Promoting and Protecting Missouri Agriculture

Established in 1933 by the General Assembly, the Department of Agriculture promotes and protects Missouri’s multi-billion dollar agriculture and agribusiness industry. The department also enforces state laws that regulate and market the agricultural industry.

The department’s divisions include Agriculture Business Development, Animal Health, Grain Inspection and Warehousing, Plant Industries and Weights and Measures. The department also houses the Missouri Agricultural and Small Business Development Authority, the Missouri State Fair, State Milk Board and the Missouri Wine and Grape Board.

Office of Director

The Missouri Department of Agriculture is managed by a director who is appointed by the governor and confirmed by the Senate. The director determines department policy, oversees the department’s five divisions and serves as a liaison to the governor, state legislators, the agriculture community and the public.

The director is a standing member of the State Milk Board, the State Fair Commission, the Missouri Soil and Water Districts Commission, the Missouri Development Finance Board, the Missouri Petroleum Storage Tank Insurance Fund and the Missouri Agricultural and Small Business Development Authorities.

Agriculture Business Development Division

The Agriculture Business Development Division creates opportunities for success for Missouri’s farmers and agribusinesses. Division staff help facilitate growth in Missouri’s agriculture-based businesses by providing business counseling, information and training on a sector-by-sector basis.

Areas of specialization include capitalization, business planning, marketing, industry development, product and brand development and organizational structures. The division also helps facilitate growth in Missouri’s agriculture-based industries by working with key players such as universities, associations, private sector partners and federal and state agencies to aid in the growth of each sector.

AgriMissouri

AgriMissouri is a branded program designed to grow the demand for agricultural products raised and processed in Missouri. The program represents farmers, agribusinesses and farmers’ markets statewide and plays a key role in increasing consumer recognition of Missouri’s agricultural products through retail, restaurant and foodservice channels.

Agriculture Marketing Program

The Agriculture Marketing Program focuses on both domestic and international marketing. Department specialists work with specific industry representatives or groups to establish marketing opportunities and promote Missouri commodities here and abroad.

Through providing one-on-one assistance to producers interested in production, marketing or processing their commodities in new ways, the marketing personnel enhance farm profitability in Missouri through innovations in technology and marketing and promotions of value-added agriculture.

The division’s international marketing specialists work worldwide to sell Missouri agricultural products. The program has an international office in Taiwan and works with the Department of Economic Development’s offices across the world. In addition, the program manages an agricultural trade office in Taipei, Taiwan and Shanghai, China and works with other state offices and representatives in United Kingdom, Mexico and Japan.

Farmers’ Markets/Specialty Crops

Consumers demand high quality and fresh products at Missouri’s more than 160 farmers’ markets. To increase awareness for Missouri farmers’ markets, this program works one-on-one with farmers’ markets to ensure safe and abundant fresh products. Farmers marketing fresh products today request knowledge about food safety and distribution regulation, freshness preservation, marketing and production cycles. This program assists both markets and growers in statewide marketing and promotional efforts to increase the consumption of specialty crops.

Market News

Market News provides an unbiased, reliable, accurate and timely source for livestock and grain market news to remain competitive and assist in making wise and profitable marketing decisions. It also guides producers in production planning and provides a more even playing field in the marketplace. Market News staff report prices from 33 livestock auctions and 28 grain markets in Missouri. Daily market figures are published online and through the Weekly Market Summary.

Outreach

The Market Outreach Program works to position the department as a state and national leader in providing information and outreach to both agriculture and non-agriculture audiences. The program works to increase consumer’s knowledge of the economic, historical and social value of agriculture. Outreach staff work with Missouri youth, encouraging them to pursue agricultural degrees and careers through the Missouri Agribusiness Academy, the Missouri Livestock Grading and Judging Contest, Building Our American Communities grants and educational scholarships. In addition, Outreach serves as a liaison with Missouri agricultural commodity associations, publishes current commodity group contact information, coordinates commodity merchandising council elections and prepares official proclamations.

Animal Health Division

The Division of Animal Health, under the direction of the state veterinarian, promotes and protects Missouri’s diverse and dynamic livestock industry. The assistance and oversight provided by the division’s programs ensure greater market access for Missouri’s livestock and companion animal industries.

