity upon submission of the following to the board:

(A) Application form as provided by the board with supporting supplementary documentation, as requested;

(B) Proof of certification or registration from another state showing that the applicant is in good standing with the other state;

(C) Documentation that the licensing or registration requirements of the applicant’s state of licensure are substantially similar to the requirements of the board at the time the applicant seeks licensure by the board; and

(D) Applicable fees.

(2) The board will consider the registration or licensure requirements of the other state to be substantially similar to the requirements of the board if the applicant for licensure by reciprocity has met the following criteria, at the time of application to the board:

(A) Proof of graduation from an accredited college or university;

(B) College and university transcripts showing successful completion of at least thirty (30) semester or forty-five (45) quarter hours, or their equivalent, in geology courses which are on topics involving the investigation and interpretation of the earth, including bedrock, overburden, groundwater and other liquids, minerals, gases, and the history of the earth and its life;

(C) Detailed summary of actual geologic work showing that the applicant has completed at least three (3) years of post-baccalaureate work in the practice of geology in responsible charge; and

(D) Proof of having achieved a passing score on the National Geologist Examination as developed by the National Association for the State Boards of Geology (ASBOG), or, evidence that the state of licensure, at the time of application to the Missouri Board, requires its applicants to successfully pass the ASBOG exam, or, evidence of successful completion of a state administered exam, approved by the board, which tests the applicant’s knowledge of the fundamentals of geology and the principles and practices of geology.

4 CSR 145-2.070 Geologist-Registrant In-Training

PURPOSE: This rule establishes the requirements for a geologist-Registrant in-training.

(1) Any person engaged in post-baccalaureate experience in the practice of geology as defined in section 256.453(7), RSMo, may apply for geologist-Registrant in-training by obtaining an application from the board.

(A) The applicant shall meet the educational requirements as defined in 4 CSR 145-2.020; and

(B) The applicant shall have passed the Fundamentals of Geology portion of the National Geologist Examination as developed by the National Association for the State Boards of Geology (ASBOG) or its predecessor.

(2) The applicant will be informed by letter regarding the results of the board review. If the application is denied the letter shall outline, with as much specificity as practical, the reasons for denial.

(3) Once approved by the board, during the period of post-baccalaureate experience the applicant shall identify him/herself as a geologist-Registrant in-training.

(4) Each geologist-Registrant in-training shall provide clients with a disclosure statement which shall include:

(A) His/her in-training status; and

(B) Name of the supervisor, employer, or client.

(5) A geologist-Registrant in-training shall comply with all laws and rules relating to the practice of geology.

4 CSR 145-2.080 Renewal of License

PURPOSE: This rule provides information regarding the annual renewal of a license as a registered geologist or geologist-Registrant in-training.
(1) A certificate may be renewed on or before the expiration date of the certificate by submitting the signed renewal notice and fee as set forth in these regulations.

(2) Failure of a registered geologist or geology-registrant in-training to receive the notice and application to renew his/her certificate shall not excuse him/her from the requirement to renew that certificate.

(3) Failure to renew a certificate within sixty (60) days of the registration renewal date shall affect an administrative revocation of the certificate as authorized by section 256.468.12, RSMo.

(4) Any registered geologist or geology-registrant in-training who fails to renew the certificate or whose certificate has been administratively revoked shall not perform any act or provide any service for which a license is required.

(5) Any individual who failed to renew the certificate within the sixty (60)-day period set forth in section 256.468.12, RSMo, and who wishes to restore the certificate shall make application to the board by submitting the following within two (2) years of the registration renewal date:
   (A) An application for restoration of the certificate; and
   (B) The delinquency fee as set forth in 4 CSR 145-1.040(1)(F).

*Original authority: 256.462, RSMo 1994.*

4 CSR 145-2.100 Registered Geologist’s Seal

**PURPOSE:** This rule describes the format for the personal seal of a registered geologist and explains in detail where and how the seal shall be used.

(1) Each registered geologist shall, at his/her own expense, secure a seal or rubber stamp, one and three-quarters inches (1 3/4") in diameter. The seal or stamp shall consist of concentric circles between which shall appear in capital letters “STATE OF MISSOURI” on the upper part of the seal, and “REGIS-
TERED GEOLOGIST” on the lower part of the seal. Within the inner circle of the seal shall appear the name of the registered geologist in printed letters and his/her certificate number preceded by the capital letters “RG”.

(2) The registered geologist shall submit an impression or stamp of the seal with an original signature superimposed over it for the board’s records. If the board disapproves the registered geologist’s seal, the board shall inform the registered geologist in writing and the registered geologist shall obtain another seal that meets the requirements of this rule.

3 In addition to the personal seal or rubber stamp, the registered geologist shall also affix his/her signature on or through his/her seal, and place the date of the signature under the seal on each sheet in a set of plans, drawings, specifications, maps, reports, and other documents which are prepared by the registered geologist or under the registered geologist’s immediate personal supervision.

(A) When there are multiple page plans, reports, maps, drawings or other documents or instruments, the registered geologist may sign, seal and date only the title or index page, providing the signed sheet clearly identifies all of the other pages comprising the bound volume were prepared by him/her or under their immediate personal supervision.

(B) When revisions are made, the regis-
tered geologist who made the revisions or under whose personal supervision the revisions were made shall place his/her signature on the same line next to the revision date and give an explanation of the revisions.

(C) If a set of multiple page plans, reports, maps, drawings or other documents or instru-
mants (“documents”) contains the seals of more than one (1) licensed or registered pro-
fessional, the registered geologist should cer-
tify, on the title or index page, that his/her seal only relates to the portions of the docu-
ments that involve the practice of geology, as defined in section 256.453(7), RSMo. The registered geologist should identify, on the title page or index, the geologic portions of the documents that he/she, or someone under his/her immediate personal supervision, prepared. The registered geologist may identify those portions of the documents that neither he/she nor someone under the registered geologist’s immediate personal supervision prepared.

(4) When a registered geologist is submitting documents for review purposes to supervi-
sors, clients or municipal authorities, such documents shall be signed, sealed and dated. If the documents are incomplete, language should be placed in an obvious location so that it is easily read and not obscured by other markings. When the documents are consid-
ered complete by the registered geologist, the disclaimer should be removed or crossed out and the registered geologist shall sign the cancellation of the disclaimer as a revision to the documents.

(5) If two (2) or more registered geologists provide reports, plans, drawings, maps or other documents, each registrant shall date, sign and seal those documents using the appropriate disclaimer identifying each registrant’s responsibility.

(6) Any documents not prepared by the regis-
tered geologist or under his/her personal supervision shall not be signed or sealed by the registered geologist.

(7) Any registered geologist who does not have a current certificate in this state is pro-
hibited from using his/her seal on any docu-
ments until the certificate is renewed or other-
wise reinstated.