Animal agriculture accounts for about half of Missouri’s annual agriculture cash receipts. The division administers laws and programs designed to control and eradicate livestock disease and to maintain and enhance the integrity of the state’s animal industries. This includes both mandatory and voluntary regulatory programs for beef and dairy cattle, horses, swine, poultry, sheep, goats, exotic and companion animals.

The state’s progress in national disease control and eradication is due to the cooperative efforts of livestock producers, markets, practicing veterinarians, other agencies and animal health staff. Through these cooperative efforts, Missouri has achieved Bovine Tuberculosis and Brucellosis Free status, Swine Pseudorabies stage V status and Avian Pullorum-Typhoid Clean status. In addition, the division operates
AgroSecurity

The Animal Health Division works to safeguard the livestock industry and the public against the threat of biohazardous attacks. In addition, the division informs cattle producers of quality assurance targeting breeding and herd management, increase awareness and understanding of environmental issues affecting production agriculture, and presents marketing and food safety programs to small poultry producers and inspect Missouri meat processors to supplement existing USDA inspections.

Animal Care Facilities

Missouri is one of very few states which regulate companion animals. The Animal Care Facilities Act Program (ACFA) became law on August 28, 1992 to ensure dogs and cats, specifically those under the care of breeders, dealers, animal shelters, rescue operations and municipal pounds, receive adequate health care, shelter and proper socialization. The ACFA law, designed to benefit both the animals and the pet industry, requires any animal shelter, pound or dog pound, boarding kennel, commercial kennel, contract kennel, pet shop, exhibition facility, dealer or commercial breeder to be licensed and inspected annually.

Branding Cattle

Branding is one of the oldest and best ways to permanently identify livestock. It serves as an excellent safeguard against livestock theft, loss or dispute. Legislation passed in 1971 made the Department of Agriculture responsible for registering livestock brands. Brands must be recorded as required by Missouri’s Marks and Brands of Animals Law to prove ownership and be considered legal evidence in a court of law.

Grain Inspection and Warehousing Division

The Grain Inspection and Warehousing Division is comprised of two programs that administer the Missouri Grain Warehouse Law, the Missouri Grain Dealer Law and the United States Grain Standards Act. These laws promote and protect commerce in the interest of grain producers, merchandisers, warehousemen, processors and consumers. They also promote a uniform inspection system for the orderly marketing of grain. The division also collects and disburses funds for nine commodity merchandising programs.

Grain Inspection Services Program

The Grain Inspection Services Program is designated to officially inspect, grade and weigh all grains that have standards established under the United States Grain Standards. The program provides four primary services:

- official sampling to take a representative sample of grain from a particular lot;
- official inspection to determine and certify the type, quality or condition of grain;
- weighing certification to supervise the loading, unloading and weighing containers of grain; and
- chemical analysis to determine the protein or oil content of grain and to determine the existence of mycotoxins in grain.

Services are provided at inspection offices in Kansas City, Vandalia, Marshall, New Madrid and St. Joseph. The program is self-supporting and operates entirely on fees charged for inspection services performed.

Grain Regulatory Services Program

The Grain Regulatory Services Program protects the public interest by auditing grain warehouses and grain dealers to determine grain obligations and financial solvency. The program enforces Missouri’s Grain Warehouse and Grain Dealer Laws so producers are assured of storing or merchandising their grain with licensed, bonded, reputable and financially stable grain businesses. The program annually licenses approximately 200 warehouses and 400 grain dealers and conducts more than 900 audits and investigations.

Plant Industries Division

The Plant Industries Division is comprised of four bureaus, which together administer state and federal laws. These laws facilitate agricultural production and marketing and provide consumer and environmental protection for Missouri citizens by regulating animal feeds and seeds, providing necessary certifications for interstate and international shipment of agricultural and forest products, ensuring plant pest protection for crops and forests, establishing grades and standards for fresh fruits and vegetables and regulating the use of pesticides.

Bureau of Feed and Seed

The bureau administers the Missouri Commercial Feed Law and the Missouri Seed Law. The feed law regulates the manufacture, distribution and labeling of commercial feed products to ensure that livestock producers and pet owners receive the feed product guaranteed. The bureau, in partnership with the U.S. Food and Drug Administration, provides inspection reports and regulation involved with preventing Bovine Spongiform Encephalopathy (BSE) and also provides labeling assistance and investigates complaints related to animal feed.

The bureau regulates seed products through inspecting, sampling, testing and labeling and are reviewed to ensure the product meets the labeled guarantees. The bureau cooperates with the United States Department of Agriculture’s (USDA) seed regulatory and testing branch in regulating the interstate movement of seed.

Bureau of Pesticide Control

The bureau administers laws for registration, distribution and use of pesticides. All pesticides sold and used in Missouri are regulated by the Missouri Pesticide Registration Act. Bureau personnel inspect pesticides for proper labeling and registration and investigate misuse. The Missouri Pesticide Use Act allows the bureau to certify commercial, noncommercial and private applicators and public operators. The act also provides for licensing pesticide dealers and pesticide technicians.

Bureau of Plant Pest Control

The bureau administers laws to control insects, plant pests and plant diseases and administers the Missouri Plant Law, which mandates controlling harmful insects, plant pests and plant diseases through surveys, quarantines, nursery and greenhouse inspections and certification. The law also enables interstate and international shipments of Missouri plants and plant products.

As a service to Missouri beekeepers, the Bureau works under the Missouri Apiculture Law to inspect and certify honeybee colonies. These procedures are required for interstate shipment of honeybees.

Bureau of Integrated Pest Management

The Integrated Pest Management (IPM) Bureau includes the Forest Resources, the Fresh Fruit and Vegetable Inspection and the IPM in Missouri Schools programs.

IPM strategies anticipate pest problems and prevent them from reaching economically damaging levels. The goal of the IPM Program is to assist producers to reduce dependence on pesticides through pest identification and surveys, adoption of integrated management practices, strategic control methods and when practical, the use of biological control agents. The bureau provides oversight of grant funded programs including the IPM in Missouri Schools, Pesticide-Sensitive Crops Registry and US Forest Service pest surveys.

The Forest Resources Program is responsible for the licensure of all treated timber producers and dealers doing business within the state of Missouri. The program is also responsible for regulations governing the quality and distribution of treated wood products. The program administers the statutes involving the control and eradication of noxious weeds as well as the appointment of Johnson Grass Control Board members in their respective counties.

The Fresh Fruit and Vegetable Inspection Program assures buyers and sellers of this highly perishable product that commodities are graded and packed to conform to established USDA standards. Shipping point inspections at the point of origin determine the quality and grade of Missouri grown produce. Terminal market inspections confirm quality and grade of produce received by Missouri wholesale purchasers for distribution to retail outlets. Both types of inspections are provided upon request and at the expense of growers, shippers, or wholesale purchasers. The program is a State/USDA Agricultural Marketing Service cooperative effort.

Laboratory Support

Laboratories are maintained for analytical support to the seed, treated timber and commercial feed and other programs.

Weights and Measures Division

As the chief consumer protection agency in the state, the Weights and Measures Division maintains surveillance of commercial weighing and measuring devices. The division promotes uniformity in laws, regulations and standards to achieve equity between buyers and sellers. Sales
of products and services inspected by weights and measure laws represent over 50 percent of U.S. gross national product totaling over $4.5 trillion.

The Missouri Weights and Measures Division programs are operated in accordance with the National Institute of Standards and Technology. The division also is a member of the National Conference on Weights and Measures, ASTM International and the National Fire Protection Association.

Device and Commodity Inspection Program

As required by Missouri statutes, device and commodity field personnel inspect large and small scales, grain hopper scales, taxicab meters, odometers, timing devices, fabric measuring devices, grain moisture measuring devices, milk for quantity determination, pre-cab meters, odometers, timing devices, fabric device and Commodity Inspection Program.

Petroleum/Propane/Anhydrous Ammonia

Program

The program combines a variety of ser-

vices. Under the program, petroleum dispensers, petroleum terminal meters and metered fuel delivery trucks are tested for accuracy. Service station pumps are also inspected for accuracy and safety. Metered LPG delivery trucks are

checked and storage of anhydrous ammonia are monitored.

Metrology Program

The metrology program conducts tests and calibrates and certifies field standards for state agencies and private institutions. The state metrologist is the official keeper of Missouri’s primary standards of mass, volume and length.

Fuel Quality Program

Fuel samples are collected by field personnel

and submitted for testing. The petroleum labora-
tory analyzes gasoline, kerosene, heating oils and diesel fuel to make certain they meet state quality and safety standards.

Missouri State Fair

2503 W. 16th St., Sedalia 65301

Telephone: (660) 827-8150

www.mostatefair.com

Established in 1899, the Missouri State Fair is one of the oldest in the nation. The fairgrounds, which cover 396 acres in Sedalia (Petit County), are open year round, providing facilities for horse and livestock shows, art and craft festivals, camping, rallies and other events. During the annual fair held each August, visitors enjoy educational and recreational activities, a carnival midway and musical entertainment.

The Missouri State Fair continues to be the state’s largest agricultural and tourism event with exhibits showcasing livestock, row crops, horticulture and floriculture. The State Fair plays an important role in shaping Missouri agriculture, contributing to the state’s economy and educat-
ing the public about the importance and neces-
sity of agriculture. It features agribusiness exhibits and displays of Missouri-produced commodities.

The State Fair Commission, whose members

are appointed by the governor, oversees the fair’s operations.

Missouri Agricultural and Small Business Development Authority

The Missouri Agricultural and Small Business Development Authority promotes the development of agriculture and small business and to reduce, control and prevent environmental damage in Missouri. The authority provides additional sources of financing at interest rates that are below conventional rates.

Available loans and grants include: Beginning Farmer Loan Program, Animal Waste Treatment System Loan, Single-Purpose Animal Facilities Loan Guarantee, Missouri Value-Added Grant, Missouri Value-Added Loan Guarantee, New Generation Cooperative Incentive Tax Credit, Agricultural Products Utilization Contributor Tax Credit, Family Farm Breeding Livestock Tax Credit, Qualified Beef Tax Credit Program, Live-

stock Feed and Crop Input Loan Guarantee.

The authority is administered by a seven member commission, which is appointed by

the governor and confirmed by the Senate. The Director of Agriculture serves as an ex-officio member.

Missouri Wine & Grape Board

The Missouri Wine and Grape Board is responsible for researching, developing and promoting Missouri grapes, juices and wine. The board is funded by tax on all wine sold in Missouri.

Missouri wineries continue to refine their grape growing and winemaking skills to offer distinctive, quality wines. The Wine and Grape Board sponsors research and advisory programs at the Institute for Continental Climate Viticulture & Enology (ICCVE) center.

Missouri has more than 1,400 acres of grapes. Missouri wineries produce more than $85,000 gallons of wine with an overall economic impact of $701.2 million. Many of the state’s 80 plus wineries consistently take top honors in prestigious domestic and international competi-

State Milk Board

The State Milk Board consists of 12 members, 10 of whom are nominated by the director of agriculture, appointed by the governor and confirmed by the Senate. The two remaining members of the board are from the state Department of Health and Senior Services and the Department of Agriculture.

Four of the appointed members of the board must be Grade A dairy farmers representing recognized producer organizations. Four appointees are active members of local health departments in the state. The two remaining appointees represent processor and consumer interests. No more than six of the 12 board members can be from the same political party.

The board administers milk inspection relating to Grade A milk and milk supplies to assure uniformity of procedures and interpretation of milk inspection regulations. The Grade A or fluid milk activities of the state are supported by revenue from inspection fees.

The manufacturing grade dairy program enforces sanitation and quality standards for manufactured dairy products and provides market testing of all milk at the first point of sale. Milk procurers, manufacturing plants, field superintendents, testers, graders, samplers, bulk milk truck operators and market testing laboratories are licensed by the State Milk Board.

Missouri Agricultural Statistics Service

The Missouri Agricultural Statistics Service is a federal-state cooperative agency. The service compiles and disseminates state, district and county agricultural information and conducts Missouri’s portion of the National Census of Agriculture every five years. The service publishes state, district and county agricultural data, the weekly Crop and Weather Report and the monthly Crop and Livestock Reporter.

The Missouri Agricultural Statistics Service cooperates with the Missouri Department of Agriculture, University of Missouri and the United States Department of Agriculture (USDA).
